DELAWARE VALLEY REGIONAL PLANNING COMMISSION

ITS Technical Task Force
Meeting Minutes
January 28, 2005

The following are highlights from the ITS Technical Task Force meeting held on Friday, January 28, 2005 at the Delaware Valley Regional Planning Commission's Conference Room. A list of attendees is attached.

Agenda Item #1: Welcome & Introductions
Manny Anastasiadis, PennDOT District 6, Chairman of the Technical Task Force, welcomed the Technical Task Force members and thanked them for coming. The minutes from the last meeting held on November 30, 2004 were approved. Each person in attendance introduced themselves and added any relevant ITS updates from their agency.

Agenda Item #2: Video Sharing Demonstrations

As a result of the interest in video sharing through the RIMIS Concept, the Technical Task Force scheduled several vendors to provide demonstrations about their multi-agency video sharing technology applications. The objective of the demonstration is to identify what technology exists, their functionality, limitations, and cost. The following is a brief description of the firms that presented:

- ▸ *Vbrick Systems, Inc*. provides complete solutions that capture live real-time video, store it and then manage the delivery of the video over local area networks and the Internet. Vbrick delivers simple, reliable video solutions that enhance communications and reduce cost for organizations large and small. VBrick serves customers in the education, government, healthcare, and financial services markets among others.

- ▸ Founded in 1999, *TrafficLand* heads a consortium of leading companies that manufacture, integrate and support a wide range of sophisticated video surveillance, monitoring, storage and control systems. Their mission is to put advanced video technology to work along area roadways to provide travelers with anywhere-anytime access to the information they need to make more informed travel choices—and avoid traffic congestion.

- ▸ *IBI Group* was founded in 1974 and is a leading, international, multi-disciplinary provider of a broad range of professional services focused on the physical development of cities. IBI's business is concentrated in four main areas of

1

development: Urban Land, Facilities, Transportation and Systems. The professional services provided by IBI include planning, design, implementation, analysis of operations and other consulting services related to these four main areas of development.

▶ *Winnov* is committed to helping companies realize the vast communications potential of the Internet. Providing non-proprietary and fully standards-compliant, capture card- and appliance-based communications solutions since 1992, Winnov has always known the importance of reliable, quality audio and video interaction and monitoring. Winnov provides expertly engineered, high-performance products that let you capture, manage, and develop audio and video content for distribution over the Internet or company intranets

▶ *PB Farradyne* provides multi-disciplinary and comprehensive professional services that enable their clients to succeed across a wide range of goals—regardless of size, scope or complexity. Their professionals contribute state-of-the-art knowledge of equipment and practices, representing all of the disciplines involved in project development. Their core services include environmental, planning, management consulting, design/engineering, construction management, operations & maintenance, e-business and e-media, and—integrating all of the above—program management.

▶ The *I-95 Corridor Coalition* is currently sponsoring the Delaware Valley Video Sharing Project. This is a demo to provide real-time streaming video footage from existing CCTV cameras in the Delaware Valley region among several key stakeholders. TransCore, a consultant for the Coalition, has been working with PennDOT, NJ DOT, and DelDOT, to develop web based applications to share video feeds among their operations center. This demo is expected to be rolled out shortly.

Agenda Item #3: Other Business

▶ The next meeting has been scheduled for **Friday, March 18th** at the DVRPC conference room.

ITS Technical Task Force Meeting
January 28, 2005
