## New Jersey Highway Program

Final Version

### Mercer

**DB# D2023**      **Circulation Improvements Around Trenton Transit Center**      **MRPID: 308**      **NEW-LG**

AQCODE:    2035M

The project includes road diets and intersection channelization in the vicinity of the Trenton Transportation Center to improve mobility for bicyclists and pedestrians. The project will realign US-1 on-ramps and close the Chestnut Avenue Bridge to vehicular traffic.

**DB# D2014**      **CR 622 (North Olden Ave), NJ 31 (Pennington Rd) to New York Ave**      **NEW-LG**

AQCODE:    R1

Improvements will enhance safety, traffic operations and mobility for all users of the N. Olden Avenue corridor including motorists, pedestrians, bicyclists, and transit users. Per the preliminary preferred alternative (PPA) 2A, improvements will include: 11' travel lanes; 5' bike lane with 2' buffer, and 6-7' sidewalk along Olden Ave between Pennington Rd and Princeton Ave; an 8' wide curbed center median; a total of (4) roundabouts at Parkside Ave, Prospect Ave, Arctic Pkwy, and Capitol Plaza; two (2) proposed HAWK signals; restriping of the New York Ave intersection approach to provide 2 WB throughlanes; installation of Rapid Rectangular Flashing Beacons at unsignalized intersections in the City of Trenton; the restriping of Brunswick Ave EB and WB approaches to include left-turn lanes; connection to future Calhoun Street Extension at the Capitol Plaza roundabout; and high-visibility crosswalks. This project graduated from the DVRPC Local Concept Development Program.

## New Jersey Highway Program

Final Version

### Mercer

DB# D1710

**Lincoln Ave/Chambers Street (CR 626), Bridge over Amtrak & Assunpink Creek**

MRPID: 304

AQCODE: S19

Project will replace the Lincoln Avenue Bridge over Amtrak Northeast Corridor (NEC) rail line, an inactive rail yard, and Assunpink Creek. Proposed Improvements include the following listed:

1. Complete replacement of the structure to extend the life of the bridge, correct deficiencies, and meet current design requirements;
2. The structure will be replaced with steel multi-girders (structure depth of 51" and maximum girder spacing of 7');
3. The vertical profile and pier locations will be revised to provide the required horizontal and vertical clearance over the railroad tracks;
4. Standard 12-foot wide lanes, 8-foot wide shoulders, which can be used by bicyclists and as a standard bicycle lane, and 6-foot wide sidewalks for pedestrians on structure;
5. Architectural treatments, such as stone facing, veneer or form liners; galvanized and powder coated steel; aesthetic parapet or railing treatments; colored concrete; decorative lighting; etc. are also being considered.

No roadway widening is proposed. Easement agreements will be required for work that is performed outside of the existing right-of-way, such as grading and sidewalk repairs necessary to meet ADA compliance. Lincoln Avenue serves as an important connector across the aforementioned physical barriers and is the first crossing outside of the central business district of Trenton City. The structure, which was built in 1931 and reconstructed in 1965, was rated 'serious', or 3 on a 0 to 9 scale, with 9 being excellent condition and 0 being failed condition/closed facility. Despite its rating of 3, the bridge is still safe for travel. The rating is primarily due to the condition of the superstructure, which suffers from severely rusted steel throughout and large areas of spalled and delaminated concrete on the deck. The County performed short-term fixes on the structure including lighting, deck repairs and an asphalt overlay until the structure could be replaced. The fund type 'OTHER-DVRPC' reflects a commitment by Mercer County of Local County Aid, Local Aid State Infrastructure Bank, and/or Mercer County general funds to the project.

**DB# D2408 Old Trenton Road (CR 535) Multimodal and Operational Improvements, Paxson Road to County Line**

**NEW**

**AQCODE:** X1 The purpose of this project is to consider improvements along the corridor as a whole to create a continuous multimodal corridor from the beginning of the four-lane segment in Hamilton Township to the terminus of Mercer jurisdiction at the Middlesex County Line. Local Concept Development would include consideration of a road diet to significantly increase vehicle, pedestrian, and cyclist safety along a corridor that includes schools, parks, and residential development. Sidewalks or sidepaths may be incorporated where the cartway is too narrow for bicycle lanes. Intersections may be upgraded. Depending on outcomes of the LCD, a Highway Safety Manual (HSM) Analysis may be performed to determine potential eligibility for Highway Safety Improvement Program (HSIP) funds

## New Jersey Highway Program

Final Version

### Mercer

**DB# D1910 Parkway Avenue (CR 634), Scotch Road (CR 611) to Route 31 (Pennington Road)**

**AQCODE:** 2035M

The project's primary goals include: reduce the frequency and severity of crashes within the project corridor; improve mobility and accessibility for bicyclists and pedestrians; and upgrade the corridor to comply with NJDOT, Mercer County, and municipal Complete Streets Policy. In November 2015, the CR 634 (Parkway Avenue) corridor from CR 611 (Scotch Road) to NJ 31 (Pennington Road) was identified as the top candidate in the NJDOT-led Regional Road Diet Pilot Program and as DVRPC's top candidate to advance to Concept Development. The proposed Preliminary Preferred Alternative (PPA) from the 2019 HSIP funded Concept Development study includes elements such as a 3-lane road diet throughout the corridor with TWLTL and bicycle lanes from Scotch Road to Parkside and 2-lane section with bike lanes from Parkside to Olden Avenue; retrofit signalized intersections where possible to accommodate new intersection approaches; and converting five (5) existing signalized intersections at Scotch Road, Lower Ferry Road, Farrell Avenue, Olden Avenue, and Pennington Road to modern roundabouts. Project will also consider improvements for intersections, substandard design elements, ADA compliancy, drainage, and signal upgrades.

<b>CMP:</b>	Not SOV Capacity Adding	Adding Subcorr(s): 8A

<b>Total First Four Years:</b>					<b>0.000</b>	<b>Total Later Fiscal Years:</b>					

**DB# D0701 Princeton-Hightstown Road Improvements, CR 571**

**AQCODE:** S6

The project limits include the intersections of CR 571 with Clarksville Road (CR 638) and Wallace-Cranbury Road (CR 615), and the approximately 1-mile segment connecting them. CR 571 is a major east-west corridor at the northern edge of Mercer County and the Central Jersey Transportation Forum has endorsed the improvement concept. There is a severe safety concern regarding the area where the roadway drops from four lanes to two. Mercer County and West Windsor Township hope to make "Main Street" pedestrian, bicycle, and site access improvements, including sidewalks, protected turn lanes and no additional through travel lanes.

**DB# D2407 Quaker Bridge Road Bridge over AMTRAK** **NEW**

**AQCODE:** X1 The purpose of this project is to study alternatives to address safety and operational deficiencies at the structure and select intersection locations, including Quaker Bridge Road and Lawrence Station Road; and Quaker Bridge Road and Village Road West. The Quaker Bridge Road Bridge superstructure is rated a 4, placing it in 'Poor' condition and classifying it as "structurally deficient." The deteriorating condition of the bridge increases the likelihood of an incident in which concrete could impact the rail facilities operating below the structure, which includes Amtrak's Northeast Corridor Line (NEC), where Acela trains reach speeds up to 160 miles per hour. Rehab or replacement of this structure is necessary to maintaining the operations and safety of the NEC rail network, in addition to the bridge itself.

## New Jersey Highway Program

Final Version

### Mercer

**DB# 17419**      **Route 1, Alexander Road to Mapleton Road**      **MRPID: 84**

**AQCODE:** 2035M      Improvements will help relieve congestion at Route 1 from the "Dinky" railroad bridge to approximately Plainsboro Road by increasing the number of travel lanes from 3 to 4 lanes per direction on Route 1; provide shoulders, deceleration lanes, acceleration lanes, and turn lanes along the corridor for turning vehicles; widen Washington Road at Route 1 to relocate the merge of the 2-lane circle into a single Washington Road lane out of the intersection; increase the Route 1 southbound to Fisher Place jughandle turn; modify existing 3-phase signal at Route 1 and Harrison St. intersection to a 2-phase signal; and provide a Route 1 cross section with 4 lanes per direction at the Millstone River Bridge. This project in West Windsor (Mercer County) and Plainsboro (Middlesex County) is a derivative of the former Rt. 1/CR 571 Penns Neck project (DB #031). The magnitude and scope of work for the Rt. 1 Alexander Rd to Mapleton Rd project is greatly reduced from the Penns Neck project (\$150 M vs. \$35 M).

### Mercer

**DB# 99362      Trenton Amtrak Bridges**

AQCODE:    S19

The three Orphan Bridges carrying Chestnut Avenue, East State and Monmouth Streets over Amtrak are in poor condition. All of the bridges are structurally deficient and functionally obsolete. The bridges and approach roadways include a variety of substandard design elements, including substandard vertical and horizontal clearances, intersection sight distances and unprotected bridge girders. The City of Trenton supports the current two bridge option, which replaces East State Street and Monmouth Street Bridges. Chestnut Avenue Bridge will be removed/demolished. The two bridges will be replaced with single-span, ABC (Accelerated Bridge Construction) systems. Retaining walls are included in the project to minimize impacts to properties. Catenaries will be removed from the existing bridges and up to six new catenary structures will be constructed to re-profile the electric traction facilities.
