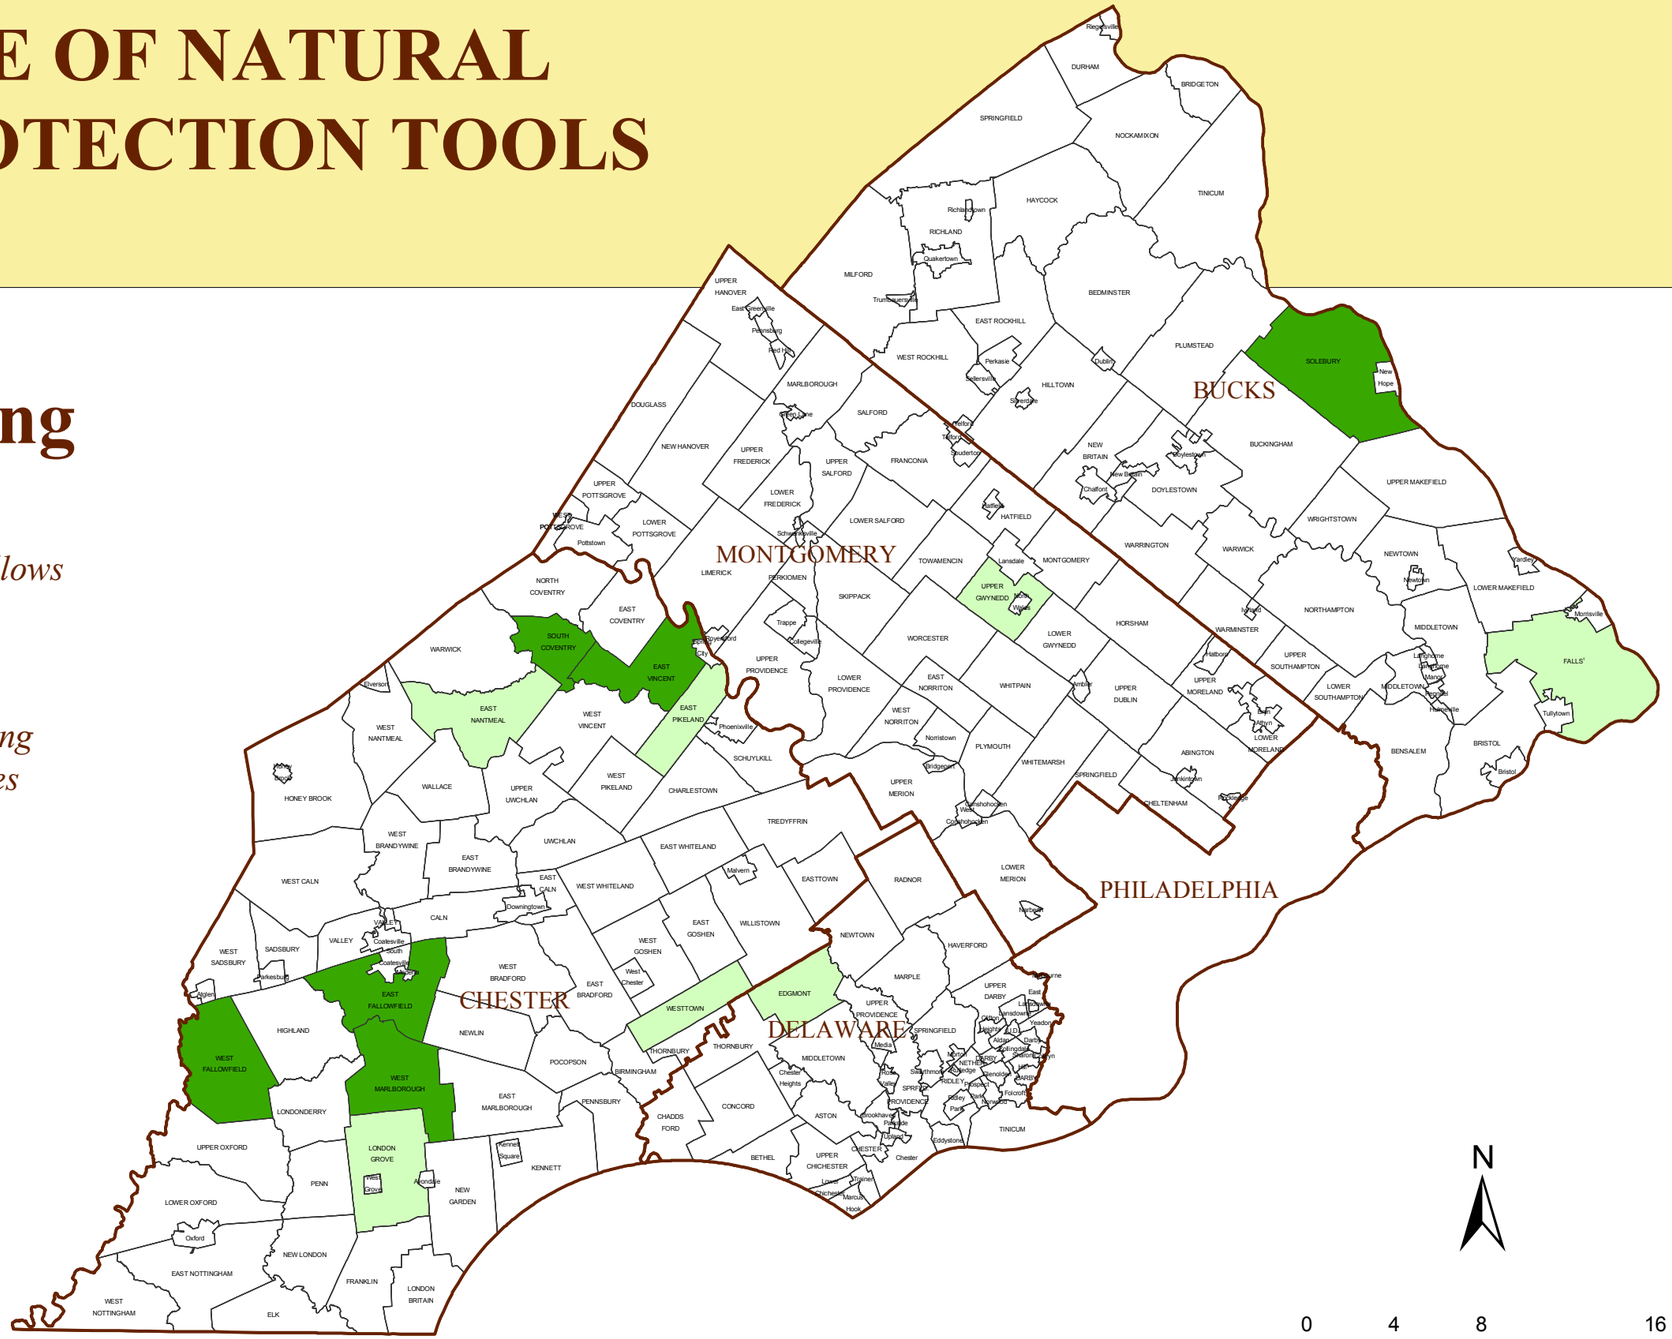
MUNICIPAL USE OF NATURAL RESOURCE PROTECTION TOOLS

Agricultural Zoning

Agricultural Zoning is a technique that allows municipalities to protect their rural and agricultural areas by establishing large minimum lot sizes. This map shows municipalities that have agricultural zoning districts with 10-20 acre minimum lot sizes and municipalities that have districts with 20 acre or larger minimum lot sizes.



10 TO 20 ACRES

MORE THAN 20 ACRES

[1] Falls Township has a farming and mining district that permits only agricultural and mining uses at a minimum density of 10 acres.
