

# COVID-19 Impact on Trail Usage in the DVRPC Region

Source: DVRPC Note: Data shown in this chart is from the four permanent counting locations in Pennsylvania (Chester Valley Trail, Delaware River Trail at Port Richmond, Schuylkill River Trail at Spring Mill, and Wissahickon Trail) that were able to be compared for the same time period between 2019 and 2020. Year-to-year figures do not account for fluctuation in the weather, which can have a significant impact on trail usage. Visit <https://dvrpc.org/webmaps/pedbikecounts/> for more information and details on the pedestrian and bicycle counting program.
