MPMS# 16214 PA 611, Old York Road Over SEPTA West Trenton Line (Bridge) SR:0611

LIMITS: Over SEPTA West Trenton Line (Noble Station)

Est Let Date: 6/22/2023

IMPROVEMENT Bridge Repair/Replacement NHPP: Y

MUNICIPALITIES: Abington Township FC: 14 AQ Code:S19

PLAN CENTER: IPD: 20

PROJECT MANAGER: TSS/H. Freed CMP: Not SOV Capacity Adding CMP Subcorridor(s): 14E

The Old York Road bridge is a three span, concrete-encased, I-beam structure supported by reinforced concrete abutments and column pier bents and must be replaced with a new structure. This structure carries five travel lanes (including one left turning lane) of PA Route 611 and two pedestrian sidewalks with a total structure width of 69 feet and structure length of approximately 113 feet. Pedestrian access will be provided to both sides of the bridge from the SEPTA Noble regional rail station. Signalized intersections are located at each approach to the bridge. The existing bridge was rated poor in an inspection report performed in 2019. The overall bridge is deteriorating. The abutment has wide cracks, severe scale and large spalls. The superstructure over the loading platforms are exhibiting spalls and heavy scale. There were two small holes noted in the sidewalk on the bridge.

A final alternative for bridge rehabilitation or replacement is determined upon federal National Environmental Policy Act (NEPA) or state Categorical Exclusion clearance.

MPMS# 16334 PA 73, Church Road Intersection and Signal Improvements SR:0073

LIMITS: Greenwood Avenue to Rice's Mill Road Est Let Date: 9/14/2023

IMPROVEMENT Intersection/Interchange Improvements NHPP: Y

MUNICIPALITIES: Cheltenham Township FC: 14; 16 AQ Code:2035M

PLAN CENTER: IPD: 20

PROJECT MANAGER: HNTB/N. Velaga CMP: Minor SOV Capacity CMP Subcorridor(s): 14E

This project involves the addition of turn lanes at the PA 73 intersections with Greenwood Avenue and at Rices Mill Road. Left turn lanes will be added on Church Road and right turn lanes will be added on Greenwood Avenue. The traffic signals on PA 73 at Greenwood Avenue and Rice's Mill Road will be interconnected. Drainage in the area will be improved. The existing sidewalk on the east side of Greenwood going north from the intersection with Church Road will be maintained. Additional sidewalks can be considered if there is local support, including the willingness to be responsible for maintenance, and if the improvements can be made ADA compliant. However, the right-of-way constraints are significant, including the Curtis Arboretum and the Rabbinical College. The impacts of additional required right-of-way for bicycle or pedestrian facilities may cause cultural resource and/or community impacts that are not acceptable. These issues will be addressed as the project moves into final design.

AQ Code:NRS

PLAN CENTER: IPD:

PROJECT MANAGER: TSS/S. Hasan CMP: Major SOV Capacity CMP Subcorridor(s): 2A, 11A, 14C

Final Design funding in this project is for Phase 3 of the PA 309 Connector Project: Souderton Pike to PA 309 - MPMS #105803. This is for record keeping and the original timing of MPMS #16438 has not changed, as the physical work was completed in late 2012. See MPMS #77211 for description of project.

The overall effort is to provide an adequate two lane roadway connection by upgrading two existing two lane roads (Wambold Rd. and Township Line Rd.) and connecting them with a two lane roadway approximately one mile in length. This project will correct the disjointed and inadequate road system serving the north/south movement between PA 309 and the PA Turnpike Lansdale Interchange. This project will proceed in 2 phases.

The Right-Sized Phase 1 Project includes the proposed realignment of Sumneytown Pike (PA 63) from Old Forty Foot Road to Freed Road and improvements to Wambold Road from Sumneytown Pike (PA 63) to Allentown Road. The proposed work includes a three lane relocation of PA 63 with shoulders (11' lanes and 8' shoulders) on Wambold Road and a two lane runaround around Mainland Village.

Phase 2 will include the following improvements:

- -Extend Wambold Road past its current end at Allentown Road up to the intersection of Cowpath Road and Township Line Road;
- -Reconstruct and widen Township Line Road from Cowpath Road to Souderton Pike;
- -Realign and signalize the intersection of Penn Street and Township Line Road;
- -Signalize the intersection of Township Line Road and Souderton Pike.

Phase 3 will reconstruct and widen Township Line Road between Souderton Pike and the Sellersville Bypass, make a physical connection to PA 309, and is listed under MPMS #105803.

SAFETEA DEMO #613, PA ID# 338 - \$1.280 MILLION, \$0 available. DEMO PA ID #206 - \$4,59,394, \$0 available.

MPMS# 16665 US 202. Markley Street Southbound (Section 500) SR:0202

LIMITS: Main Street to Johnson Highway No Let Date NHPP: Y **IMPROVEMENT** Intersection/Interchange Improvements MRPID:21

FC: 14 MUNICIPALITIES: East Norriton Township; Norristown Borough AQ Code:S10 PLAN CENTER: Town Center

IPD: 26

PROJECT MANAGER: EE/J. Brown **CMP**: Major SOV Capacity CMP Subcorridor(s): 8E, 9B

This project serves for the pre-construction phases of the Markley Street rehabilitation project for Section 500 of US 202 (SR 3020 and Norristown Borough Street): from approximately 700 feet south of Main Street (local street) to Johnson Highway (SR 3017) for a total length of approximately 8,500 linear feet; and on Johnson Highway (SR 3017) from Markley Street to Powell Street (local street) for a total length of approximately 2,200 feet. Between Main Street (local street) and Marshall Street (local street), Markley Street is a four-lane divided street with no parking permitted. Between Marshall Street and Johnson Highway (SR 3017), it is a two-lane street, with parking typically permitted on both sides. This parent project will incorporate all pre-construction phases (UTL and ROW) for MPMS# 80021 (Section 510) and 80022 (Section 520), 106068 (Section 530) and Section 540, which will be used for the respective construction contracts.

The scope also includes some operational improvements instead of strict road reconstruction by adding an extension of Barbadoes Street, in Norristown, between Lafayette Street and Washington Street to provide an eastern connection to Water Street and alleviate truck turning conflicts, for the Norristown Transfer Station, at the intersection of Water Street and Main Street. There is also an upgrade to the railroad grade crossings at Main Street and Marshall Street by installing new gates, signals and crossing surfaces and replacing existing traffic signals on Markley Street at the intersections of Main Street, Marshall Street and Elm Street.

In the DVRPC region, US 202 covers 61 miles, traversing 27 municipalities. It serves as a major commuter route and is a vital link for business and industry. For planning purposes, US 202 has been divided into seven major sections (100 through 700), and some of those sections have been broken down further to simplify construction management.

Project CMP (Congestion Management Process) commitments include strategies such as improvements for transit users, bicyclists, pedestrians, and drivers on the existing road network (operations). See DVRPC's 2007 and 2011 annual memoranda on supplemental strategies for details related to this project.

PLAN CENTER:

IPD: 15

PROJECT MANAGER: TSS/H. Freed CMP: Minor SOV Capacity CMP Subcorridor(s): 12A, 12B

The project involves roadway widening and capacity improvements along SR 63 (Welsh Road), SR 2007 (Norristown Road) and SR 152 (Limekiln Pike). Welsh Road and Norristown Road will be widened to a 5 lane section with center left turn lanes. The existing 3 lane section along Limekiln Pike will remain with some additional capacity improvements. The cross section will not provide shoulders. Concrete curbing will be installed. The intersections will be improved to include left turn lanes and some channelized right turn lanes. Some sidewalks are currently located within the project. 4' sidewalks with a 3' grass strip from face of curb are proposed through the project limits. New traffic signal upgrades are proposed for all three project intersections. Signalized intersections will include pushbuttons and hand/man indications.

Signal Replacements will take place at the following intersections: SR 63 (Welsh Road) and SR 2007 (Norristown Road); SR 63 (Welsh Road) and SR 152 (Limekiln Pike); and SR 2007 (Norristown Road) and SR 152 (Limekiln Pike).

Project limits are as follows:

SR 63-1000' south of Norristown Road intersection to 1200' north of Limekiln Pike intersection

SR 2007-850' west of Limekiln Pike intersection to 850' east of Welsh Road intersection

SR 0152-800' south of Norristown Road intersection to 750' north of Welsh Road intersection

SR 63 (Welsh Road)

Existing - 2 -12' lanes (varies) with turn lanes at intersections, 0-4' Rt. Shldr. (varies); 24.0'-44.0' Total Pavement width Proposed - 3 – 11' lanes, 2-13' lanes adjacent to curb; 24.0'-59.0' Total Pavement width.

SR 2007 (Norristown Road)

Existing - 2 -12' lanes (varies) with turn lanes at intersections, 0-4' Rt. Shldr. (varies); 24.0'-44.0' Total Pavement width Proposed - 3 – 11' lanes, 2-13' lanes adjacent to curb; 24.0'-59.0' Total Pavement width.

SR 152 (Limekiln Pike)

Existing - 2 -12'-18' lanes (varies) with some turn lanes at intersections, 0-8' Rt. Shldr. (varies); 24.0'-51.0' Total Pavement width Proposed - 1 – 11' lane, 2-13' lanes (lane widths vary based on existing edge of pavement to remain); 24.0'-55.0' Total Pavement width.

Ridge Pike is a Montgomery County owned principal arterial on the NHS. This project will reconstruct Ridge Pike to provide a center left turn lane to the existing four lane cross-section. Work includes full-depth pavement reconstruction and drainage replacement; upgrading and adding new traffic signals; fiber optic traffic signal interconnections; new sidewalks; and improved transit stops. The overall project extends from the Pennsylvania Turnpike to Chemical Road. Two new bridges over the Turnpike and Norfolk Southern Railroad tracks are proposed under companion projects, MPMS #92839 and #110444, which will be let and constructed concurrently with MPMS #48175.

FC: 14

AQ Code:2035M

IPD: 21

PROJECT MANAGER: TSS/M. Fausto CMP: Major SOV Capacity CMP Subcorridor(s): 8F, 9B

This project provides for the widening of US 202 for approximately 1.8 miles from two lanes to five lanes including a center turn lane in this section of US 202 between Johnson Highway and Township Line Road in Norristown Borough, East Norriton & Whitpain Twps. One bridge and one culvert will be replaced in this portion of Section 600. Traffic signal equipment will be replaced at the intersections with Johnson Highway, Germantown Pike and Township Line Road. Bike lanes adjacent to the outside travel lane will be provided in both the northbound and southbound directions. This section is designed under Section 610. ITS elements are included in this project. MPMS #50364 (US 202 Sec 610) contains the final design funding for this project. See MPMS #'s 63491, 63486, and 63490 for construction sections.

In the DVRPC region, US 202 covers 61 miles, traversing 27 municipalities in Delaware, Chester, Montgomery, and Bucks counties. For planning purposes, US 202 has been divided into seven major sections (100 through 700), and some of those sections have been broken down further to simplify construction management.

Project CMP (Congestion Management Process) commitments include strategies such as improvements for transit users, bicyclists, pedestrians, and drivers on the existing road network (operations). See DVRPC's 2007 annual memoranda on supplemental strategies for details related to this project.

PROJECT MANAGER: TSS/M, Fausto CMP: Minor SOV Capacity CMP Subcorridor(s): 8G, 12B, 14C

This project involves modifications to the intersection of PA 309 (Bethlehem Pike) with PA 463 (Horsham Road/Cowpath Road) and Business US 202 (Doylestown Road) in Montgomery Township, Montgomery County, Pennsylvania. Improvements to the intersection, commonly referred to as the "5-Points Intersection," will include the installation of additional through lanes on both PA 463 approaches and the PA 309 southbound approach, and the retiming of the existing eight (8) phase traffic signal. Other improvements will include modifying the existing drainage system by installing Stormwater Management basins, implementing Best Management Practices facilities for erosion and sediment pollution control, replacing the existing traffic signal structures, adjusting several existing driveways to accommodate additional lanes. upgrading the signing and pavement markings, and adding sidewalks and ADA complaint curb ramps.

The existing intersection has fifteen (15) lanes approaching the intersection, and the proposed work has eighteen (18) lanes approaching including widening away from the intersection to accommodate lane drops and driveway improvements. The added lanes are on PA 463 eastbound and westbound and PA 309 southbound. There are no improvements on Doylestown Road other than tying in PA 463 westbound to accommodate vehicles turning right to travel northbound on Business US 202. Sidewalks and ADA complaint curb ramps will be added throughout the project.

Work along PA 309 will extend approximately 1,838 feet north of the intersection and 1,181 feet south of the intersection; work along PA 463 will extend 1,439 feet east of the intersection, and 1,336 feet west of the intersection, work along Business US 202 will extend 854 feet north of the intersection.

This project will relocate PA 23 (Valley Forge Road) and SR 3039 (North Gulph Road) in the vicinity of the PA 23/US 422 interchange to improve operations and reduce traffic impacts within Valley Forge National Historic Park. In addition, relocation improvements will be made to North Gulph Road in order to provide the opportunity for a new "gateway" for the Valley Forge National Historic Park. The roadway will be moved approximately 300 feet to the east of the park entrance.

This project is part (1) of the "River Crossing Complex," which is a complex area of roadways, interchanges, intersections, and bridges in and around the Valley Forge National Historic Park. Environmental clearance for various components was undertaken through MPMS #46954. and individual projects have been broken out as follows:

- 1) PA 23/US 422 Interchange and North Gulph Road Improvements (MPMS #66952).
- 2) US 422/PA 363 Interchange, including providing movements to/from the west (MPMS #64796).
- 3) US 422 Exwy Bridge over the Schuylkill River, replacement of the existing bridge (MPMS #70197), and a new parallel four (4) lane bridge and relocation of PA 23 eastbound off-ramp as an expressway fly-over.
- 4) US 422 Widening for 1.8 miles from PA-363 interchange to the US-202 interchange. This project has not yet been broken out.
- 5) Old Betzwood Bridge Bike/Pedestrian Trail will be re-built as a bike/pedestrian bridge only, and will not re-instate vehicular traffic (MPMS#
- 6) An early action interim project to provide timely and effective relief to westbound afternoon congestion until the long range projects can fully advance was programmed and constructed as MPMS #74648.

The River Crossing complex projects have received the following Earmarks:

2008 Appropriation (PA ID# 711) -\$735,000

SAFETEA-LU (FED ID# 0020/PA ID# 672) -Originally \$20,000,000. Balance available \$6,864,799

TEA-21 (FED ID# 0140/PA ID# 088) -No funds remain.

The PA 309 Connector Project is intended to create an improved connection between PA 63 (near the Lansdale Interchange of I-476) and PA 309 (near the southern terminus of the Sellersville Bypass) in Bucks County. Phase 1, which created a bypass around Mainland village in Montgomery County and reconstructed and widened Wambold Road from PA 63 (Sumneytown Pike to Allentown Road, was carried under MPMS #16438.

Phase 2 will include the following improvements:

- -Extend Wambold Road past its current end at Allentown Road up to the intersection of Cowpath Road and Township Line Road;
- -Reconstruct and widen Township Line Road from Cowpath Road to Souderton Pike;
- -Realign and signalize the intersection of Penn Street and Township Line Road;
- -Signalize the intersection of Township Line Road and Souderton Pike.

Phase 3 will reconstruct and widen Township Line Road between Souderton Pike and the Sellersville Bypass, make a physical connection to PA 309, and is listed under MPMS #105803.

Project CMP (Congestion Management Process) commitments include signal and intersection improvements, turning movement enhancements, accommodations for pedestrians and bicyclists, coordination with SEPTA, and outreach to employers to promote transportation demand management strategies. See DVRPC's 2016-2017 memorandum on supplemental strategies for details related to this project.

MPMS# 80052 Fetters Mill Bridge Over Pennypack Creek

LIMITS: Over Pennypack Circle Est Let Date: 9/14/2023

IMPROVEMENT Bridge Repair/Replacement NHPP:

MUNICIPALITIES: Bryn Athyn Borough; Lower Moreland Township FC: AQ Code:S19

PLAN CENTER: IPD: 21

PROJECT MANAGER: TSS/GANNETT/S. New CMP: Not SOV Capacity Adding CMP Subcorridor(s): 12A

This project is the rehabilitation of the Fetters Mill Road Bridge in Lower Moreland and Bryn Athyn Borough. The bridge was determined eligible for the inclusion in the National Register of Historic Places in 1999 with the Fetters Mill Historic District being added to the list in 2006. The bridge was closed to traffic in April 2017 and will remain closed until the completion of construction. Since the bridge is being rehabilitated, it was determined that the project will have a "No Adverse Effect" on the bridge and historic district.

MPMS# 83643 Limekiln Pike (Bridge)o/SEPTA RR

LIMITS: Abington Township Actl Let Date: 1/30/2020

IMPROVEMENT Bridge Repair/Replacement NHPP:

MUNICIPALITIES: Abington Township FC: AQ Code:S19

PLAN CENTER: Town Center IPD: 20

PROJECT MANAGER: Gannett/M. McGuire CMP: Not SOV Capacity Adding CMP Subcorridor(s): 14B

This project includes the replacement of the bridge superstructure carrying Limekiln Pike over the SEPTA Lansdale/Doylestown Line. The existing structure is a single span adjacent concrete box beam structure that is approximately 76 feet long and 58 feet wide. The project will be constructed under traffic, maintaining one lane in each direction. The proposed bridge superstructure will also be 58 feet wide. The existing roadway has two 11 foot lanes and two 13 foot lanes and two 4 foot sidewalks and two protective exterior walls due to the electrified powerlines for SEPTA. Utility lines above the sidewalk may need relocation to facilitate construction. Protection of SEPTA catenary and transmission lines will be required. Construction operations will need to be coordinated with SEPTA to not impact the Lansdale/Doylestown Line services.

A final alternative for bridge rehabilitation or replacement is determined upon federal National Environmental Policy Act (NEPA) or state Categorical Exclusion clearance.

MPMS# 83742 Keim Street Bridge Over Schuylkill River

LIMITS: Over Schuylkill River Est Let Date: 9/14/2023

IMPROVEMENT Bridge Repair/Replacement NHPP:

MUNICIPALITIES: North Coventry Township; Pottstown Borough FC: AQ Code;S19

PLAN CENTER: Town Center IPD: 19

PROJECT MANAGER: TSS/GANNETT/S. New CMP: Not SOV Capacity Adding CMP Subcorridor(s): 9A

This project is the replacement of the existing bridge carrying South Keim Street over the Schuylkill River with minor approach roadway work. Additionally, there will be widening of Industrial Highway, to accommodate a right lane along the eastbound side and a left turn lane along the westbound side. The project is located in the Borough of Pottstown in Montgomery County and North Coventry Township in Chester County. The bridge is currently closed to traffic. A programmatic agreement has been signed by all parties for the replacement of this structure.

A final alternative for bridge rehabilitation or replacement is determined upon federal National Environmental Policy Act (NEPA) or state Categorical Exclusion clearance.

Montgomery

MPMS# 102273 Ridge/Germantown Intersection Realignment - Phase 1, Perkiomen Crossing

LIMITS: PA 29 to Ridge/Germantown Pike

Est Let Date: 5/23/2024

IMPROVEMENT Roadway New Capacity

NHPP:

MRPID:160

MUNICIPALITIES: Collegeville Borough; Lower Providence Township FC: AQ Code:2035M

PLAN CENTER: IPD: 14

PROJECT MANAGER: HNTB/N. Velaga CMP: Minor SOV Capacity CMP Subcorridor(s): 9A, 11A

This intersection realignment project will replace the intersection of Germantown Pike, Ridge Pike, and River Road—which currently sits near the Ridge Pike Bridge over Perkiomen Creek—with two separate intersections to the east in order to reduce congestion and improve traffic flow through this corridor. The first of these will relocate the River Road intersection with Germantown Pike utilizing a roundabout configuration. The second intersection will be signalized and will connect Ridge Pike with the re-aligned Germantown Pike south of the new roundabout. Reconfiguring these intersections will improve safety and mobility in the project area by increasing the spacing between the existing bridge and the new Ridge Pike and Germantown Pike intersection. The roundabout will direct traffic more efficiently to the new signal controlled intersection on Ridge Pike. In addition, a short new connector road will be built between Ridge Pike and Pechins Mill Road to provide access to residents along Pechins Mill Road, which is also being realigned to improve traffic flow. These advance operational improvements are considered Phase 1 of a future improved crossing of the Perkiomen Creek being proposed due to congestion and safety issues where Germantown Pike, Ridge Pike, Main Street, and Route 29 converge. The Ridge Pike Bridge over Perkiomen Creek was constructed in 1791 and is the second oldest stone arch structure in Pennsylvania. Additional improvements in Collegeville are currently being advanced as part of an HOP to realign First and Second Avenue and eliminate offset intersections.

A future Phase II Second Collegeville/Perkiomen Crossing south of the existing stone arch bridge is planned, but due to impacts to wetlands, floodplains, parks, threatened and endangered species, and archaeology, Phase I operational improvements will be constructed in advance of a new crossing and will be evaluated for traffic impacts. The Phase 1 improvements are required before a second bridge can be constructed as they will provide connectivity of the second bridge with the existing roadway network.

FC:

AQ Code:2035M

PLAN CENTER:

PROJECT MANAGER: TSS/S. Hasan CMP: Major SOV Capacity CMP Subcorridor(s): 14C

The PA PA 309 Connector Project is intended to create an improved connection between PA 63 (near the Lansdale Interchange of I-476) and PA 309 (near the southern terminus of the Sellersville Bypass) in Bucks County. Phase 1, which created a bypass around Mainland village in Montgomery County and reconstructed/widened Wambold Road from PA 63 (Sumneytown Pike) to Allentown Road, was carried under MPMS #16438. Phase 2 is listed under MPMS #77211 and will extend Wambold Rd. on a new alignment and upgrade a portion of Township Line Rd.

Phase 3 will reconstruct and widen Township Line Road between Souderton Pike and the Sellersville Bypass, make a physical connection to PA 309, and is listed under MPMS #105803. Phase 3 will begin along Township Road just east of Hatfield Souderton Road, the terminus of Phase 2. Township Line Road will be widened and the intersection of Bethlehem Pike and Township Line Road will be totally reconstructed to include additional turn lanes. The proposed connector will continue after the intersection to follow existing Fairhill Road and the existing bridge over PA 309 will be reconstructed. The interchange will consist of two ramps, the northbound on ramp intersection will be a proposed roundabout with the proposed connector and existing Fairhill Road. Along Bethlehem Pike improvements will be made to the Bergey Road intersection to the south and Spur Road intersection and County Line Road intersection to the north. The intersection of Bethlehem Pike and County Line will be the location of a proposed roundabout to improve safety and traffic flow.

PLAN CENTER:

PROJECT MANAGER: EE/DVRPC/J. Coscia CMP: Not SOV Capacity Adding CMP Subcorridor(s): 8G, 12B, 14C

Phase 1 of the Powerline Trail is a 10 foot multi-use trail connecting an existing and heavily used US 202 Parkway Trail with the Township Building as well as the Township's newly constructed Community and Recreation Center. This trail is a Primary Trail in "The Circuit." This will not only connect one of the region's spine trail corridors with the community center, it will also improve safety at several major road crossings for trail users. Important destinations exist along the proposed route including the Montgomery Township Municipal Building and the Montgomery Township Police Department. It will provide a first class multi-use trail to a large concentration of Montgomery Township's population connecting the new Township's Community & Recreation Center as well as the US 202 Parkway Trail.

Project was awarded \$850,000 regional TAP (TAU) funds from the 2016 TAP round, which was approved by the March 24, 2016 DVRPC Board. Approximately \$7.6 million was available for the five-county Southeastern Pennsylvania region.

PROJECT MANAGER: TSS/GANNETT/S. New CMP: Not SOV Capacity Adding CMP Subcorridor(s): 3B

This project will provide for the rehabilitation of the five-span concrete arch with a closed deck bridge on Belmont Avenue/Green Lane which connects Montgomery County and the City of Philadelphia over the Schuylkill River. The current structure is 564 feet long, has a bridge deck area of 32,260 SF, and serves an AADT of 22,891. At nearly 90 years old, it has a sufficiency rating of 38, while the substructure condition has been rated as 'poor.' Any weight restriction or closure would cause significant traffic disruption to the region. This bridge is Montgomery County bridge #200 and is also Philadelphia City Bridge #7 and is a jointly owned structure between the City of Philadelphia and Montgomery County.

A final alternative for bridge rehabilitation or replacement is determined upon federal National Environmental Policy Act (NEPA) or state Categorical Exclusion clearance.

This project proposes to streamline the six-legged intersection of Philmont/Tomlinson/Pine Roads in two stages by removing both legs of Tomlinson Road from the intersection and relocating them. Stage 1 would realign the northern leg of Tomlinson Road into Pine Road, and straighten out both Pine Road approaches to Philmont. Stage 2 will realign the southern leg of Tomlinson Road into a new intersection with Philmont Avenue 700 feet east of the original location. Additional shoulder and turning lane improvements along Philmont Avenue and Pine Road are also proposed.

The project will implement a 4-lane partial "road diet" configuration along Main Street (SR 3009) between Egypt Road (SR 4002) and Forest Avenue/West Airy Street. The existing four-lane undivided roadway will maintain two (2) through lanes in the westbound direction, one (1) lane eastbound, and a shared left-turn lane throughout the project limits with dedicated turn lanes at the signalized intersections. In addition to the improvements along Main Street, the intersection of Main Street & Egypt Road/Jefferson Avenue/Orchard Lane will be reconstructed as a 5-leg "hybrid roundabout". The "hybrid roundabout" will include a 2-lane exit for Main Street and a single lane exit for Egypt Road. Temporary and permanent right-of-way acquisitions will be required in the area of the "hybrid roundabout". The existing traffic signals at Schuylkill Avenue, Whitehall Road, and Forrest Avenue/West Airy Street will be modified, as necessary. The ADA and pedestrian facilities along the corridor will be evaluated and updated, as necessary, to meet current ADA standards.

This project will provide flex funds to be transferred to SEPTA for a new "smart" parking garage at SEPTA's Conshohocken Station which will increase parking availability by approximately 500 spaces and will leverage \$22,000,000 of SEPTA capital funds for the station project on the Manayunk/Norristown Regional Rail Line. The garage and the information system to provide real time parking and travel information is one of the elements of improving multi-modal travel and mitigating congestion as part of the I-76 Integrated Corridor Management project (see MPMS # 106662 in the Interstate Management Program). Traffic studies and empirical evidence demonstrate the need to divert traffic on the Schuylkill Expressway between the PA Turnpike (I-276) to the west and US 1 to the east. Parking expansion at SEPTA's Conshohocken Regional Rail Station will enhance the opportunity to utilize Regional Rail service along this corridor and complement PennDOT's ongoing efforts to manage congestion on the Expressway.

IMPROVEMENT Roadway Rehabilitation NHPP:

MUNICIPALITIES: Lower Merion Township FC: AQ Code:S2

PLAN CENTER: IPD:

PROJECT MANAGER: TSS/S. Fellin CMP: Not SOV Capacity Adding CMP Subcorridor(s): 3C

This project involves the construction of permanent slope repairs along I-76 Westbound near mile post 335.3 in Lower Merion Township, Montgomery County. Slope failure has occurred along the I-76 Westbound shoulder. County maintenance forces have evaluated and performed temporary repairs, but the slope has continued to erode and fail over time. This has placed the I-76 travel lanes at risk of destabilization and failure. A more permanent solution will be required to avoid the possible closure of the roadway for repair in the event of a major slope failure. The causes of the slope failures may include water, erosion, and/or a loss of vegetative support. A site reconnaissance and investigation will be performed to assist with designing remedial measures, which may include excavation and replacement with rip rap, excavation and stabilization with soil nails, and other measures.

MPMS# 114492 422 Modeling & Corridor Analysis

LIMITS: 422 Corridor in Montgomery County

No Let Date

IMPROVEMENT Other NHPP:

MUNICIPALITIES: Various FC:

PLAN CENTER: IPD:

PROJECT MANAGER: EE/M. Holva CMP:

As per PennDOT's suggestion and request, a PennDOT procured consultant is needed to assist with tasks which are outside of the scope of work and beyond the limits of DVRPC's resources. This entails conducting a thorough and comprehensive examination of the US 422 corridor. Work may include the impacts of additional impervious surfaces, stormwater management, socioeconomic impacts, and detailed cost estimates.

A consultant would assist with the detailed Vissim analysis and modeling efforts. DVRPC could oversee work that involves defining where Flex Lanes would begin and end by direction. Tasks could also focus on looking at opportunities where Flex Lanes may reduce the need for implementing the full programmed widening between PA 363 Trooper Road and US 202.

A consultant would assist in sensitivity testing for the operational impacts of this improvement strategy. It is likely that the Flex Lanes would operate with the use of ITS technology. This may include how the Lanes are opened and closed, hours of operation, and inner/outer lane configurations testing. Other ITS technologies, such as ramp metering, speed harmonization, dynamic lane assignment, and queue warning systems may also be explored.

For the transit component, consultant tasks may include developing preliminary BRT routes, schedules, station location, vehicle operations, system right-of-way, and potential ridership forecasts.

A consultant would prepare a comprehensive final report detailing findings and recommendations for all aspects of their work.

DVRPC's modeling work and deliverables would serve as an appendix to the larger report.

This approach would satisfy PennDot's request to look at the US 422 holistically and would set the foundation for implementation of the recommended improvements.

MPMS# 114948 Lancaster Avenue and Remington Road Intersection Improvements

LIMITS: Lancaster Ave and Remington Rd Est Let Date: 1/15/2027

IMPROVEMENT Intersection/Interchange Improvements NHPP:

MUNICIPALITIES: Lower Merion Township FC: AQ Code:R1

PLAN CENTER: IPD:

PROJECT MANAGER: Ashwin Patel CMP: Minor SOV Capacity CMP Subcorridor(s): 7B

The scope of this project entails safety countermeasures which include:

- 1) Expanding from a four lane to five lane section along Lancaster Ave to add left turn lanes.
- Install pedestrian countdown timers
- 3) Add signal (additional primary head) on the mast arms along Remington Road.
- 4) Provide ADA ramps
- 5) Upgrade existing mast arms

MUNICIPALITIES: FC: AQ Code:X1
PLAN CENTER: IPD:

PROJECT MANAGER: Jim Mosca CMP:

This program will improve efficiency of the regions transportation system by collecting and analyzing traffic data to determine the utilization of the regions transportation network.

This ongoing regional program collects and processes travel data, the primary form being traffic counts, including hourly and 48-hour traffic volumes, for selected locations on the regional highway network. Data collected will provide input to Vehicle Miles Traveled (VMT) forecasting, the Traffic Monitoring System (TMS), the Congestion Management System (CMS), travel simulation models, individual project level analysis, traffic monitoring, and trend analysis. This information is vital to all project studies that address highway deficiencies and proposed solutions. Traffic count information from the database may be queried at https://www.dvrpc.org/webmaps/TrafficCounts/. The program is supported by funding from various sources. Because this is a regional program, the federal PL funds help support the operations and infrastructure required as base elements to run a travel monitoring program region wide. These base elements include the leases on a fleet of travel monitoring vehicles, operations and maintenance of those vehicles, an inventory of data collection and safety equipment, editing, processing and uploading of the count data into the database system which feeds the count viewers on the DVRPC website

To facilitate uninterrupted data collection, it will be necessary to procure new counting equipment, supplies, repairs, or services as needed.

Tasks

- 1. Coordinate with PennDOT, NJDOT, and member governments to review traffic count locations.
- Establish weekly schedules, staff assignments, and control procedures.
- 3. Collect traffic data at approximately 3,000 selected locations.
- 4. Process counts, edit for quality control, upload data into the DVRPC Traffic Count Database.
- 5. Maintain and further automate traffic data systems and procedures to enhance productivity, including data obtained by third parties via remote sensors, etc.
- 6. Submit counts collected during the year electronically by specific deadlines established by PennDOT and member governments.
- 7. Maintain an inventory of data collection and safety equipment, including purchasing new equipment with enhanced technology and capability, purchasing needed supplies such as road tube, and procuring necessary repairs if existing equipment gets damaged.
- 8. Collect travel data from non-highway modes, including pedestrian, bicycle and public transportation travel system characteristics and user traits as requested.
- 9. DVRPC will also coordinate with PennDOT and NJDOT, the counties, and cities on the collection and validation of data on the local transportation asset inventory (as requested).

MPMS# 115974 District 6 Modeling Assistance 2022-23

LIMITS: I-95 Reconstruction areas, other areas as needed across the District

No Let Date

IMPROVEMENT Other NHPP:

MUNICIPALITIES: Various FC:

PLAN CENTER: IPD:

PROJECT MANAGER: EE/E. Elbich CMP:

This project provides for technical and planning assistance to PennDOT District 6 for support in implementation of the I-95 Reconstruction Projects, and other traffic studies as identified by PennDOT. DVRPC will be on call for quick-turnaround analysis or data collection tasks in support of specific and timely I-95 project planning needs. Tasks will include data collection, meeting and stakeholder coordination, traffic modeling and forecasting, and general research as needed.

This project will dedicate two-person years of DVRPC modeling staff time to prepare traffic forecasts throughout the I-95 corridor in Pennsylvania and on other District 6 projects as required. The staff members will report to the Manager, Office of Travel Trends and Forecasts, and work with other staff as needed to prepare traffic forecasts and other modeling services.

New traffic data and forecasts are needed for several tasks. These include analyzing additional interchange configurations to improve safety, reduce congestion, and address community concerns; support new or updated Point-of-Access (POA) studies; extend the horizon year of previous traffic forecasts in the corridor; analyze and plan for future freight activity; and prepare detour route forecasts for later construction phases.

Tasks

- 1. Coordinate with PennDOT and their consultants; attend meetings and make presentations as needed.
- 2. Focus and calibrate regional travel demand model on the I-95 corridor, and other facilities as needed.
- 3. Conduct computerized traffic assignments to determine horizon year traffic volumes under No-Build and Build scenarios.
- 4. Prepare average weekday daily traffic (AWDT) traffic volumes for I-95 mainline, ramps, and selected facilities impacted by the I-95 scenarios throughout Sectors A, B, C, and D.
- 5. Prepare AM and PM peak hour traffic forecasts, including intersection turning movements for the No-Build and Build scenarios, as needed.
- 6. Collect, tabulate, and/or process origin-destination and travel time data, as needed.
- 7. Prepare forecasts to evaluate the impact of new or improved transit connections on highway patterns, volumes, and interchange operations, as needed.
- 8. Prepare forecasts to evaluate the impacts of new land uses and/or redevelopment on travel patterns, volumes, and interchange operations, as needed.
- 9. Prepare maps and tables for transmittal of the data and travel forecasts to PennDOT and their consultants.
- 10. Prepare technical memorandums documenting the results of the travel forecasting; incorporate any comments from PennDOT and their consultants.
- 11. Continue supporting PennDOT's consultants for US 422 and the Market Street Bridge Closure modeling efforts.
- 12. Provide daily traffic forecasts the six proposed movements at the I-95 and PA Turnpike interchange.

This project will improve the efficiency of the region's transportation network by preparing special sub-regional studies to supplement core planning efforts.

Through the Supportive Regional Highway Planning Program (SRHPP) and Transit Support Program (TSP), DVRPC passes through federal funds to member governments to support their core planning functions and their participation in the regional transportation planning process. The funds assist these organizations to develop and maintain their own plans, programs and data which helps inform the development of regional plans and programs such as the TIP, Long-Range Plan, and Congestion Management Process. In addition to providing direct support, both programs offer a limited amount of funding for special planning studies to address current areas of need for the recipients. In some cases, the recipients pass back the Special Study funding and request that the studies be conducted by DVRPC staff because of some specific expertise or staff capacity. Detailed individual scopes of work for each Special Study are found in Chapters Three and Four of this document. This project represents the tasks and combined budgets of those Special Studies.

Tasks

MPMS# 117928 Travel Options Program(TOP) 2022-23

LIMITS: Districtwide No Let Date

IMPROVEMENT Other NHPP:

MUNICIPALITIES: FC: AQ Code:X1

PLAN CENTER: IPD:

PROJECT MANAGER: Jim Mosca CMP:

This work program supports the delivery of the regional transportation demand management (TDM) program (with administration and coordination tasks funded separately under project 23-52-100).

TDM focuses on the many options available to residents to travel to and from work, as well as to get around our region for other purposes, in a coordinated, cost-effective, and environmentally-positive way. It involves the strategies that more efficiently distribute travel demand across all modes, and especially reduce SOV travel. An important element of TDM is providing education and outreach to commuters, employers, residents, and visitors within our region about available travel options, and providing a mix of incentives to encourage behavior change toward more efficient use of the regional transportation system.

Recent major technological developments have changed the way the public considers and makes transportation choices. Mapping applications in wide use, like Waze and Google Maps, are themselves a form of TDM, enabling a more efficient use of transportation networks, but they dont necessarily reduce SOV demand. New mobility options like ride-hailing services (uber, lyft, etc.), bike share, and ebike and e-scooter rentals are being developed and evolving rapidly, and are increasingly linked into shared scheduling and trip purchasing platforms mobility as a service (MaaS). These new technologies and modes, and the changes to travel patterns they have enabled, have also led to more exploration of larger TDM-related policy initiatives such as variable road pricing, trip-reduction plans, and transportation benefit ordinance requirements. All of these conditions warrant novel consideration of which TDM strategies can work most effectively in the greater Philadelphia region; therefore a Regional TDM Plan was developed and is used as a guide for these efforts.

Although DVRPC has long included TDM as an element in many individual projects and efforts, there was not a formal, coordinated TDM program for the full DVRPC service region until FY21. This new competitive and coordinated program of projects and activities helps DVRPC and its planning partners better address growing transportation-related needs and challenges, particularly the need to provide connections to various safe and affordable transportation modes, and to reduce congestion and improve air quality. In coordination with the development of the Commissions 2050 Long-Range Plan, new regional TDM direction and efforts will allow for a broader, more strategic approach to TDM in the region, which differs from the service area-based approach used now.

A uniform, performance-based and outcome-driven approach to evaluating and undertaking projects will help staff and stakeholders strengthen existing TDM programs, and pilot new initiatives that can serve as a foundation for the future regional TDM portfolio. Completion of this work may require the purchase of equipment or services. Beginning in FY23, this program will be funded largely with Surface Transportation Block Grant funds (also called STU in PA), instead of Congestion Mitigation Air Quality (CMAQ) funds; however, some projects in DVRPC's NJ counties (especially outside of the Philadelphia Urbanized Area) will continue to be partially funded with CMAQ dollars. Staff are familiar with the eligibility requirements for CMAQ funds from the previous TOP funding cycle, so can properly evaluate any projects submitted in the geographic areas that will require CMAQ instead of STBG funds; FHWA-NJ will also be consulted.

Tasks

1. With planning and administrative tasks funded under project 23-52-100, DVRPC will work with partners as appropriate to solicit and deliver projects showing demonstrable results related to the five principles in the Regional TDM Plan, in both PA and NJ. This may include managing vendor/provider contracts.

Obtain and record relevant data to support analysis of each activity's impact; strategy effectiveness will inform subsequent program rounds.

IMPROVEMENT Other NHPP:

MUNICIPALITIES: FC: AQ Code:X1

PLAN CENTER: IPD:

PROJECT MANAGER: Jim Mosca CMP:

This project will fund and guide the TMAs & contractors that will work with employers & encourage commuters to choose travel alternatives to the single-occupancy vehicle (SOV) through educational programming & relevant products & services within specific areas.

The Transportation Management Associations (TMAs) and other related partners in Southeastern Pennsylvania have helped promote Transportation Demand Management (TDM) options and programs for over two decades, in the form of two grants funded by PennDOT the TMA Assistance Grant (one available to all TMAs in PA), and the Trip Smart formerly Mobility Alternatives Program (MAP) grant (available only in Southeastern PA). For FY2023, DVRPC and PennDOT have created a TDM grant program that combines these two legacy grants into one new base TDM grant for each organization previously funded through one or both of the legacy grants. Each TMA/Contractor will contract and collaborate with DVRPC on work program development and implementation, along with their respective county planning department(s), PennDOT (Central Office and District- 6), and FHWA, to ensure relevant TDM issues and needs are addressed. Completion of this work may require the purchase of equipment or services.

Tasks

- 1. TDM education and outreach to the general public.
- 2. TDM education and outreach to employers and municipalities.
- 3. TDM education and outreach to other commute-related groups, professional organizations, community groups, etc.
- 4. Promotion of and assistance with the Share-A-Ride (SAR) ride match program and the Emergency Ride Home (ERH) program.
- 5. Locally-based projects that enhance commuters ability to choose a mode other than driving alone to work.

MPMS# 117931 Regional TOP Competitive Administration 2022-23

LIMITS: Districtwide No Let Date

IMPROVEMENT Other NHPP:

MUNICIPALITIES: FC: AQ Code:X1

PLAN CENTER: IPD:

PROJECT MANAGER: Jim Mosca CMP:

This project supports ongoing administration, strategic planning, and priority-setting work for the regional competitive Travel Options Program (TOP), which funds implementation of TDM projects in Southeastern PA.

In FY2021, DVRPC convened a new Regional TDM Advisory Committee with relevant partner agencies, which developed and help staff reach consensus on goals, objectives, and an initial Vision Statement for this new regional approach to prioritizing TDM strategies in the DVRPC region, and incorporating new efforts. This Committee also helped develop and prioritize strategies to guide the selected pilot projects for testing, and helped determine ways to measure performance and impact. This planning and administration work also includes ongoing peer/best practice assessment for successful historic and current TDM plans and programs, here and in other regions, and evaluation of current plans and data that can be used to inform new priorities.

This project can include development and oversight of competitive expression of interest (EOI) and project application process(es), and establishing tracking procedures for measuring the impact of the program's projects and tasks. It may include outreach on release of the EOI and subsequent updates on selected projects. DVRPC also manages the contracts and invoicing activities with each of the selected grantees under this program.

A performance-based and outcome-driven approach to developing, evaluating, selecting, and undertaking projects will help staff and stakeholders strengthen existing TDM programs, and determine new longer-term initiatives that can serve as a foundation for the regional TDM portfolio in future years. Completion of this work may require the purchase of equipment or services.

Tasks

- Convene regular meetings and/or workshops of the Regional TDM Advisory Committee, comprised of DVRPC member governments, State DOTs, transit agencies, partner MPOs and others, as appropriate, to continue providing input to and support for the Regional TDM Program.
- 2. Manage administrative functions associated with grants and reporting, as well as contract management and accounting activities.
- 3. Based on the outcomes of funded projects, including pilot programs, and relevant TDM practice nationally, further develop and prioritize strategies and pilot programs for testing in the DVRPC region, as well as ways to measure performance. Document historic and ongoing TDM activities, in our region and nationally, as applicable, and consider relevant, available plans and data that can be used to inform new regional priorities for action.
- 4. In collaboration with multiple departments across DVRPC, continue to monitor and report on COVID-related travel and behavior changes and their implications for TDM strategies, as relevant.
- 5. Review and revise, if necessary, the Regional TDM Plan (vision, goals, outcomes, and strategies) for our approach to TDM in the DVRPC region. Maintain a living strategic plan of priority TDM projects that builds on current activities and success, and also cultivates new strategies for trial, evaluation, and growth.
- 6. Based on the outcome of initial pilot projects, continue to develop proposed 'early action' projects for advisory committee consideration, with programs added to PA and NJ TIPs as appropriate.

MPMS# 117936 Regional Electric Vehicle Plan 2022-23

LIMITS: Districtwide No Let Date

IMPROVEMENT Other NHPP:

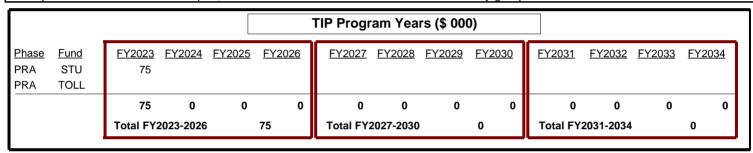

MUNICIPALITIES: Various FC: AQ Code:X1

PLAN CENTER: IPD:

PROJECT MANAGER: Jim Mosca CMP:

This project leads planning efforts to prepare the region for the anticipated increase in the number of battery electric vehicles (EVs) in the DVRPC region.

The past few years have seen tremendous growth in the use of electricity in transportation. This includes private passenger vehicles, public transit buses, and delivery vehicles. This transition to electrification of the transportation sector presents a wide range of planning challenges. DVRPC has supported this transition through several projects, including developing an EV readiness plan ("Ready to Roll!") funded by a US Department of Energy grant. In addition, DVRPC has worked with the Plug-in Hybrid & Electric Vehicle Research Center at University of California, Davis (UCD), to develop the "Planning for Electric Vehicles - Mapping Vehicle Distribution and Workplace Charging Demand" tool to help planners understand the locations where electric vehicle charging demand will be greatest. A web-based resource on EVs for municipalities has also been developed, and DVRPC staff serve on numerous EV advisory groups in PA and NJ.

LIMITS: No Let Date

IMPROVEMENT Bridge Repair/Replacement NHPP:

MUNICIPALITIES: Norristown Borough FC: AQ Code:S19

PLAN CENTER: IPD:

PROJECT MANAGER: EE/J. Brown CMP:

This project is a breakout of the US 202 Section 510 project (MPMS #80021) currently in construction and scheduled for completion in Fall 2023. The project will rehabilitate the existing stone arch bridge that is currently in poor condition. The repairs to the bridge include stone masonry repairs, repointing of mortar joints, scour protection, replacing stone barriers with concrete moment slab barriers with stone facing, and removal of soil cover and backfilling with lightweight concrete fill. The proposed improvements also include full-depth pavement reconstruction of the Markley Street approaches and side road adjustments on Elm Street, curb, sidewalk, Americans with Disabilities Act (ADA) curb ramps, signing and pavement markings, utility relocations and a new traffic signal. Work will be performed under a full detour (southbound Markley Street car detour - 0.6 miles; southbound Markley Street truck detour - 2.0 miles; northbound Markley Street detour - 3.3 miles; Elm Street detour - 0.9 miles).

IMPROVEMENT Bicycle/Pedestrian Improvement NHPP:

MUNICIPALITIES: Plymouth Township; Whitemarsh Township FC: AQ Code:A2

PLAN CENTER: IPD:

PROJECT MANAGER: Jonathan Korus CMP:

Federal earmark funds were awarded to this project under the Consolidated Appropriations Act of 2023 in the amount of \$2,500,000. The project will extend the Cross County Trail from its current terminus at the Germantown Pike/Chemical Road intersection in Plymouth Township east to Joshua Road in Whitemarsh Township. It will include a new pedestrian-only bridge over Germantown Pike and a 1.9-mile trail segment. To the maximum extent feasible, the trail will be designed and constructed to meet multi-use Circuit Trail standards, including an off-road alignment and a paved width of 10-12'. The Cross County Trail is part of The Circuit Trails network and this segment will serve as an important local and regional transportation resource.

The Circuit is a planned 800-mile interconnected network of multi-use trails spanning Greater Philadelphia with Philadelphia and Camden as its hub, and is included in DVRPC's Long-Range Plan. Existing and future Circuit Trails are required to meet minimum design standards (10-feet wide, paved, and separated from traffic with limited exceptions) to reflect their intended use as the arteries of a dedicated, regional, non-motorized transportation system.
