# Information, Education, Cooperation, Action

- o Home and Energy Expo
- o Mother Nature Festival
- o Let's Move Lawrence
- o Community Recycled Arts Project
- o Farmers Market info Booth
- o RE-Think! Re use, re purpose, re cycle

# Living Lawns

# Easy Steps

- *Grow the right kind of grass for your region and conditions.*
- *Prevent weed seeds from sprouting with corn gluten meal*
- *Cut your grass at the right height!*
- *Never feed a cool-season lawn in hot weather!*
- *Consider letting your lawn go naturally dormant in the summer.*
- Always wait till early Fall (August 15th to September 15th is the ideal window) to **seed** a new cool season lawn.
