Comment/Question: Will any of these proposed improvements require additional right-of-way acquisitions? And when are each of these projects scheduled to take place? All in all, I believe that all of these projects will definitely improve traffic and improve travel time in their respective areas.

Response: For both of the Congested Corridor Program (CCP) projects, there is no required additional right-of-way, i.e. all work will be done within existing right-of-way. The current schedule is for both of these projects to be let for construction by September 30th of 2014.
