

This bulletin provides an annual snapshot of road safety in BURLINGTON COUNTY and its 40 municipalities. It highlights and compares trends at the state, county, and local levels.

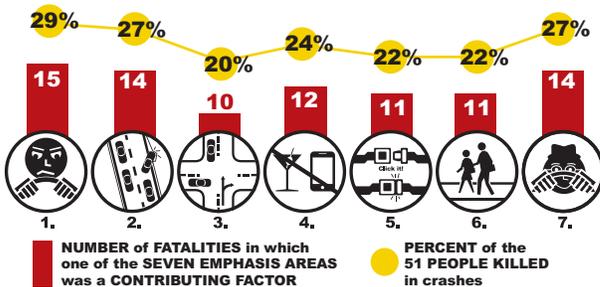

What Contributed to Fatalities in 2012?

Aggressive driving contributed to 15 of the 51 crash fatalities. Improvements in the following seven emphasis areas could eliminate almost all crash fatalities in the future.

1. Curb Aggressive Driving
2. Keep Vehicles on the Roadway and Minimize the Consequences of Leaving the Roadway
3. Improve the Design and Operation of Intersections
4. Reduce Impaired and Distracted Driving
5. Increase Seat Belt Usage
6. Ensure Pedestrian Safety
7. Sustain Safe Senior Mobility

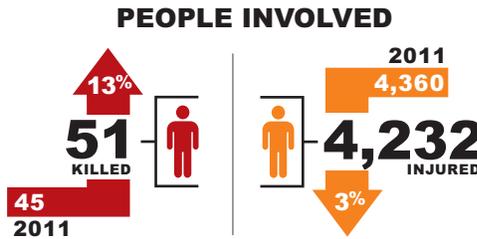

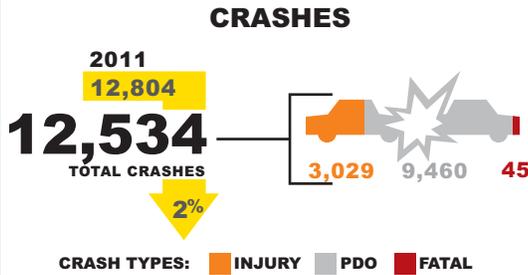

These seven emphasis areas were identified in the 2012 *Transportation Safety Action Plan: Improving Safety in the Delaware Valley*, (DVRPC publication #12030) and were contributing factors in 95 percent of crash fatalities in the Delaware Valley, for the period 2008 through 2010.

Crashes often have multiple contributing circumstances.

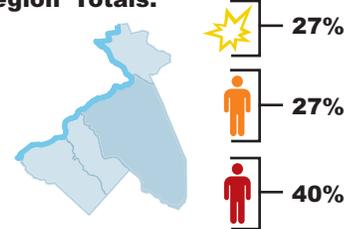

2012 Quick Crash Stats: Burlington County

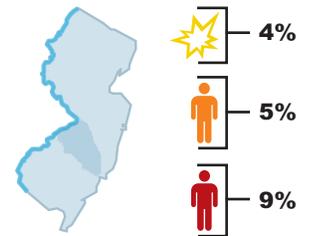

The following figures summarize total crashes [💥], number of people injured [👤] and killed [👤], and Property Damage Only (PDO)¹ crashes for Burlington County in 2012. Compared to 2011, crashes and injuries are down, however fatalities are up.

Burlington County, Compared to DVRPC's New Jersey Four-County Region² Totals:

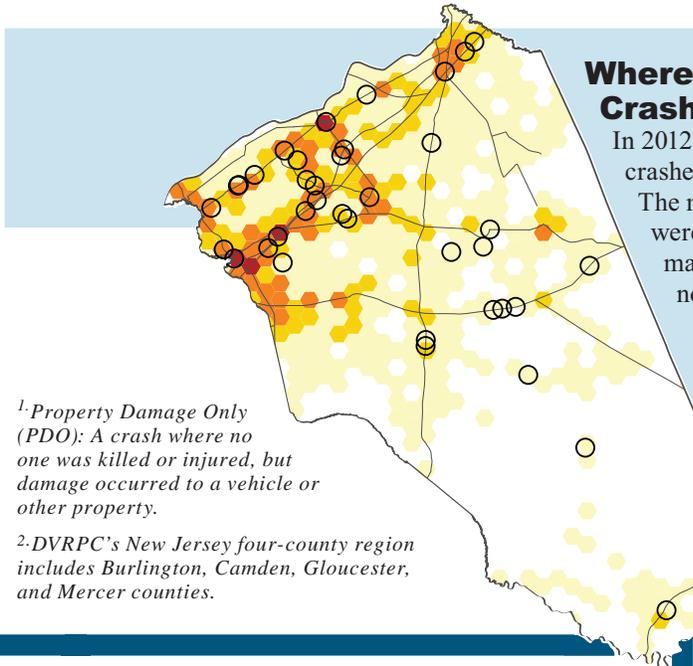

Burlington County, Compared to the Rest of New Jersey's Totals:

Where in the County Did Crashes Occur?

In 2012 there were 12,534 crashes, of which 45 were fatal. The majority of the crashes were concentrated along major highways in the northern part of the county.

○ FATAL CRASH*
 * Only crash records with geographic information are shown.

Resources to Improve Safety: DVRPC pursues a wide-ranging approach to improve traffic safety. The Regional Safety Task Force, road safety audits, intersection safety studies, local road newsletters, and funding strategies are available resources: www.dvrpc.org/Transportation/Safety/
