Community Health Improvement Plan

BACKGROUND
The Journey

Jun 2011: First key leaders meeting

Nov 2012: Assessments completed
Dec 2012: Strategic Issues Identified

Feb 2013: Assessment Findings Community Presentation

May 2013: Strategic Issue Teams began meeting
Jun 2013: Advisory Council began meeting

Oct 2013: Assessment Report complete

Dec 2014: CHIP complete
Dec 2014: Community CHIP Presentation

2015: Repeat assessment

RoadMAP to Health Chester County
The Goal

To better serve the people of Chester County by collaborating with organizations that take action, make an impact, and work to improve health and quality of life throughout the county.
The Vision

To become a community where partners assure conditions in which individuals can be healthy and individuals are empowered to manage their own health
The Assessments

- Forces of Change Assessment
- Community Themes and Strengths Assessment
- Community Health Status Assessment
- Local Public Health System Assessment
The Findings

RoadMAPP to Health
Chester County

Community Health Assessment
Summary Report

July 2013
The Priorities

1. Cultural Competence and Health Disparities
2. Behavioral and Physical Health Coordination
3. Awareness of Community Resources
4. Individual Health Management and Disease Prevention
5. Safe and Healthy Environments
Community Health Improvement Plan

THE PLAN
The Framework

- Action-oriented
- Provides framework, but is not prescriptive
- Supports partnership building
- Working towards common goals
- Collective impact
Community Health Improvement Plan

PRIORIT 1: CULTURAL COMPETENCE AND HEALTH DISPARITIES

Paul Huberty, The Chester County Hospital
Joseph Younge, MLK Community Development Corporation
Cultural Competence & Health Disparities

Goal 1.1:
Provide effective, equitable, understandable, and respectful quality care and services that are responsive to diverse cultural health beliefs and practices, preferred languages, health literacy, and other communication needs

Objective 1.1.1
Advance positive health equity and outcomes in the Chester County community by raising the awareness and meaning of cultural competency

Objective 1.1.2
Advance positive health equity and outcomes in the Chester County community by adopting a set of actionable recommendations to build the ability to interact within health institutions, networks, and systems of care
Cultural Competence & Health Disparities

Goal 1.2:
Reduce health disparities within Chester County

Objective 1.2.1
Reduce birth disparities by increasing access to early and adequate prenatal care to women living in Chester County
Community Health Improvement Plan

PRIORITY 2: BEHAVIORAL AND PHYSICAL HEALTH COORDINATION

Donna Carlson, Chester County Department of Human Services
Dr. Kimberly Stone, Chester County Health Department
Behavioral & Physical Health Coordination

Goal 2.1:
Improve behavioral and physical health through a well coordinated network of services that enables providers to adequately identify and address both behavioral and physical health issues

Objective 2.1.1
Identify actionable recommendations that advance the coordination of services addressing individuals’ physical and behavioral health needs
Community Health Improvement Plan

PRIORIT 3: AWARENESS OF COMMUNITY RESOURCES

Barbara Mancill, United Way of Chester County
Kathy Brauner, Chester County Department of Human Services
Awareness of Community Resources

Goal 3.1:
Increase awareness of and education about available health and social services among residents throughout Chester County

Objective 3.1.1
Expand provider participation in existing information and referral resources in Chester County

Objective 3.1.2
Increase efforts to effectively promote available health and social services throughout Chester County
Community Health Improvement Plan

PRIORITY 4: INDIVIDUAL HEALTH MANAGEMENT AND PREVENTION

JOAN HOLLIDAY, ACTIVATE CHESTER COUNTY RESOURCE TEAM
BARBARA MANCILL, UNITED WAY OF CHESTER COUNTY
Individual Health Management & Prevention

Goal 4.1:
Strengthen the capacity for local ACTIVATE Chester County initiatives to initiate and sustain promising practices that encourage and support moving more, eating smart and creating supportive environments.

Objective 4.1.1
Increase opportunities for local ACTIVATE Chester County initiatives to seek and receive support for educating, mobilizing, and sustaining communities toward individual health management.
Community Health Improvement Plan

PRIORITY 5: SAFE AND HEALTHY ENVIRONMENTS

JEANNE CASNER, CHESTER COUNTY HEALTH DEPARTMENT
Key Question

• What is the role of non-health organizations in advancing the health of our community?
National Importance

• Urban Land Institute’s *Building Healthy Places* Initiative
  – Shaping projects and places in ways that improve the physical, mental, and social well-being of people and communities
National Importance

• Centers for Disease Control and Prevention’s Department of Physical Activity, Obesity and Nutrition
  – National survey of community-based policy and environmental supports for healthy eating and active living
National Importance

• Department of Health and Human Services’ National Prevention Strategy’s Strategic Directions
  – Healthy and Safe Community Environments
  – Clinical and Community Preventive Services
  – Empowered People
  – Elimination of Health Disparities
Local Importance

- Chester County Strategic Business Plan
  - Healthiest County
  - Promote physical health
Safe and Healthy Environments

Partners

- Department of Community Development
- Department of Emergency Services
- Department of Parks
- Planning Commission
- Water Resources Authority
# Safe & Healthy Environment

## Goal 5.1:
Strengthen environmental supports that promote health and safety

<table>
<thead>
<tr>
<th>Objective 5.1.1</th>
<th>Objective 5.1.2</th>
</tr>
</thead>
<tbody>
<tr>
<td>Provide a broad range of services that address the housing and workforce needs of Chester County residents</td>
<td>Enhance existing infrastructure that supports healthier and safer communities</td>
</tr>
</tbody>
</table>
Take Aways

• All of us have a responsibility to make the healthy choice the easy choice

• Supportive environments empower people to make healthy choices

• Engaging health experts allows community leaders to explore how they can help create supportive social and environmental conditions that impact overall health

• Success will depend highly on how communities are planned, designed, and built as much as on changes in individual behavior
RoadMAPP to Health Vision:
To become a community where partners assure conditions in which individuals can be healthy and where individuals are empowered to manage their own health.

Community Health Needs Assessment and Implementation

Rickie Brawer, PhD, MPH, MCHES
Jefferson University and Hospitals
Center for Urban Health

DVRPC Healthy Communities Task Force
February 11, 2015
Health Systems and Community Health Improvement - Real and Potential Synergies

• Participants in this session will be able to:
  – Understand the significance of the Patient Protection and Affordable Care Act and requirements to assess and evaluate community health needs
  – Integrate opportunities to partner with health systems to improve the health of communities
The Affordable Care Act (ACA)

Two broad areas of policy change:

1. Insurance or payer reform
2. System or delivery reform
ACA: Greater Focus on Prevention and Public Health

• Prevention and Public Health Fund (PPHF)
• Community Transformation Grants
• Accountable Care Organizations (ACO)
• Patient-Centered Medical Homes (PCMH).
• Patient-Centered Outcomes Research Institute (PCORI) established to specifically address the mandates for improvement of quality and efficiency

2. Individual lifestyle factors
3. Social and community influences
4. Living and working conditions
5. General socioeconomic, cultural and environmental conditions
CDC Health Impact Pyramid

Factors that Affect Health

Examples
- Eat healthy, be physically active
- Rx for high blood pressure, high cholesterol, diabetes
- Immunizations, brief intervention, cessation treatment, colonoscopy
- Fluoridation, trans fat, smoke-free laws, tobacco tax
- Poverty, education, housing, inequality

Check the Tarrant County Public Health Web site to learn more.
http://health.tarrantcounty.com
Determinants of health and their contribution to premature death

- Genetic Predisposition: 30%
- Social Circumstances: 15%
- Behavioral Patterns: 40%
- Health Care: 10%
- Environmental Factors: 5%

PDPH May 2014 CHNA
Adapted from: McGinnis et al. 2002
Barriers to Health

(Fragmented, Inequitable Healthcare System)

Limited access to services
- primary care
- behavioral health
- physical therapy
- health information

Limited outdoor space

Inadequate Housing, Schools

Neighborhood Violence

Limited access to fresh food

Stress
- psychological
- environmental
- economic

Health behaviors
- Dietary choices
- Physical activity

Poverty

Racial segregation

Inadequate Housing, Schools

Neighborhood Violence

Limited access to fresh food

Stress
- Psychological
- Environmental
- Economic

Health behaviors
- Dietary choices
- Physical activity

Poor Neighborhood Health

(Schulz, Kannon 2005; Schulz, Zenk 2005)
Healthy People 2020 organizes the social determinants of health around five key domains:

**Economic Stability** – Poverty, Employment, Food Security, Housing Stability

**Education** - High School Graduation, Enrollment in Higher Education, Language and Literacy, Early Childhood Education and Development

**Health and Health Care** - Access to Health Care, Access to Primary Care, Health Literacy

**Neighborhood and Built Environment** - Access to Healthy Foods, Quality of Housing, Crime and Violence, Environmental Conditions

**Social and Community Context** - Social Cohesion, Civic Participation, Perceptions of Discrimination and Equity, Incarceration/Institutionalization
**Current State: Similar but Nonaligned Community Health Improvement Frameworks**

**Public Health Accreditation, HRSA 330 Grants, United Way, & Other Community Assessments**

- Community Health Assessment Tools (MAPP, Community Tool Box, etc.)
- Philanthropy, Federal/State grant making (CDC/CTGs, HUD, etc.)

**CDs/FQHCs/Community Agencies**

- Community Health Assessment → Community Health Improvement Plan → Community Investments → Improved Community Health Outcomes?

**Hospitals**

- CHNA + Implementation Strategy → “Plan” → Hospital Community Benefit Projects → Improved Community Health Outcomes?

**IRS Hospital Community Benefit Compliance, State & Local Activities**

- 501(r) Requirements, Form 990 Schedule H
- 26 USC 501(c)(3), IRS Ruling 69-545, and Form 990 Schedule H

*Additional notes: Catholic Health Assoc. Guide ACHI (AHA) Toolkit Private Vendors*
Desired State: A Unified Community Health Improvement Framework Supporting Multiple Stakeholders

TRANSPARENCY

Data and Analytic Decision Support

Community Engagement and Assuring Shared Ownership

- Arranging Assessments that Span Jurisdictions
- Using Small Area Analysis to Identify Communities with Health Disparities
- Collecting and Using Information on Social Determinants of Health
- Collecting Information on Community Assets
- Using Explicit Criteria and Processes to Set Priorities (use of evidence to guide decision-making)
- Assuring Shared Investment and Commitments of Diverse Stakeholders
- Collaborating Across Sectors to Implement Comprehensive Strategies
- Participatory Monitoring and Evaluation of Community Health Improvement Efforts

Key Issues to Address to Promote Alignment between Accreditation, NP, Hospital CB, and Other Community-Oriented Processes

REPORTS

$ 501(c)(3) Requirements, Form 990 Schedule H
Public Health Accreditation
Community Benefit
26 USC § 501(c)(3), IRS Ruling 69-545, Form 990, Schedule H
New Federal Mandate

Patient Protection and Affordable Care Act of 2010, Section 9007 contains requirements that non-profit hospitals must meet to maintain its 501(c)3 charitable organization status.

- Completion of a community health needs assessment (CHNA) every three years by an individual with special knowledge or expertise in public health.
- Development of community benefit implementation plan that addresses identified needs.
- Formal adoption of the community benefit strategic and implementation plan by the hospital’s governing body.
- Publication of the CHNA findings and community benefit plan so that it is widely available to the public.
- Demonstration of effectiveness of community benefit efforts.
What is Community Benefit?

• Community benefits should meet an identified community need and meet at least one of the following community benefit objectives:
  – Improve access to healthcare
  – Improve community health
  – Advance knowledge through education or research
  – Relieve a government burden

• Community Benefits include providing:
  – free or low-cost medical care (charity care)
  – care to low-income Medicaid beneficiaries
  – services designed to improve community health and access to care
IRS Update: CHNA

IRS changes allow multiple hospital facilities to complete one CHNA, and one implementation plan, for a community

- Each hospital collaborating must be clearly identified, and the CHNA must be adopted by an authorized body for each collaborating hospital. Although hospital organizations can collaborate when conducting CHNAs and developing implementation strategies, each facility must have a separately documented CHNA and implementation strategy.

- Collaboration can lead to funding opportunities

- Collaboration can lead to opportunity to leverage partnership assets and reduce duplicative efforts
HHS Region III and Hospital Association of Pennsylvania Leadership

HHS Region III:

- Has convened stakeholder group (hospitals, HAP/DVHC of HAP, county health departments, community organizations) around CHNA
- Is facilitating collaboration with Federal agencies (CDC, HRSA, CMS) to identify CHNA support resources and potential funding sources
- Is working with HAP to pursue partnerships with other Mid-Atlantic institutions
- Provides opportunity for **Accountable Health Communities** using a collective impact model to prioritize and align initiatives, increase scale and effectiveness through pooled resources, develop shared measurement and accountability
Components of the Written CHNA

• Description of the community served by the hospital and how it was determined.
• Description of the process and methods used to conduct the assessment, including a description of the sources and dates of the data and other information used in the assessment and the analytical methods applied to identify community health needs.
• Description of how the hospital took into account input from persons who represent the broad interests of the community.
• A prioritized description of all of the community health needs identified through the CHNA, including a description of the process and criteria used in prioritizing such needs.
• A description of the existing health care facilities and other resources within the community available to meet the community health needs.
How is Community Defined?

- By geographic location (city, county, metropolitan region)
- By target populations served (e.g., children, women, aged)
- By a hospital’s principal function (e.g., specialty area or disease)
- May not be defined in a way that excludes certain populations served by the hospital (for example, low-income persons, and minority groups)
The Implementation Strategy

• Includes a written plan that prioritizes and addresses each of the community health needs identified through the hospital CHNA process

• The plan must include:
  – How the hospital plans to meet the health need, or
  – Why the hospital does not intend to meet an identified health need
  – A description of the programs and resources the hospital intends to commit

• Must be adopted by the hospital’s governing body
Other Provisions:
IRS Notice 2011-52
IRS Form 990 Schedule H

Hospital must report on its IRS Form 990, a description of the following:

- how the organization is addressing the needs identified in its CHNA
- any needs not being addressed together with the reasons why they are not being addressed.
- How and where CHNA and Implementation Plan are being made publically available
- Failure to comply will result in a $50,000 excise tax penalty that will be applied to each hospital facility in the organization that fails to satisfy the requirements.
Community Benefit At Jefferson

TJUH

Methodist

Jefferson Hospital of Neurosciences
The mission of the Center for Urban Health is to marshal the resources of the Department of Family and Community Medicine (DFCM), Thomas Jefferson University (TJU) and Jefferson University Hospitals (JUH) to strengthen the capacity of diverse urban individuals, families, organizations and communities to address issues that improve health.
CHNA Advisory Leadership

- Interprofessional Internal Leadership Hospital and University
- External Leaders (United Way, Achievability, KPMG and Vanguard)
Community Benefit Principles

- Reduce health disparities.
- Build on Jefferson strengths and resources
- Involve two or more of our mission elements: patient care, education & research
- Embrace community engagement and partnerships
- **Sustainability**, economically and programmatically, over time
Additional factors in determining a neighborhood focus to maximize effectiveness:

- Are geographically proximate to both TJUH and Methodist.
- Have a density of high-risk patients who demonstrate poor health indicators (health disparities)
- Have a poverty rate >20%
- Have assets and resources that are not harnessed synergistically
- Have individuals and organizations with developed historical relationships with Jefferson staff or have the potential for partnering to address specific health and social issues
Jefferson Community Benefit Area

Nearly 354,000 people 23% of all Philadelphia residents.
Assessment Methods

Secondary Data and Literature Review

• Healthy People 2020
• Reports from PDPH, MCC, PCA, Pew State of the City, Philadelphia School District, and others
• Public Health Management Corporation- Household Health Survey (2008 -2012)
• Census 2010 data with updates from Claritas
• County Health Rankings and Roadmap 2013
• Pennsylvania Department of Health State and other local data
• Community Preventive Services Taskforce Guidelines
Assessment Methods

Primary Data

• Key Informant Interviews
  – More than 65 internal and external interviews were conducted with individuals representing health care and community based organizations that have knowledge of the health and underlying social conditions that affect health of the people in their neighborhood and broader community.
  – Includes TJU and TJUHs faculty and staff

• Focus Groups with employees who live in TJUHs CB area
  – 4 focus groups were held; 35 employees participated
Assessment Content Areas

- Demographics
- Mortality
- Morbidity
- Health Behaviors
- Healthcare access
  - Health insurance
  - Transportation
  - Literacy
  - Culture and language

- Social Determinants of Health
  - Education
  - Income and poverty

  - Employment and job training
  - Community safety
  - Built and natural environment

- Special Populations
  - Older Adults
  - Immigrants and Refugees
  - Homeless
  - LGBT
“We talk about diabetes, heart disease, obesity, but what we need to do is invest in the social determinants of health in order for people to get access and resolve poverty, housing issues, etc.” (CBO)

“High unemployment rates and individuals with poor literacy skills need jobs that pay a living wage. Health is major reason why people lose their job within the first year or return to prison.” (CBO representative).

“We know that income and education are root causes of poor health outcomes. Right now, access to food and physical activity are the major focus, but these have environmental underpinnings related to low income/poverty, poor access, crime, policy shifts in agriculture, school physical activity, school food etc. We blame the person (lack of personal responsibility) rather than the policy or system or environment.” (CBO)
“There is not a senior center in the community and there is no place for older adults to go to be physically active. They need a senior center that is within walking distance. They would like a place to go where you can learn to exercise safely and that provides opportunities for socializing. A lot of people are older and have lived in the neighborhood all of their lives. They need social outlets. People go to the coffee shops and Reading Market several times a week for socialization.” (Transitional Neighborhoods) (focus group)

Need to connect to community supports/resources for support such as food, caregiving, and transportation

- Need to link to community centers as entry points to services. Develop warm hand-offs between community centers and hospitals and vice-versa. Community centers could provide follow-up with patients/clients. Neighborhood centers could serve as "triage centers" to help with lack of centralization/coordination of information and services. Competition between providers/resources is a barrier. We need to coordinate not compete and create system changes. We need to change from a culture of self-preservation to one that makes an impact. (key informant)
Key Findings and Priorities

- Lack internal coordination of outreach activities
- Cultural competence
- Language assistance
- Low health literacy
- Workforce diversity
- Food Security
- Transportation
- Community safety
  - Substance use
  - Interpersonal Violence
  - Built environment
- Access to care
  - Health Insurance
  - ED use
- Chronic disease prevention and treatment
  - Obesity, diabetes, hypertension, stroke, cancer
  - Smoking, diet, exercise
- Maternal and Child Health
- Mental Health Care
- Lack of care coordination across the continuum
- Older Adult health and well-being
Closing the Gaps Between Public’s & Practitioners’ Perception of Needs, and Scientific & Policy Assessments

A – Community has the greatest potential for mobilization of resources and action

A – Community has the greatest potential for mobilization of resources and action

Recommendations

• Create and coordinate a Community Advisory Group
• Create a TJUHs Community Benefit Group in order to more fully coordinate TJUHs/TJU community benefit activities
• Involve Health Professions students in community benefit activities
• Mental Health
  – Community Training in Trauma Informed Care for leaders and CBOs
  – Provide community training in ADHD and managing behaviors
  – Provide training in anger management for teens
  – Screen inpatients for alcohol use
  – Depression screening
Recommendations

1) Access to care:
   - **Insurance enrollment:** Training; Enroll America; TJUH Finance
   - **Transportation:** Appointments; medications
   - **Primary Care:** Asian Clinic; Project HOME Wellness Center
   - **Language Access and Cultural Competence:** Training; medical interpretation; Refugee Health Partners; CHWs/ Health Coaches; Universal Precautions; Health Literacy training/system changes
   - **Emergency Department:** Database; HIV screening; reduce non-emergent / ambulatory care; JHN Stroke robot program expanded to rural areas
   - **Maternal Child Health:** Breastfeeding; prenatal care; Maternity Care Passport; refer to MCC
   - **Geriatric Initiatives:** Create an Aging Coalition; Conduct an assessment of older adults health and social needs for aging in place; Educate community about Palliative Care and Hospice; create opportunities for socialization
2) Chronic disease management

- BP+; Million Hearts campaign with PDOH (BP screen and follow-up linked to primary care providers); AHA 360 and Get to Goal campaign
- YMCA - Walking groups (train leaders)
- Train bilingual health providers to lead DSME and CDSM groups
- Diabetes Self-Management; Diabetes support Groups
- Diabetes prevention program
- Obesity/ weight management
- Chronic disease self management classes
- Asthma education and environmental assessment
- Stroke awareness
- Nutrition Education
- Breastfeeding support
- Smoking Cessation
3) Prevention and Early Detection of Disease
   – Breast and cervical cancer - education and free screening
   – Colorectal cancer - education
   – Prostate cancer – education
   – Stroke and Heart Attack – signs and symptoms

4) Community Safety
   – Substance abuse
   – Violence prevention through Substance abuse (Philly Rising)
   – Raise awareness about Interpersonal Violence and community resources
   – Built environment

5) Productive land use
   Support community gardens; tree planting. park beautification (Mifflin Square Park); assist PDPH to assess parks and playgrounds; provide health education at community gardens/farms
6) Prevention:

- **Healthy Lifestyles** – education on diet, stress, physical activity; partner with School Wellness Councils; create faith based council; work through internal and external partnerships; School Food Reform; beverage tax; support parks and recreation

- **Access to healthy affordable food** – Food Trust Partnership with corner stores; farmers markets including TJUH; urban agriculture/gardens; Farm to School; Farm to Institution

- **Food security** – screen patients; sign up for SNAP; healthy food drives

- **Smoking Cessation** – refer to PA QUIT Line/ FAX to QUIT; access to affordable nicotine replacement products; smokefree philly.org; enforce no smoking campus regulations
Recommendations (cont.)

7) Workforce Development and Pipeline
   – Medical Interpretation training
   – Career Awareness and skill building opportunities for youth
   – Community Health Worker/ Navigator/Coach Training
   – WorkReady - PYN
   – Career Support Network for low-resourced individuals
   – Partner with AHEC, NSC RAMP, TJUH HR, TJU Office of Diversity and Minority Affairs

8) Medical Legal Partnership
   – Refugee Health Partners
   – Jefferson
Collaborations

• Create an Advisory Group with community
• Maintain and expand community relationships by connecting with community groups and coalitions
• Collaborate with community partners on
  – grant/funding opportunities
  – research and evaluation of programs and initiatives

Jefferson Resources:

• Emergency Department
• Employees from target area
• Grant funding
• JNH stroke outreach
• Legislation liaison
• Marketing department
• Nurse Magnet Program
• Pharmacy
• Registered dieticians
• TJU students and residents
• TJUH certified diabetes educators
• TJUH/JHN support groups
• Pastoral Care
• Finance
• Human Resources
Potential Community Partners

Community relationships including:

- Cambodian Association
- Common Market
- Dixon House
- Faith Based Organizations
- Federation of Neighborhood Centers
- Food Trust
- Mamie Nichols Center
- Maternity Care Coalition
- Norris Square Civic Association
- Philadelphia Department of Public Health
- PACDC
- SHARE
- Coalition Against Hunger
- Southeast Asian Mutual Assistance Associations Coalition
- Southeast Philadelphia Coalition
- United Communities of Southeastern Pennsylvania
- Urban Tree Connection
- YMCA
- Schools
- CUSP
- Project HOME
- Nationalities Services Center
- Health Care Improvement Foundation
- PICC
- FPAC
- Welcoming Center
