DVRPC's historical aerial photos date from 1959 and were updated in 5-year increments from 1965 to 1995. Note: Digital ortho-imagery is available for the years 2000 and 2005.

Covers the entire 3,833 square mile Delaware Valley Region (limited coverage is available in 1959 and 1965), which includes all of Bucks, Chester, Delaware, Montgomery, and Philadelphia counties in Pennsylvania; and Burlington, Camden, Gloucester, and Mercer counties in New Jersey.

Available digitally as scans in TIFF format, by municipality, county, region, or custom sets. Each file is approximately 33MB in size.

Black and white digital imagery "tiles" each show approximately 3 square miles of area.

Aerial imagery prior to 2000 is not intended for use in a Geographic Information System (GIS). This imagery is not ortho-rectified and therefore has no spatial reference.

Paper Prints of individual tiles are available at 1"= 400'.

Current prices. . .

Digital (TIFF): Individual File - \$6.00 /
County Set - \$3.00 Per File/
Regional Set - \$2.00 Per File

Hardcopy: 1-10 Prints - \$20.00 Each /
