# New Jersey Zero-emission Incentive Program: Policy in Practice

---

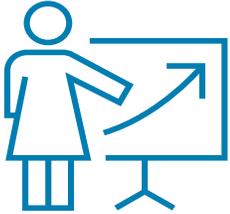

April 20, 2022

Victoria Carey – Clean Energy Manager  
[vcarey@njeda.com](mailto:vcarey@njeda.com)

# Transitioning New Jersey's transportation system to zero-emission alternatives is critical to becoming a stronger and fairer state

**Transportation accounts for 42% of NJ's emissions**, with a quarter coming from MHDV, which disproportionately impact overburdened communities

In meeting our zero emission vehicle targets, **we can reduce net emissions especially in overburdened communities**

By pursuing the zero-emission transition, **we can create jobs and reduce costs, increasing economic opportunity**

**A cohesive financial, strategic, and regulatory tool set coordinated across government and industry – and driven by communities' self-identified needs – is key to meaningfully achieving our goals**

# NJ ZIP: Zero-emission Incentive Program – At a glance

## NJEDA's RGGI-funded Voucher Pilot for Medium Duty Vehicles

### Funding

\$44.25M in voucher pool (expanded from an initial \$15M pool), anticipated to support purchase of approximately 300 vehicles

### Timing

First come, first serve with rolling approvals, open until all funds committed. Set asides by location and for small businesses to ensure equitable access.

### Eligibility

Businesses or institutions operating or registering/domiciling zero-emission medium duty vehicles in Greater Camden, Newark, New Brunswick, and Shore Areas

### Voucher Amounts

Vehicle Class	Voucher \$
Class 2b	\$25,000
Class 3	\$55,000
Class 4	\$75,000
Class 5	\$85,000
Class 6	\$100,000

### Bonus voucher criteria

- Minority-, women-, or veteran-owned business (\$4k)
- Small business (25%)
- Small business scrappage (\$2k)
- 25% NJ-manufactured (25%)
- Public access for driver readiness and education (\$2k)

### Basic program requirements

- \$1000 application fee
- Buy new ZEV & register in NJ
- 3 years operation with 75% in NJ and 50% in EJ
- Vendor provides charging and in-state maintenance plan
- Comply with audit requirements

# NJ ZIP: Common questions

## What communities are eligible?

### Greater Camden Area

Bellmawr, Camden, Cherry Hill, Cinnaminson, Collingswood, Delran, Deptford, Gloucester, Lawnside, Lindenwold, Magnolia, Maple Shade, Merchantville, Mount Ephraim, Mount Laurel, Palmyra, Paulsboro, Pennsauken, Riverside, Somerdale, Stratford, Voorhees, Washington, West Deptford, Westville, Woodbury, Woodlynne

### Greater Newark Area

Bayonne, Belleville, Bloomfield, Carlstadt, Carteret, Clark, Clifton, Cranford, East Newark, East Orange, East Rutherford, Elizabeth, Glenridge, Guttenberg, Harrison, Hillside, Hoboken, Irvington, Jersey City, Kearney, Kenilworth, Linden, Little Falls, Livingston, Lyndhurst, Maplewood, Millburn, Montclair, Moonachie, Newark, North Arlington, North Bergen, Nutley, Orange, Passaic, Rahway, Roselle, Roselle Park, Rutherford, Secaucus, South Orange, Springfield, Summit, Union City, Union Township, Verona, Wallington, Weehawken, West New York, West Orange, Westfield, Woodridge

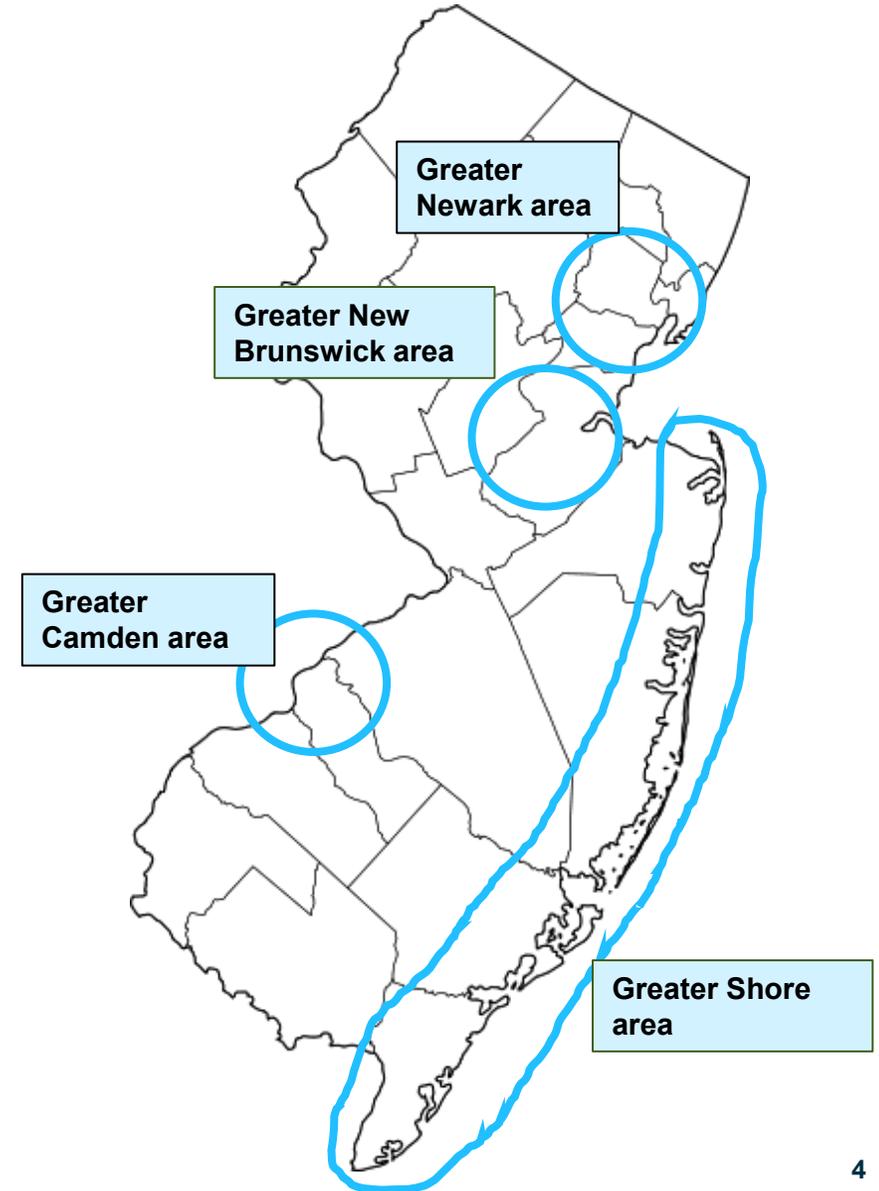

### Greater New Brunswick Area

Bound Brook, Bridgewater, Clark, Dunellen, East Brunswick, Edison, Franklin, Green Brook, Highland Park, Hillsborough, Jamesburg, Manville, Metuchen, Middlesex, Monroe, Montgomery, New Brunswick, North Brunswick, North Plainfield, Old Bridge, Perth Amboy, Piscataway, Plainfield, Raritan, Sayreville, Scotch Plains, Somerville, South Amboy, South Bound Brook, South Brunswick, South Plainfield, South River, Spotswood, Woodbridge

### Greater Shore Area

Greater Shore Area: Absecon, Asbury Park, Atlantic City, Barnegat Township, Berkeley Township, Bradley Beach Borough, Brick Township, Brigantine, Cape May, Colts Neck Township, Eatontown Borough, Egg Harbor City, Egg Harbor Township, Farmingdale Borough, Galloway Township, Highlands Borough, Holmdel Township, Howell Township, Keansburg Borough, Keyport Borough, Lacey Township, Lakewood Township, Little Egg Harbor Township, Long Branch, Lower Township, Manchester Township, Middle Township, Middletown Township, Neptune City Borough, Neptune Township, North Wildwood, Northfield, Ocean City, Ocean Gate Borough, Ocean Township, Pleasantville, Point Pleasant Beach Borough, Red Bank Borough, Seaside Heights Borough, Shrewsbury Township, Somers Point, South Toms River Borough, Stafford Township, Tinton Falls Borough, Toms River Township, Tuckerton Borough, Union Beach Borough, Ventnor City, Wildwood, Woodbine Borough

Approximate locations; visual may not be accurate to exact eligible municipalities

# Example Voucher Calculation

## How do you calculate the voucher amount?

You don't have to! The application auto-calculates. But for example...

*You are a small, women- and veteran-owned NJ business. You need to buy (1) Class 3 vehicle to add to your fleet. You find an approved Vendor who sells a zero-emission version, and get a quote of \$125,000 (pre-voucher) for the vehicle.*

$$\text{Voucher amount} = \left( \begin{array}{c} \text{Base} \\ \text{voucher} \\ \text{amount} \end{array} \times \begin{array}{c} \text{Small} \\ \text{business} \\ \text{bonus} \end{array} \right) + \begin{array}{c} \text{Woman-owned} \\ \text{business bonus} \end{array} + \begin{array}{c} \text{Veteran-owned} \\ \text{business bonus} \end{array}$$

$$\text{Voucher amount} = ( \$55,000 \times 1.25 ) + \$4,000 + \$4,000$$

$$\text{Voucher amount} = \$76,750$$

$$\text{Upfront cost to buyer} = \$125,000 - \$76,750 = \$48,250 \text{ final cost with voucher}$$

Note: All vouchers are capped at 100% of vehicle cost and a single applicant is capped at \$1.5M

# Illustrative program design process and considerations example

# NJ ZIP: Common questions

*Where can I find more information about EVs in NJ?*

<https://www.drivegreen.nj.gov/>

The screenshot shows the homepage of the Drive Green New Jersey website. At the top, there is a navigation bar with the text "DRIVE GREEN" on the left and a "Home" link on the right. Below this is a secondary navigation bar with menu items: "Home", "Electric Vehicle Basics", "Medium- and Heavy-Duty EVs", "Why go Electric?", "NJ EV Initiatives", and "Regional Partnerships". The main content area features a large banner image of a road winding through a forest, with the text "Your choice to drive electric improves New Jersey's air quality and helps slow climate change." overlaid. To the right of the banner are social media icons for Facebook, Twitter, Instagram, and YouTube. Below the banner is a large green box containing the "drive green new jersey" logo, where the letter 'i' in "drive" is replaced by a plug icon. Underneath the logo are four columns of content, each with a plug icon and a title: "Vehicle Basics", "Charging", "Incentives to Drive Green", and "Policy Initiatives". Each column contains a short paragraph of text.

**DRIVE GREEN** Home

Home Electric Vehicle Basics Medium- and Heavy-Duty EVs Why go Electric? NJ EV Initiatives Regional Partnerships

Your choice to drive electric improves New Jersey's air quality and helps slow climate change.

drive green new jersey

**Vehicle Basics**  
Between all of the different acronyms, it's easy to get confused. Here we have a basic breakdown of the main types of electric vehicles that either plug in or have no harmful tailpipe emissions.

**Charging**  
There are many options when it comes to charging your electric vehicle. This information will reveal the types of charging stations, where to find one, information on the cleanliness of the NJ grid, and charging resources.

**Incentives to Drive Green**  
There are many different federal and state incentives to make the transition easier. Explore Electric Vehicle Affordability with calculators that determines your personal cost. "It Pay\$ to Plug In", provides grants to offset the cost of electric vehicle charging stations.

**Policy Initiatives**  
Learn about the policy initiatives New Jersey is developing to support the electrification of the transportation sector to meet State's 2050 greenhouse gas goal.

New Jersey  
Statewide Freight  
Plan - 2022

# NJ Statewide Freight Plan

---

- Ongoing/Complete:
  - Goals and Objectives
  - Recent/Previous Studies
  - “Emerging” Trends
  - Economic Analysis
  - Highway Analysis
- Underway/Forthcoming:
  - Other Modal Analyses (Rail, Maritime, Air, Pipeline)
  - Performance Measures
  - Innovative Technologies
  - Priorities/Actions

## Schedule

Modal Analyses – June 2022

Performance Measures – July 2022

Emerging Trends/Innovative Technologies – August 2022

Priorities/Actions – October 2022

Draft Plan/Final Plan – November/December 2022

# 2022 NJ Statewide Freight Plan - Vision

---

- Improve the operating conditions for New Jersey's goods movement industry.
- Develop freight-focused initiatives that can support immediate and longer-term economic growth in the state

# Goals and Objectives

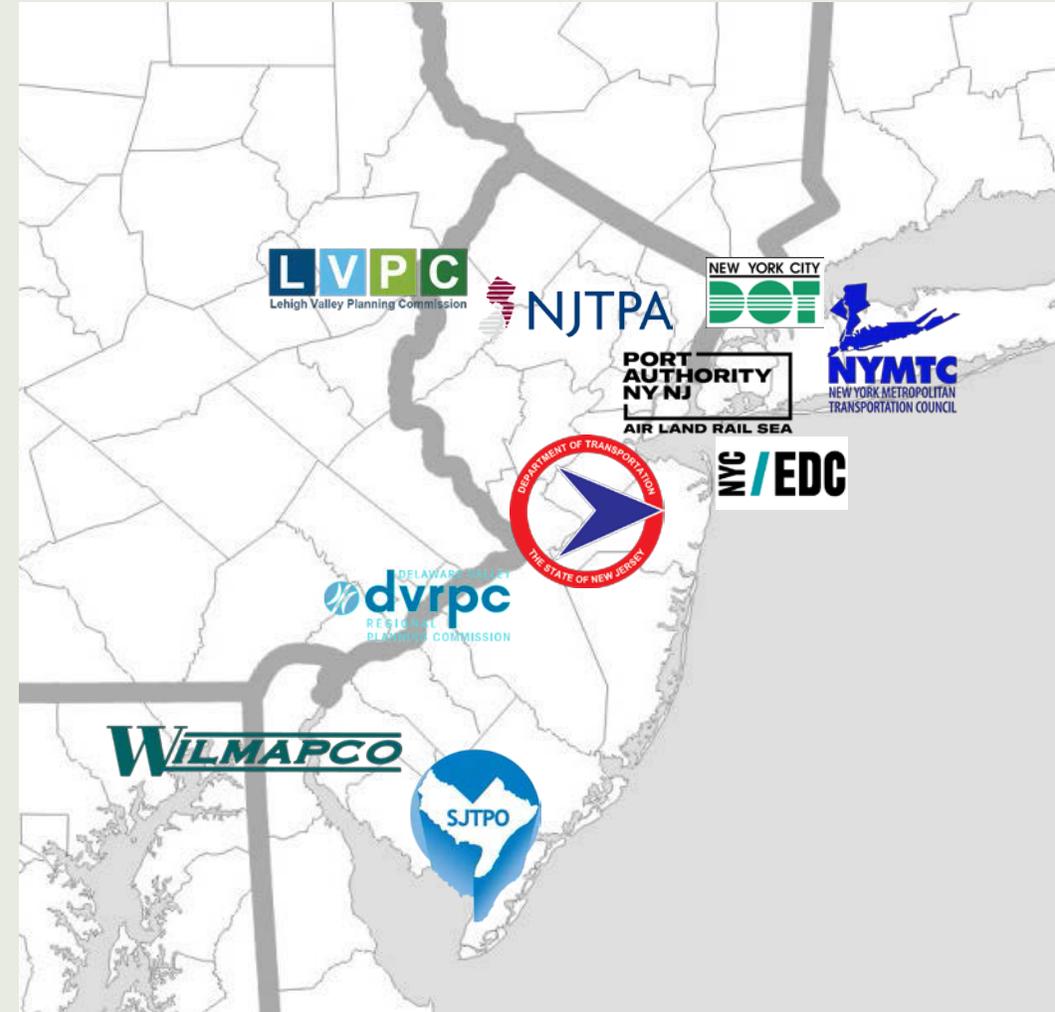

---

- Enhance System and Supply Chain **Safety and Security**
- Strengthen System and Supply Chain **Competitiveness and Productivity**
- Advance System **Reliability, Efficiency, Redundancy, Fluidity, and Connectivity**
- Enhance System **Resiliency and Sustainability**
- Maintain and Renew **Multimodal Infrastructure**
- Advance Freight as a Good Neighbor through **Environmental Stewardship, Equitable Policy Decisions, Responsible Development, and Quality of Life**
- Facilitate Intra-, Inter-, and Multi-state agency **Coordination and Governance** and Actions
- Leverage **Advanced Technology, Multimodal Freight Transportation, and Public-Private Partnership Opportunities and Practices**

# Recent/Previous Studies

---

- Reviewed nearly 50 ongoing or recently completed freight planning/implementation projects advanced by NJ and adjacent state MPOs/Agencies.
- Final plan will include brief summary of each plan and links to each.

# Emerging Trends

- Freight/Complete Streets
- Disruption Response (Pandemic) Toolkit
- Truck Parking
- Wind Port
- Links with Lehigh Valley

### Why is truck parking an important issue?

The availability and shortage of truck parking is a major issue for the trucking sector, the traveling public, and communities throughout New Jersey. Difficulties finding parking force trucks to park in undesignated locations, which poses a safety risk to other vehicles, pedestrians, cyclists, and the truck driver themselves. The limited availability of parking spaces also decreases the productivity of trucking by forcing drivers to take longer detours to reach an open space and end their work day earlier than desired.

In 2020, the American Transportation Research Institution (ATRI) identified truck parking as the top issue for commercial drivers. Increased enforcement of hours of service regulations has brought this issue to the forefront. Truck parking challenges are expected to grow as truck volumes continue to increase. Higher land prices, particularly in urban areas, make the construction of new truck parking capacity more challenging. In fact, in many communities around the country there exists pressure to redevelop truck parking facilities into other uses that are perceived as being more desirable. Much of this pressure stems from a lack of awareness of the role that truck parking facilities play in the safety and efficiency of supply chains that get products into consumers hands.

### Why invest in trucking?

Freight and the trucking industry are essential for quality of life, economic competitiveness, and job creation. Day-to-day activities depend on freight generators and trucking, such as going to the grocery store and receiving deliveries. Freight and trucks are also essential to other commercial and industrial activities that support jobs. In the last year and a half, the COVID-19 pandemic demonstrated the importance of supply chains and having access to basic goods and necessities. Disruptions in these supply chains, some of which persist until today, have led to significant public felt disruptions in many sectors. Investments that facilitate the flow of freight throughout our economy, such as improving the availability of parking, will contribute towards ensuring the reliability and safety of these supply chains.

The American Transportation Research Institution (ATRI) identified truck parking as the main issue for driver, ahead of compensation.

Drivers need the basic conveniences (clean bathrooms and safe parking areas) to ensure they are rested and ready to deliver the goods we all need in our daily lives.

84% of trucks park in undesignated locations at least once a week, 10% do so daily.

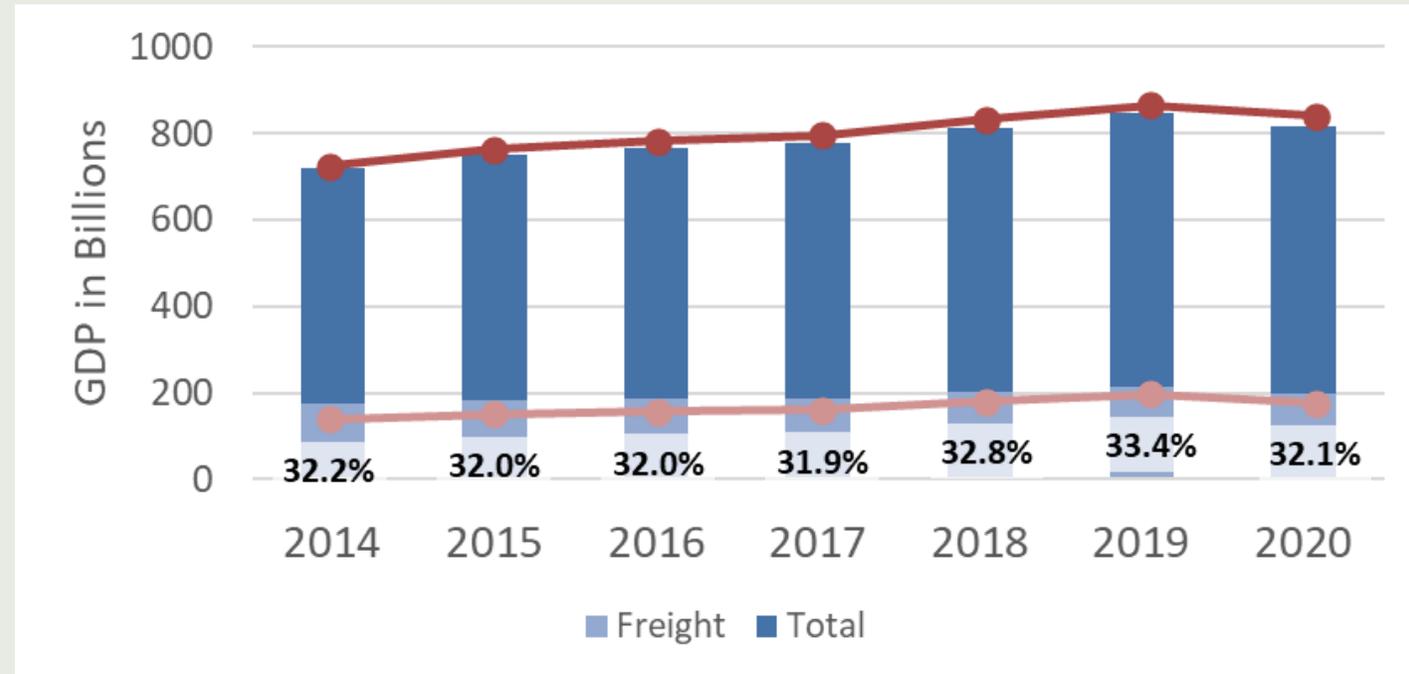

NJ DOT Transportation Operations Systems and Support (TOSS): Development of a pilot and demonstration project which is leveraging technology to track real-time parking capacity at the Harding Rest Area facility as well as provide historical information based upon time of day and day of week. The purpose is to improve safety and operations of the facility and to provide real time accessible parking information for commercial vehicle drivers.

Office of Freight Planning

# NJ Freight Industry GDP and Growth

- Freight Industry GDP accounts for about 32% of the total GDP in NJ
- Freight GDP growth has been increasing at the same rate as the total GDP

# NJ Freight Industry GDP and Growth

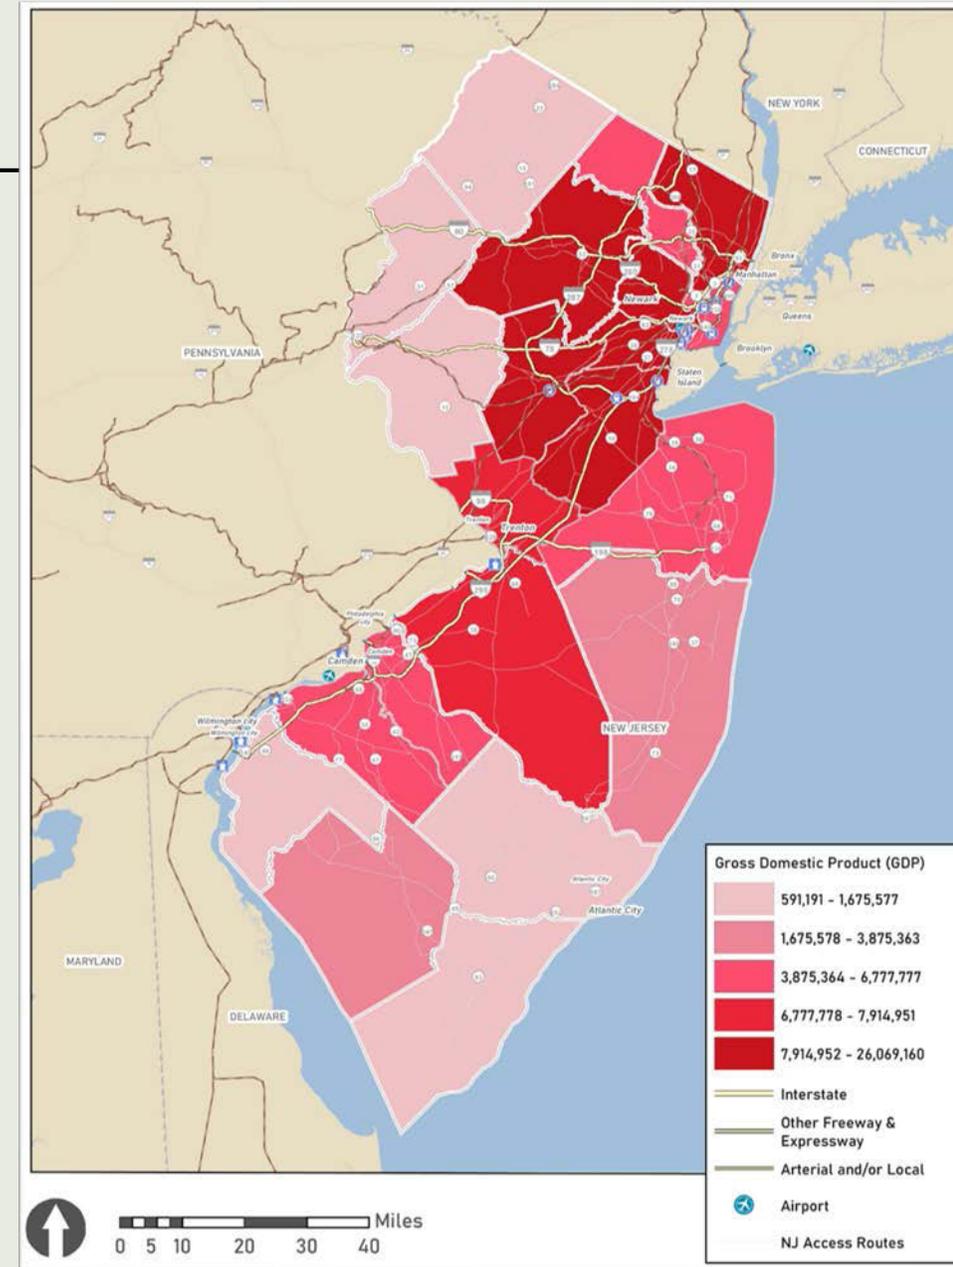

Industry	2015	2016	2017	2018	2019	2020	Growth (2015-2020)	Growth percentage (2015-2020)

  - Mid-Atlantic Barge (Balzano Marine Terminal)
  - New York Harbor Container and Trailer-on-Barge
  - Cape May – Lewes Ferry

- "Blue Highways" pilot program - NYCDOT & NYCEDC joint program to shift transport away from trucks and more toward waterways
  - Port Raritan
  - New Jersey Wind Port

# What is NPMRDS?

- National Performance Management Research Data Set (NPMRDS)
- Package of vehicle probe data on NHS across the U.S.
  - Archived travel time and speed at 5-minute intervals
  - Truck-specific data available
- Calculate daily and hourly values for
  - 10<sup>th</sup> percentile travel time (free flow)
  - Average travel time
  - 95<sup>th</sup> percentile travel time

**THE NATIONAL PERFORMANCE MANAGEMENT RESEARCH DATA SET (NPMRDS) AND APPLICATION FOR WORK ZONE PERFORMANCE MEASUREMENT**

The NPMRDS offers a free data source to State and Local transportation agencies for monitoring and reporting transportation system performance measures, as well as for setting and meeting mobility objectives and targets.

**Overview**

Transportation agencies are increasingly using probe vehicle data for transportation system performance management and as a resource for meeting the federal requirements of monitoring and reporting congestion and freight performance enacted in the Moving Ahead for Progress in the 21st Century Act (MAP-21). Federal regulations require setting objectives and targets to guide transportation funding allocation based on safety and operational performance measures.

To assist agencies with meeting the MAP-21 regulations, the Federal Highway Administration (FHWA) provides free access to the National Performance Management Research Data Set (NPMRDS), a national database of probe-vehicle-based speed and travel time data. The NPMRDS offers a new opportunity to monitor and report work zone performance measures. Using the NPMRDS, agencies can better benchmark the baseline mobility conditions prior to work zone activity, quantify and analyze work zone mobility impacts both during construction and post-construction, and implement mobility objectives and targets to proactively manage work zone mobility impacts.

**National Performance Management Research Data Set Overview**

The NPMRDS contains field-observed travel time and speed data collected anonymously from a fleet of probe vehicles (cars and trucks) equipped with mobile devices. Using time and location information from probe vehicles, the NPMRDS generates speed and travel time data aggregated in 5-minute, 15-minute, or 1-hour increments. The data are available across the National Highway System (NHS), with a spatial resolution defined by Traffic Message Channel (TMC) location codes. A TMC represents a unique, directional roadway segment that is about half a mile to a mile long in urban and suburban areas and could be as long as five to ten miles long in rural areas. The NPMRDS covers more than 400,000 TMCs and includes several billions of speed and travel time observations across the NHS for both freeways and arterials. The NPMRDS has been available since 2013, with freeway data dating back as far as 2008.

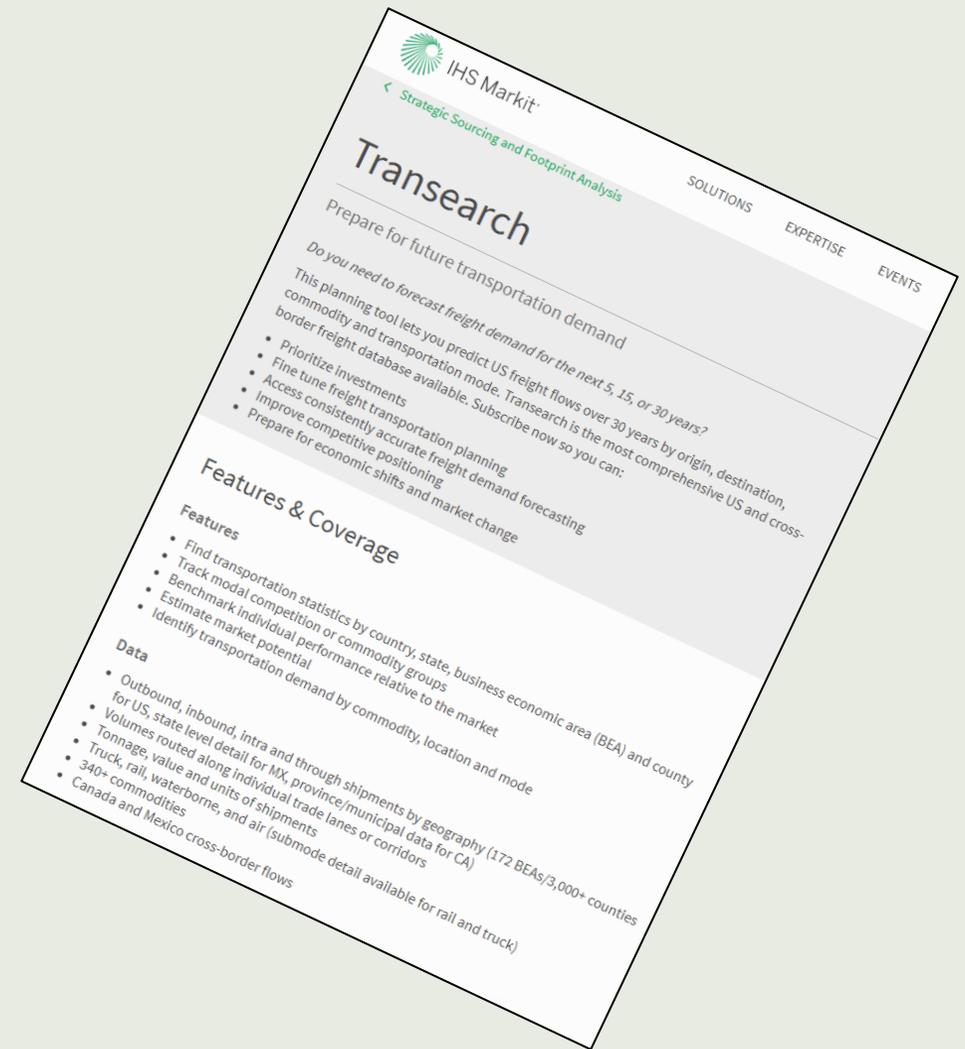

**The National Performance Management Research Data Set in a Nutshell**

**Data Providers:** INRIX, TomTom, HERE  
**Funded By:** FHWA  
**Purpose:** Support MAP-21 regulation and ongoing transportation system mobility performance measurement  
**Users:** Federal, State, and regional agencies  
**Data Source:** Probe vehicles  
**Metrics:** Speed, travel time, and static AADT (2017)  
**Data Latency:** One-month old  
**Lowest Temporal Resolution:** 5 minutes  
**Spatial Resolution:** TMC level (about 1/2 mile to 1 mile in urban/suburban areas and 5-10 miles in rural areas)  
**Geographical Coverage:** NHS  
**Modal Coverage:** Truck and passenger car segment details  
**Data Format:** CSV and ArcGIS shapefiles (road segment details)  
**Licensing Agreement:** Required

# What is Transearch?

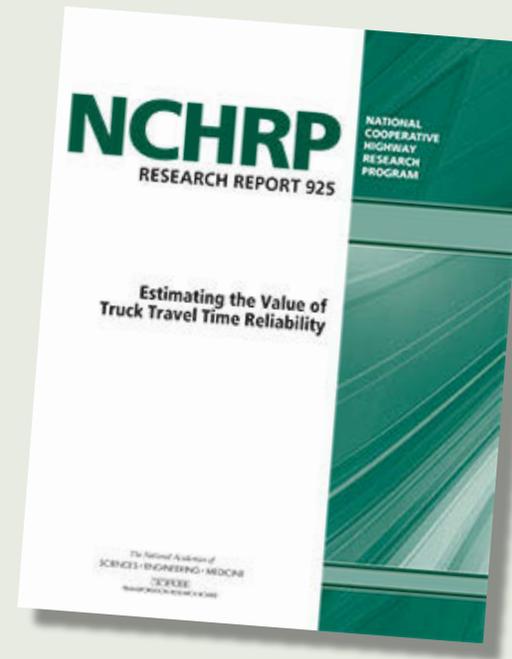

- Package of freight flow data and forecasts released by IHS Markit
- Accessed from NJDOT
- Commodity-level data (STCC2) with O/Ds and routing information
- ~4.5 million records in Transearch database (2018)
  - 2019 flows determined by interpolating between 2018 data and 2040 forecast
- Identify key freight corridors and flows associated with advanced manufacturing

# Truck Bottleneck Analysis

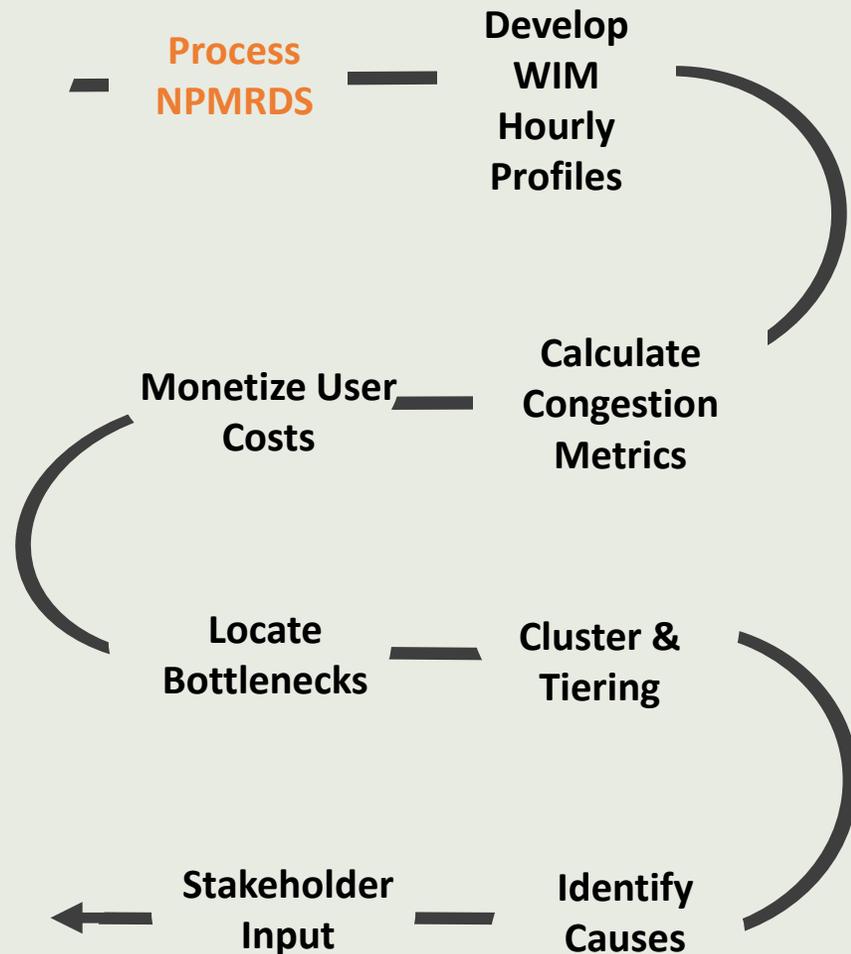

Approach we have implemented around North America for states, corridors, and cities

Bottlenecks need to be defined from the perspective of system users. What is the \$ cost to trucking companies and shippers?

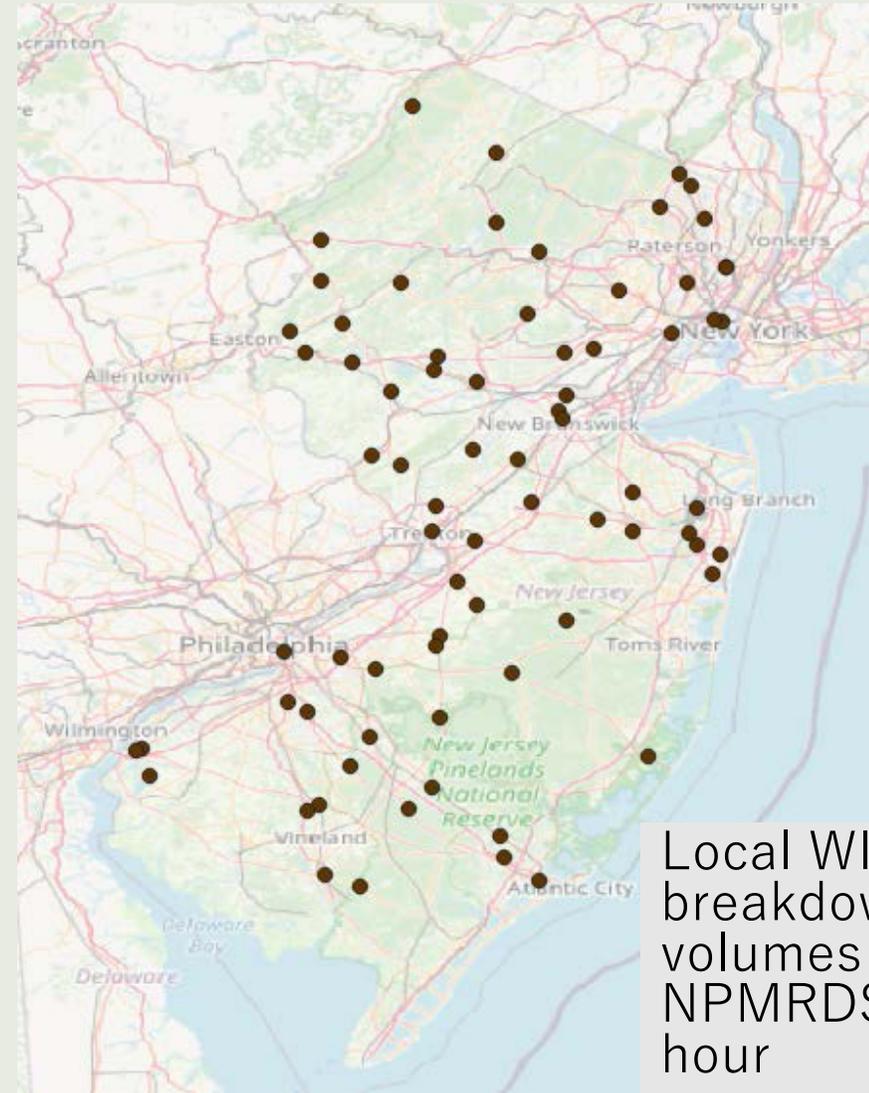

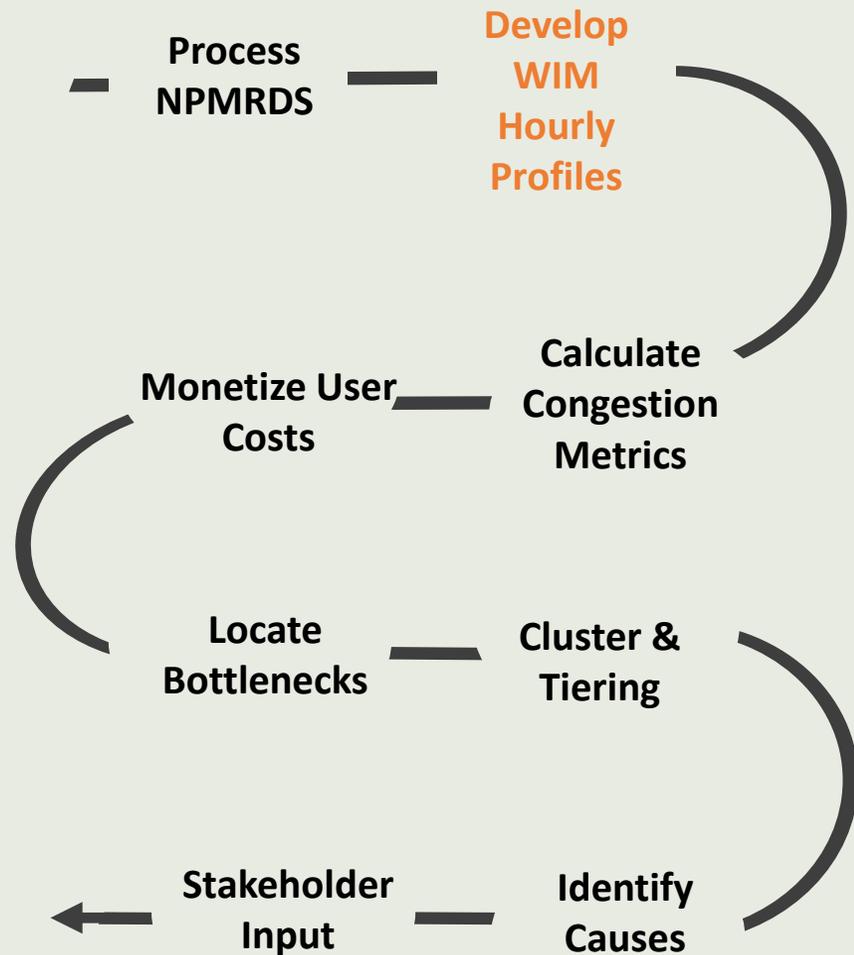

# Truck Bottleneck Analysis

---

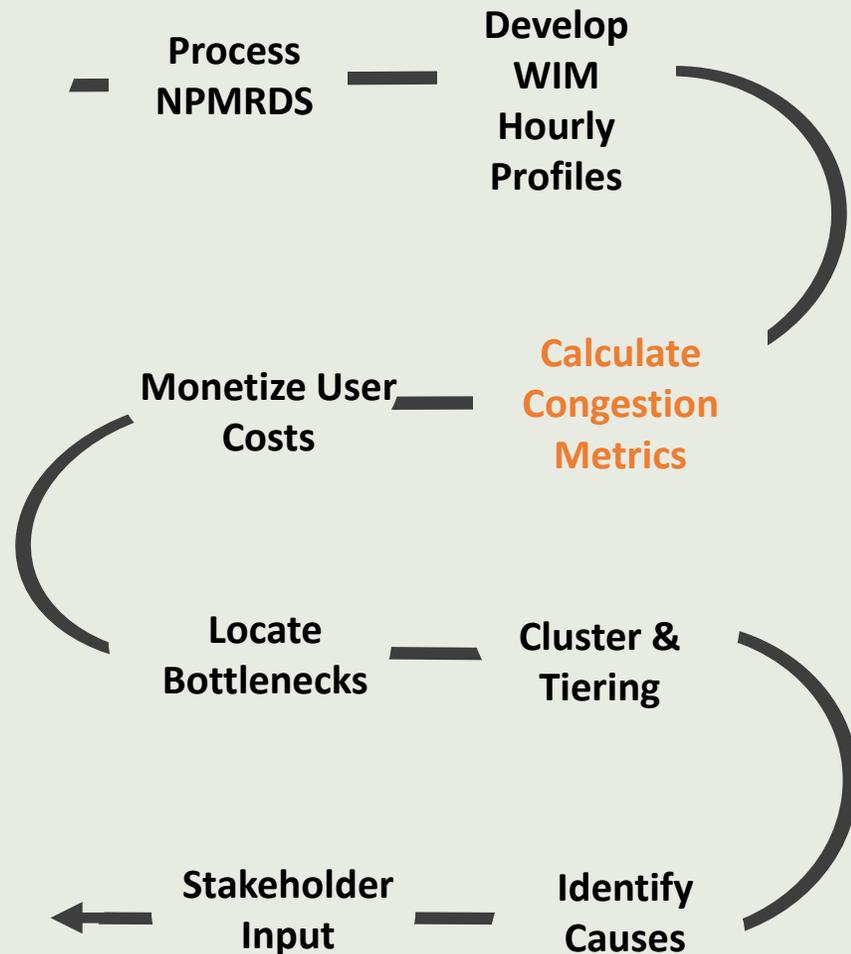

- Process NPMRDS travel time data
  - 144M records in New Jersey in 2021
  - 15 minute aggregation
- Calculate daily and hourly values for
  - 10<sup>th</sup> percentile travel time (free flow)
  - Average travel time
  - 95<sup>th</sup> percentile travel time
- Exclude weekends and holidays

# Truck Bottleneck Analysis

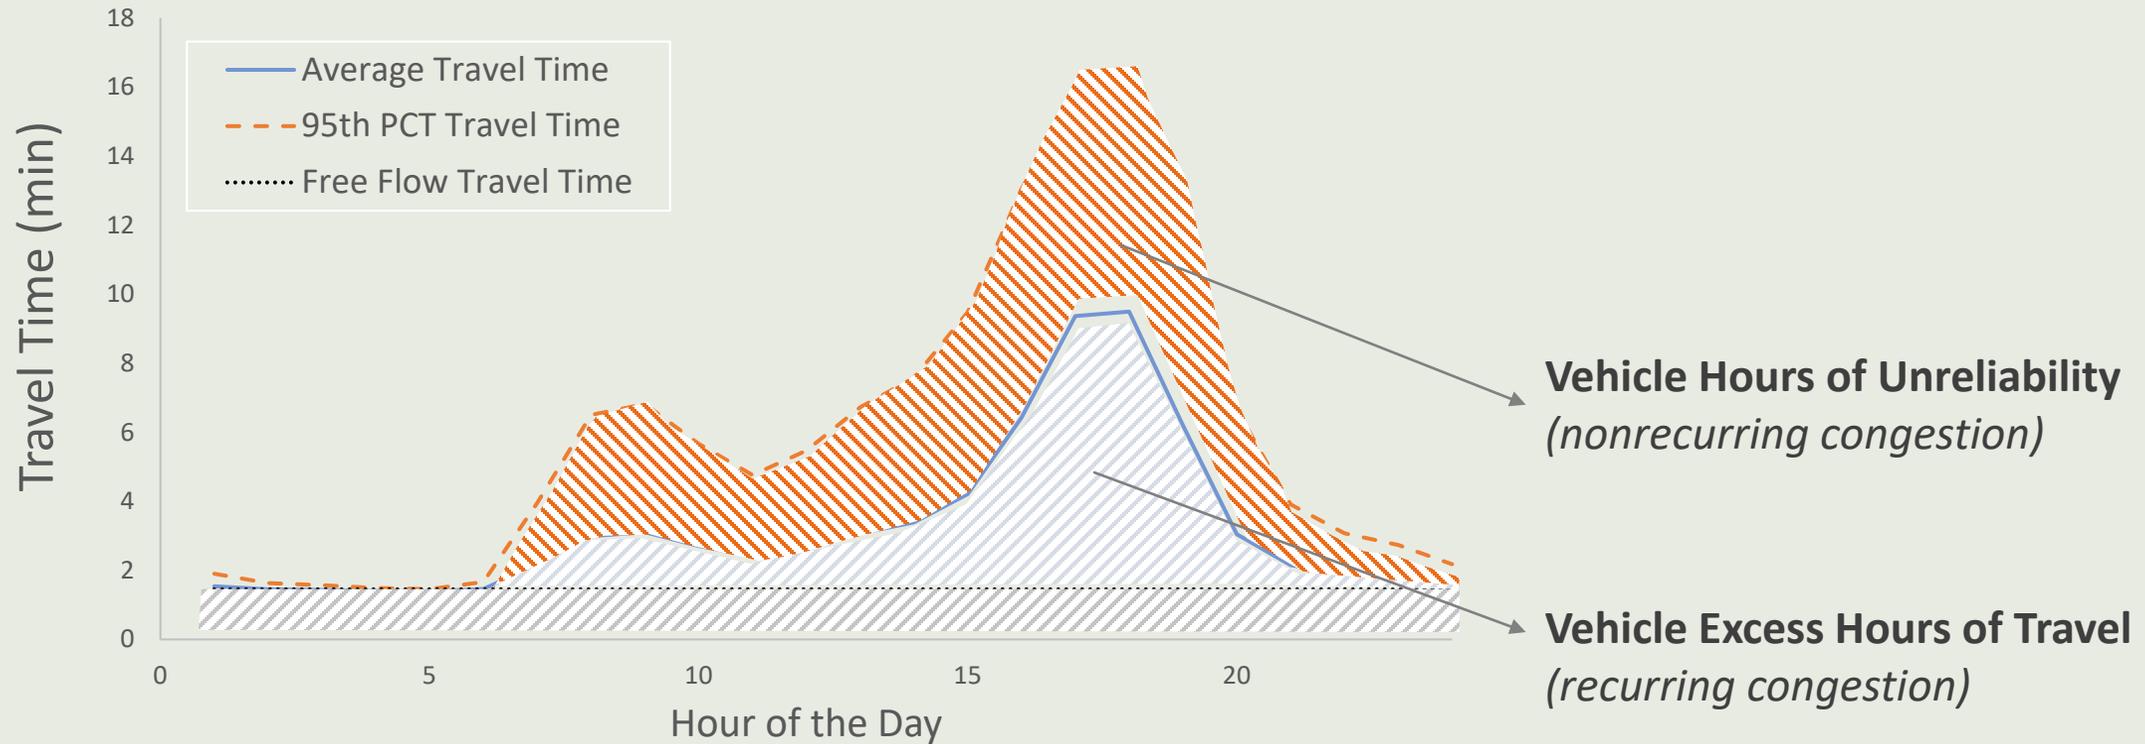

# Truck Bottleneck Analysis

- NCHRP 925 congestion metrics
  - Vehicle Excess Hours of Travel (recurring congestion)
  - Vehicle Hours of Unreliability (non-recurring congestion)

# Truck Bottleneck Analysis

# Truck Bottleneck Analysis

Values from NCHRP 925 to derive user costs of recurring and non-recurring congestion

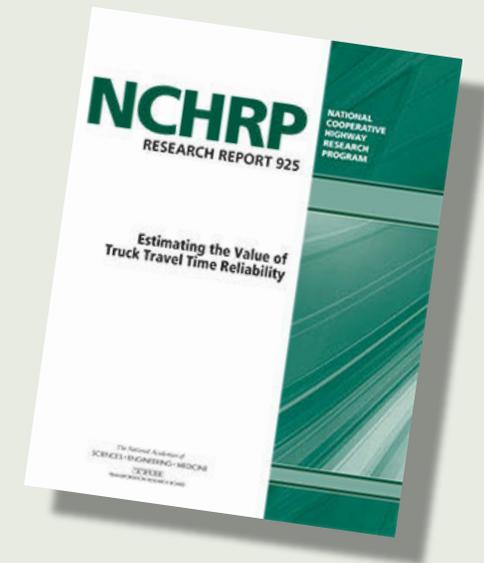

Derived from survey of shippers and industry supply chain managers and analytical modeling

Recurring congestion (Delay)

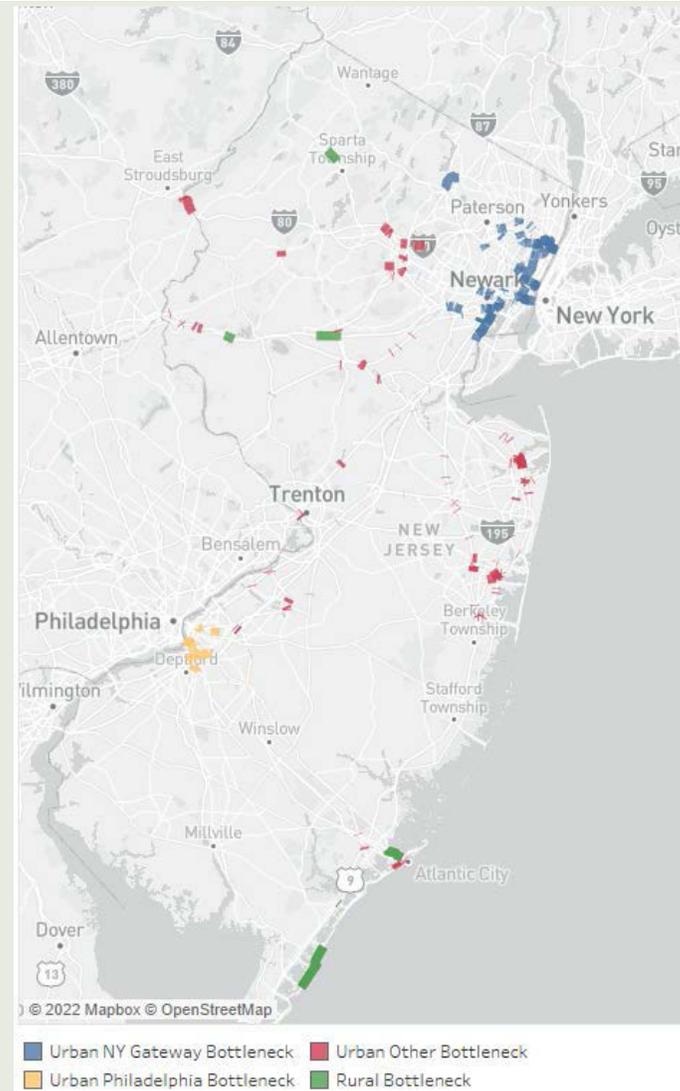

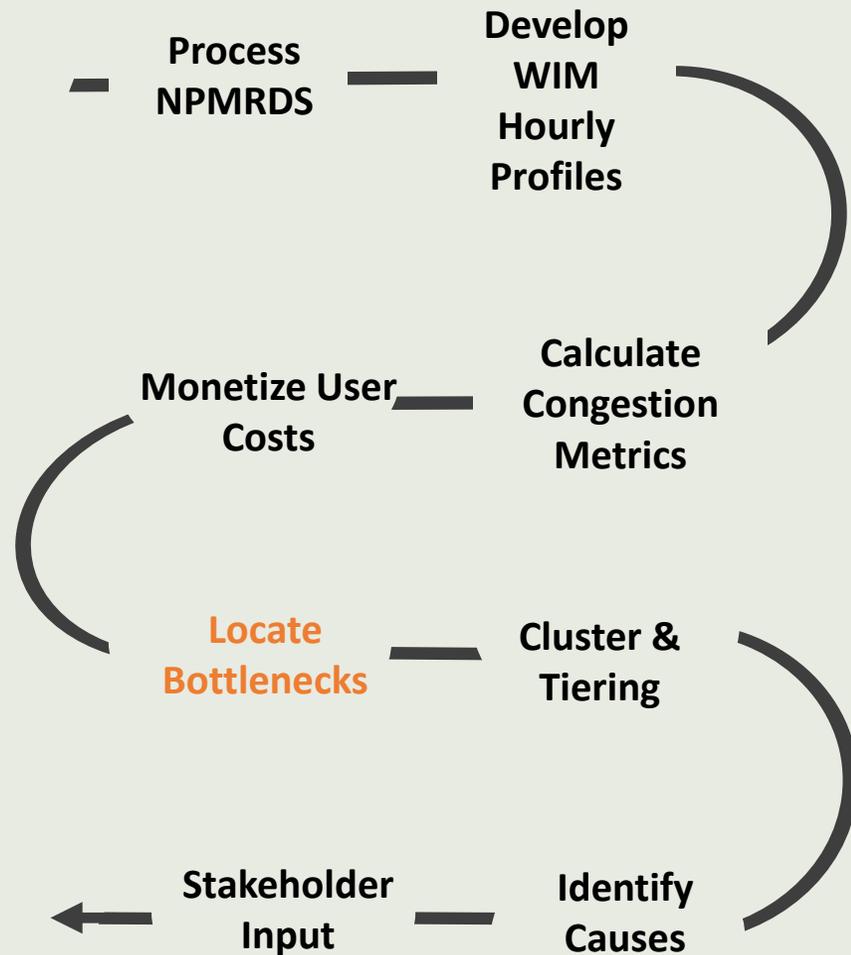

- \$66/hr

Non-recurring congestion (Unreliability)

- \$160/hr

# Truck Bottleneck Analysis

Highest 5% user costs/mile in:

- Urban NY-Gateway
- Urban Philadelphia
- Urban Other
- Rural

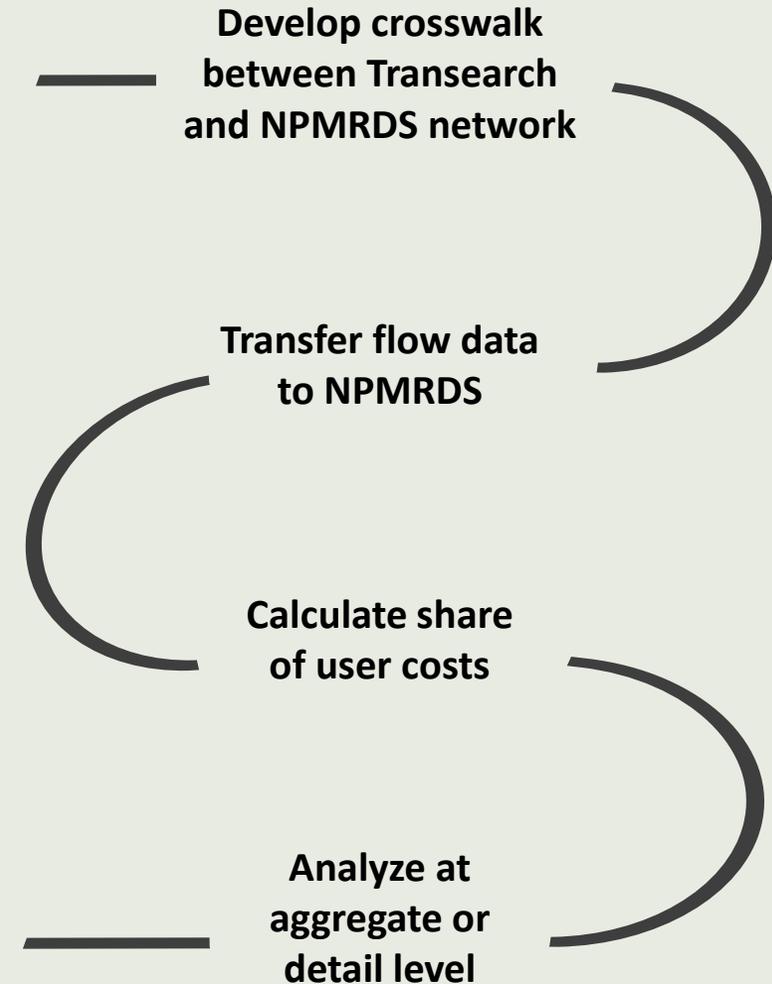

## Bottleneck Segments

Bottleneck Type	Length	# TMCs
Urban NY-Gateway	74	223
Urban Philadelphia	11	47
Urban Other	23	191
Rural	6	23
<b>Total</b>	<b>115</b>	<b>484</b>

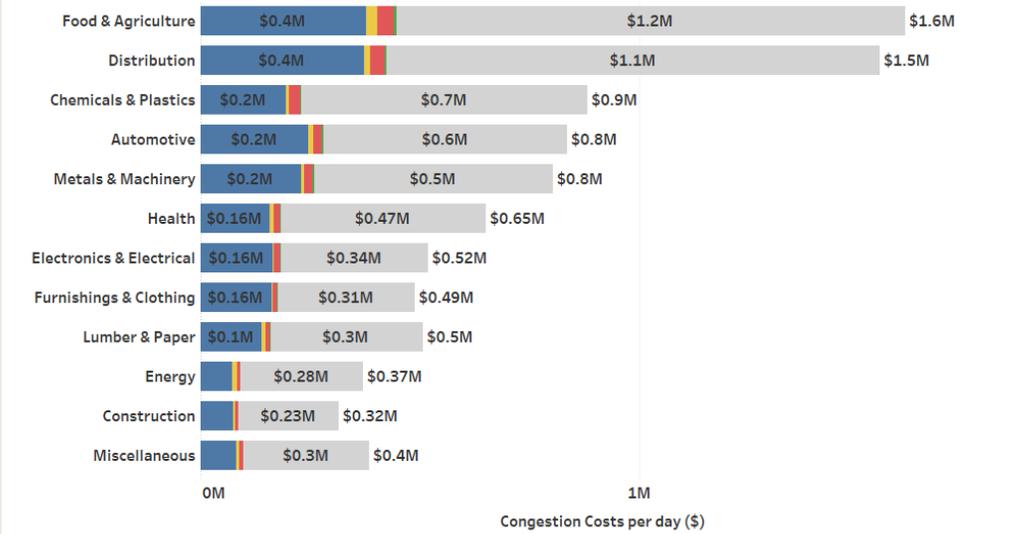

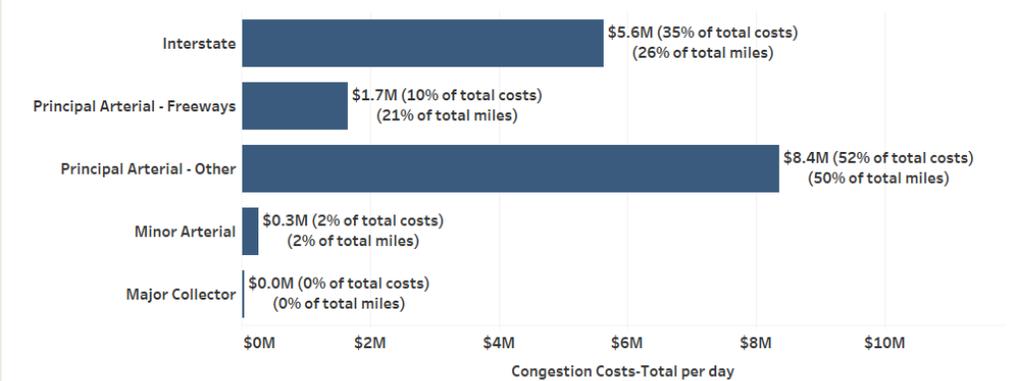

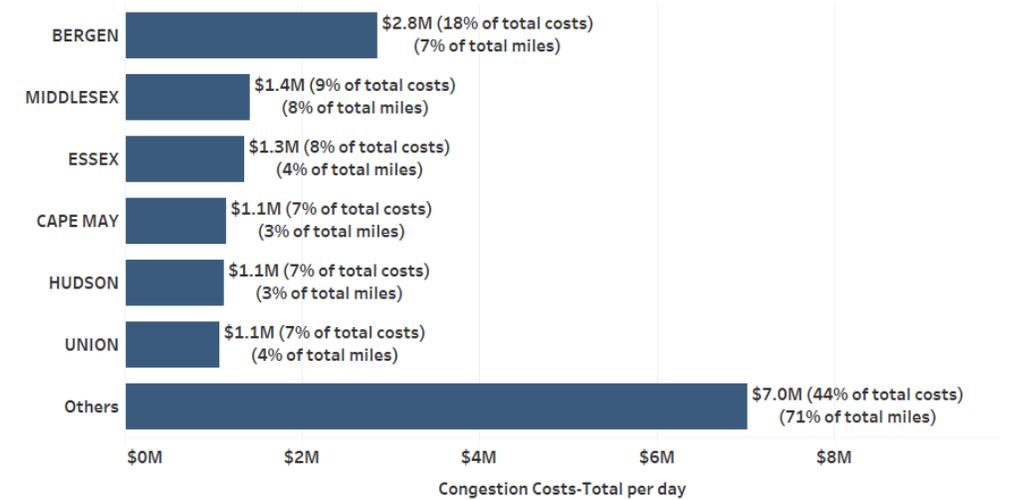

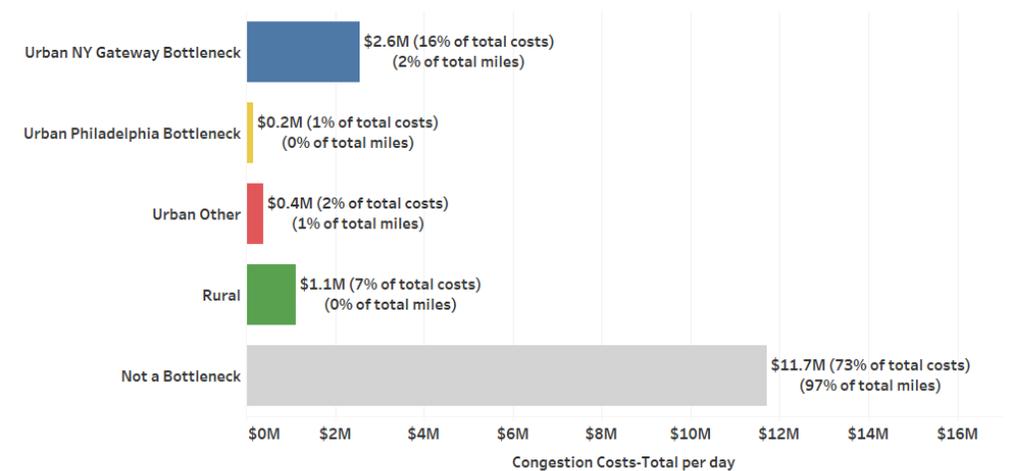

# Developing Commodity Bottlenecks analysis

---

- Conflate Transearch commodity flow data with NPMRDS probe-based congestion data
- Develop spatial crosswalk between two networks using GIS
  - Maintain directionality detail (NB/SB and EB/WB)
- Calculate contribution of individual commodities to freight traffic at each NPMRDS segment
- Calculate share of user congestion costs
- Ability to analyze overall network or top commodity bottlenecks

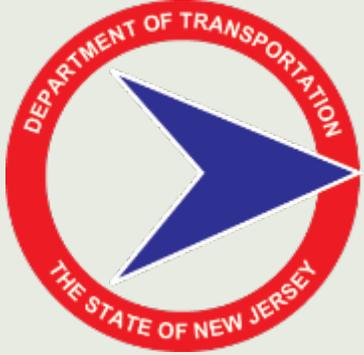

# Daily Congestion Costs

# Freight & Complete Streets

***Kristen Scudder***  
*Office of Freight & Aviation Planning*

April 20, 2022  
Delaware Valley Goods Movement Task Force

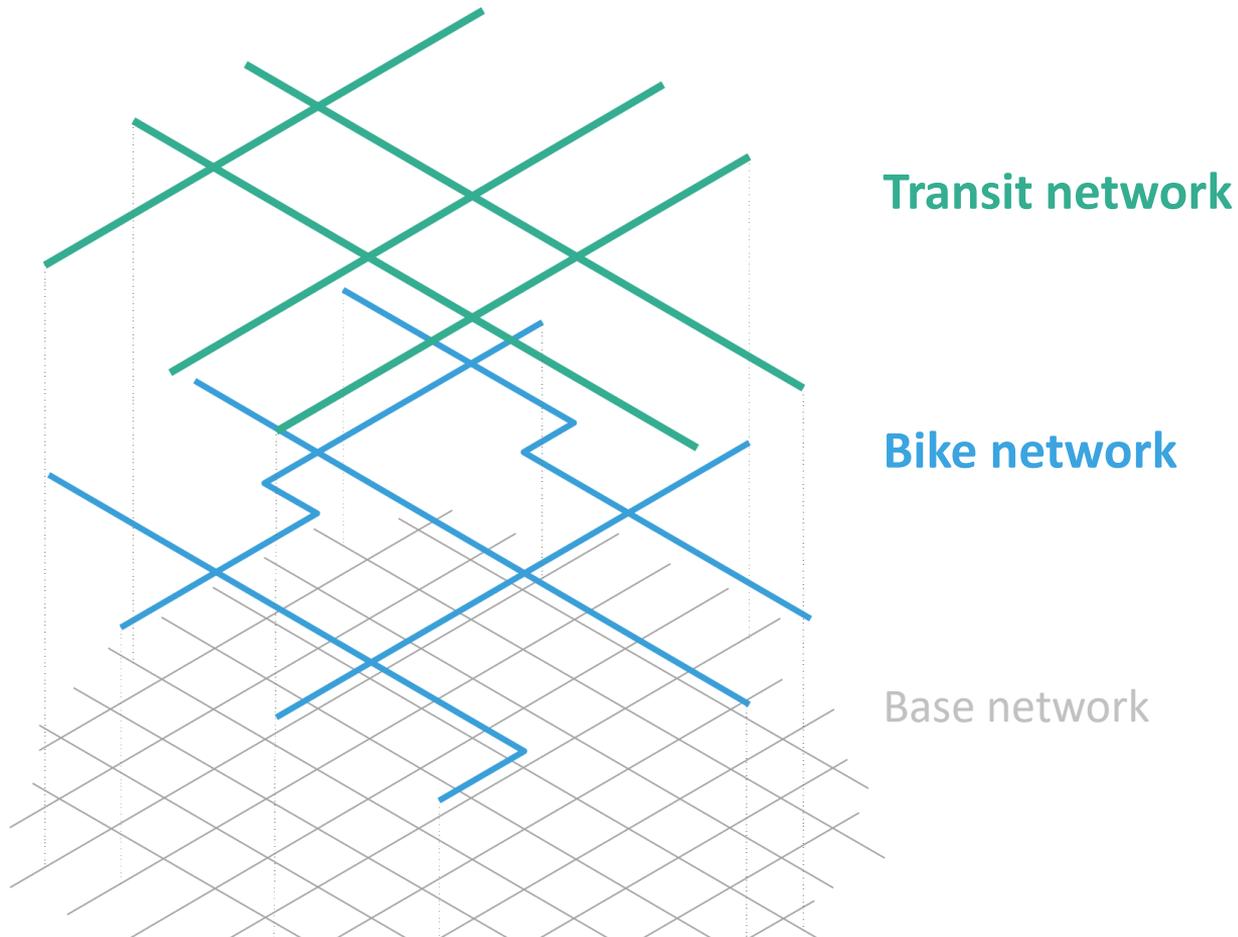

**Failure to incorporate freight considerations not only impacts the performance of the network for trucks but can have substantial safety and quality of life impacts for other users.**

# Where do we start?

# Defining a Truck Network

01

## Preliminary Screening

Understand key generators and connectivity.  
Preliminary network matched to existing classification system.

02

## Data Evaluation

Quantify route segment activity.  
Confirm route segment role/use.

03

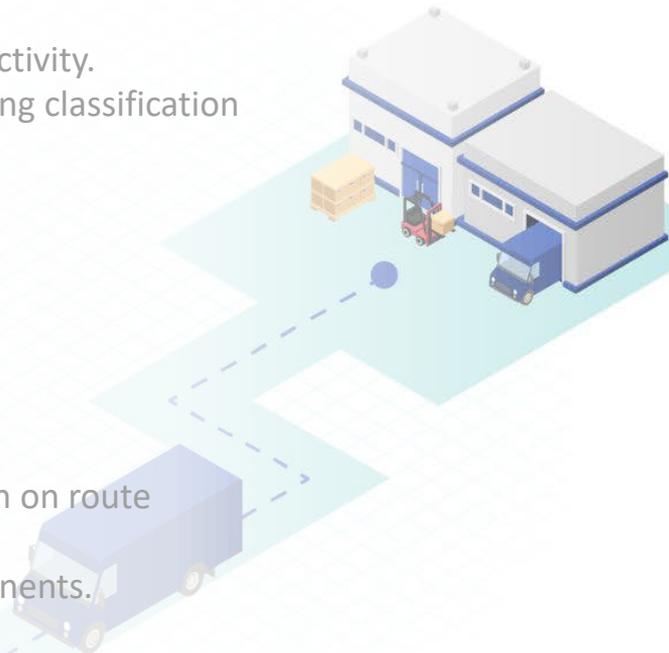

## Review & Adoption

Educate the public and promote buy-in on route designation.  
Formally adopt the truck route components.

04

## Application

Communicate new route designation to key stakeholders.  
Incorporate improvements/considerations for truck freight.

# Truck Route Network Components

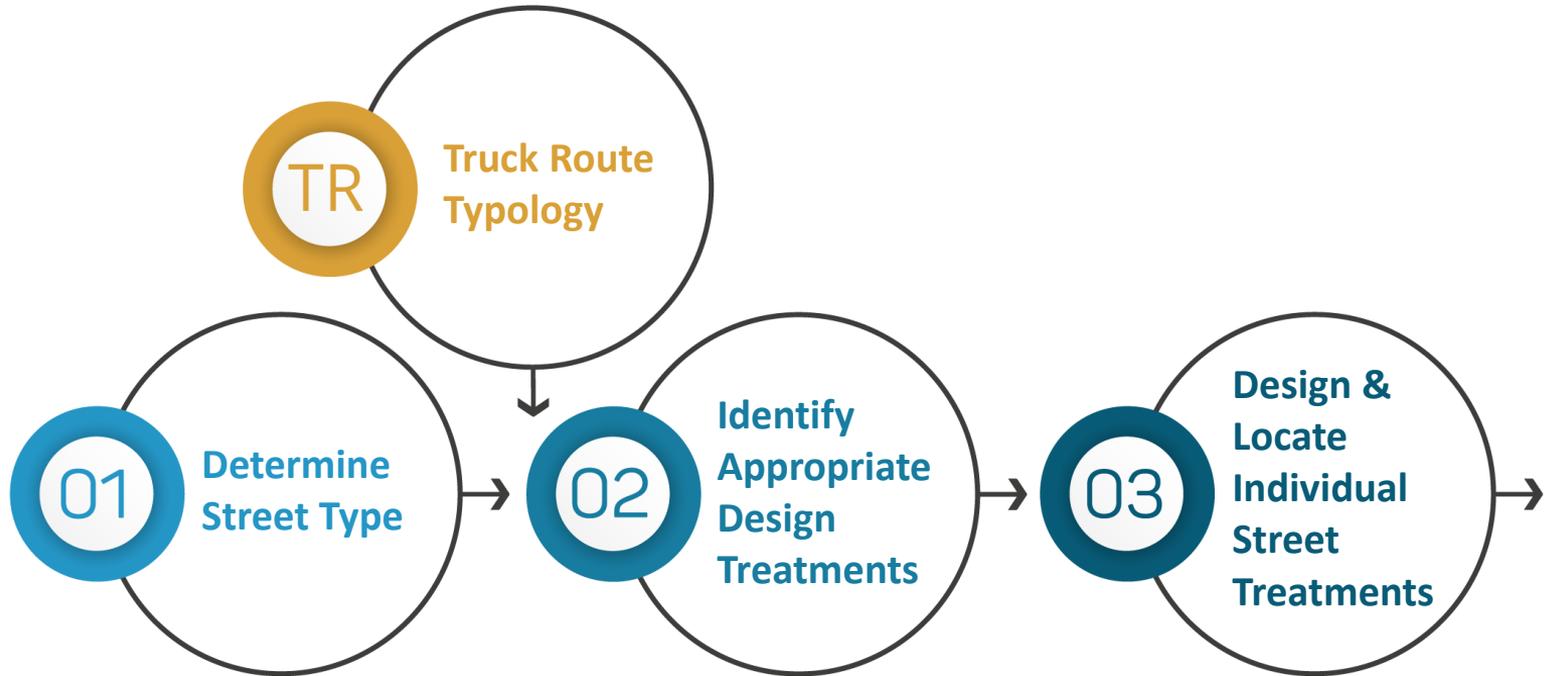

Truck Route Class	Freight Class Function
Regional Freight Corridors	Long Distance Trips
Primary Truck Route	Through Trips
Secondary Truck Route	To/From Trips
Last Mile Connector	Industrial Trips

**+ Restricted Facilities**

# Leveraging the CS Handbook Process

# Leveraging the CS Handbook Process

# Complete Streets Integration

Truck Route Class	Complete Streets Sub-class
Limited Access Highway	N/A
Primary Truck Route	Auto-Oriented Commercial/Industrial
	Urban Arterial
	Walkable Commercial Corridor
	Civic/ Ceremonial Street
Secondary Truck Route	Auto-Oriented Commercial/Industrial
	Urban Arterial
	Walkable Commercial Corridor
	High-Volume Pedestrian
	City Neighborhood Street
Last Mile Connector	Auto-Oriented Commercial/Industrial
	Urban Arterial

## Treatment Components

Details of the recommendations made in the matrix are provided below. These are formatted by component and treatment according to the following:

### Enhanced/Updated Component Title

#### Enhanced/Updated Treatment Title

The Philadelphia Complete Streets Design Handbook component number will be specified to provide reference to existing details. Updated treatments will include:

- Updated/additional considerations
- Specific design components (if appropriate)
- Additional resources

### New Component Title

#### New Treatment Title

New treatments will include details as included in the Philadelphia Complete Streets Design Handbook:

- Application
- Considerations
- Design
- Roles & Responsibilities
- Examples
- Resources

## 4.2 Building and Furnishing

### 4.4.2 Furnishing Zone Width

#### Updated/Additional Considerations

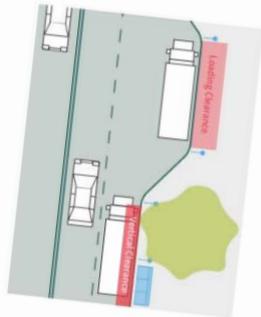

- Elements in the furnishing zone should allow sufficient clearance for mirrors on trucks and buses that are in the extreme right lane of a facility, especially if there is not a buffer between the travel lane and the curb. Examples but are not limited to signs and sign supports, trees, landscaping items, and power poles.
- Where commercial deliveries are expected or loading zones exist, a reasonable distance should be maintained between the parked commercial vehicle and elements of the furnishing zone. This horizontal clearance zone should be maintained along an expected pedestrian delivery path to allow typical dollies, hand carts, pallet jacks, and other equipment that an operator may use to move goods, to pass unimpeded.
- Roadway obstructions must allow clearance for the expected Control Vehicle to operate.

#### Specific Design Components

- Guidance on vertical clearance is found summarized in AASHTO's Geometric Design of Highways and Streets Table C.4.
- Guidance on horizontal clearance is found summarized in AASHTO's Geometric Design of Highways and Streets Table C.3.

- **Additional Resources**
- AASHTO Geometric Design of Highways and Streets
- FHWA Clear Zone and Horizontal Clearance Guidance
- NYSERDA Complete Streets Considerations for Freight and Emergency Vehicles

Vertical clearance should be considered where there is no buffer between the travel lane and the curb, and horizontal clearance should be considered at expected loading zones.

# Two-Minute Reports

The screenshot displays a Zoom meeting interface. The main content area shows a slide with a blue background featuring a repeating pattern of icons representing various modes of transport (trucks, cars, bicycles, etc.). The slide text reads: "THE DELAWARE VALLEY GOODS MOVEMENT TASK FORCE". At the bottom of the slide, the logo for "dvrpc DELAWARE VALLEY REGIONAL PLANNING COMMISSION" is visible, along with the date "January 13, 2021" and "Zoom Webinar".

At the top of the meeting window, there is a "Recording" indicator and an "Enter Full Screen" button. The bottom toolbar includes "Mute", "Start Video", "Share Screen", "More", and "Leave" buttons.

On the right side, the "Participants (2)" list shows two participants: "KS Kristen Scudder (Me)" and "MR Michael Ruane (Host)". The "Raise Hand" button is highlighted with a red box. Below the "Raise Hand" button, there are options for "yes", "no", "go slower", "go faster", and "more". The "Invite" and "Mute Me" buttons are also visible at the bottom of the participants list.

# 2022 DVGMTF Meeting Dates

- Wednesday, July 20
- Wednesday, October 19
