

TELEWORK

COMMUTES

GO FROM THE
HIGHWAY TO THE
HALLWAY
WHEN EMPLOYEES
WORK FROM HOME!

TELEWORK CAN **SAVE** EMPLOYEES **TIME, MONEY AND STRESS**, AND GIVE EMPLOYERS MORE **PRODUCTIVE EMPLOYEES**

Studies show that, on days when they **work from home**, employees **get more accomplished** and work slightly longer than when they work in an office. **Why?** Because they don't have to commute, and there are **fewer distractions** at home than in the office. Plus today, with broad access to the internet and software that allows face to face discussions and meetings, working from home is **easier, and more efficient, than ever.**

TELEWORK

MAKING **TELEWORK WORK** FOR EMPLOYEES AND EMPLOYERS

Not every employee can work from home. But for those whose job responsibilities allow it – whether it's **one day a week or every day** – telework can be a nice perk that **benefits everyone**. Offering this type of flexibility helps employers **improve employee retention** and attract new employees. Plus, fewer cars on our roads means **less congestion** and **better air quality** for the whole region.

For more information on telework, or for a list of organizations that can help employers explore and establish a program, go to: www.dvrpc.org/MobilityAlternatives and click on Telework.

Telework is a component of the Mobility Alternatives Program (MAP) administered by the Delaware Valley Regional Planning Commission (DVRPC) with funding from the Pennsylvania Department of Transportation (PennDOT).
