		IPD:					
CMP: Minor SOV Capacity		CMP Subcorridor(s): 3A, 3B					
		NHPP: FC: CMP: Minor SOV Capacity					

This project will fund analysis and planning efforts by a system integrator to support the District 6 Regional Traffic Management Center (RTMC) activities, and the regional ITS and traffic management elements deployed and proposed along expressway and arterial corridors. This will involve planning phases with deployment as a separate effort. The system integrator will support defining any potential implementation and operational strategies, and assist in developing a comprehensive strategic deployment plan (including estimate costs) along the corridors. Tasks will include ITS design review (prepared by others), video and data sharing support, ITS reporting and equipment management, ITS maintenance coordination support, communications and fiber management system support, and other similar activities.

MPMS# 63406 Complete Streets Resurfacing	Program	
LIMITS: Regionwide		No Let Date
IMPROVEMENT Bicycle/Pedestrian Improvement		NHPP:
MUNICIPALITIES: Various	FC:	AQ Code:NRS
PLAN CENTER:		IPD:
PROJECT MANAGER: ADE Services	CMP: Not SOV Capacity Adding	

The purposes of this project are to (1) place an engineering consultant on retainer to undertake the necessary design work to retrofit bike lanes and bicycle-friendly shoulders where appropriate, coincident with resurfacing projects and (2) maintain existing and future bicycle facilities, including installation, maintenance, and replacement of striping and damaged and missing signs. Work would include bike lanes, edge line striping, signs, and revising traffic signal permit drawings to continue edge line revisions through signalized intersections. Work would be limited to Bucks, Chester, Delaware, Montgomery counties, and the City of Philadelphia.

There is a collaborative process in place with the four counties, PennDOT District 6-0, DVRPC, and the Bicycle Coalition of Greater Philadelphia which has developed potential projects in corridors with bicycling activity or where there is a latent demand for bicycling if bicycle-friendly facilities were provided. Continuation of this process will permit this funding to be used on the projects already developed or other projects that the group may develop.

MPMS# 65109 Transit Flex - SEPTA		
LIMITS: System-wide		No Let Date
IMPROVEMENT Transit Improvements	NHPP:	
MUNICIPALITIES: Various	FC:	AQ Code:M1
PLAN CENTER:		IPD:

PROJECT MANAGER: David Alas

CMP: Not SOV Capacity Adding

This project is a placeholder of the highway funds that PennDOT has "flexed" for transit use in the DVRPC region as part of the Planning Partner Financial Guidance. SEPTA may choose to use these funds to supplement its other federal and state funding for any capital project.

Each year SEPTA will apply these "flexed" funds to one of its other projects in the TIP, but may choose to apply them to a new project through the TIP amendment process.

FY 2013-2020 funding in the amount of \$136,664,000 has been applied to MPMS# 90512, SEPTA Bus Purchase Program.

SEPTA will continue to utilize FY 2021-20224 FHWA Transit Flex funding in the amount of \$68,332,000 to support the SEPTA Bus Purchase Program (MPMS #90512).

LIMITS: Districtwide		No Let Date
IMPROVEMENT Intersection/Interchange Improvements	NHPP:	
MUNICIPALITIES: Various	FC:	AQ Code:S6
PLAN CENTER:		IPD:
PROJECT MANAGER: Traffic/A. Patel CMP: Not Yet Determined		

District 6-0 will advertise a project for "Intersection Safety Implementation Plan" to address the top ranked feasible locations. The district will identify a typical set of improvements for each of the countermeasures from which PennDOT will consider and select the most appropriate, and implement. Prioritization will involve a dual approach - working down the provided 2021 HSNS intersections list, as well as focusing on locations that are on the statewide cluster list. The PENNSHARE GIS map will be utilized to overlay the 2021 HSNS and Penndot Cluster list which will result in the addressing of safety needs on a corridor basis for highest efficiency. The district intends to use this as a tool to track and report the progress. The project is scalable – it will have the flexibility to add/delete locations depending on funding availability.

This project will implement systematic safety improvements at stop-controlled and signalized intersections, such as basic signing and pavement markings, and may include larger projects to improve sight distance and intersection geometry. This project will also implement systematic safety improvements, such as signing, Rapid Rectangular Flashing Beacons, vertical deflection (speed humps, speed slots), high visibility crosswalks, pedestrian or cycling legends, signal timing, and coordination with closely spaced signals. These countermeasures will be constructed to reduce the number and severity of crashes.

District 6-0 will advertise a systemic project to address interchange ramp locations with a higher potential for wrong way entrance to a limited access highway. Priority will be given to locations identified by Central Office. Countermeasures to be used include signing and pavement markings, wrong way arrow legends, raised pavement markers, guiderail safety enhancements, tree trimming and removal, lane realignment, and delineation. From these countermeasures the designer will consider and select the most appropriate, obtain PennDOT approval, and implement. The project is scalable – it will have the flexibility to add/delete locations depending on funding availability.

This signal re-timing program provides for the evaluation of existing signals along an identified corridor, with the goal of improving traffic operations along said corridor through revised signal timing plans. The program was implemented first using corridors identified in the City of Philadelphia, with the goal of expanding a successful program to other counties. The selected vendor would collect current traffic data, compare it against the functioning signal timing, and prepare and implement a revised signal timing plan on approval of the PennDOT's District 6.

PLAN CENTER:		IPD: 1
PROJECT MANAGER: Gannett/B. Masi	CMP: Minor SOV Capacity	

This project is a breakout of MPMS# 88616, and will operate in the suburban counties of Bucks, Chester , Delaware, and Montgomery as part of the Expressway Service Patrol contract for an additional two years. The program will provide for the operation of emergency service patrols on congested state highways to detect and clear incidents rapidly by providing emergency assitance to stranded motorists. Approximately half of all delays experienced by highway users in congested areas are caused by traffic accidents, vehicle breakdowns, and other incidents. Prompt incident management programs such as this, can reduce delay's significantly. Service will be provided on 50 linear miles including: I-76 from Philadelphia to PA Turnpike; I-95 from the New Jersey State Line to the Bucks County line; I-476 from I-95 to the PA Turnpike; US Route 202 from I-76 to US 30; US Route 422 from Route 202 to Royersford; PA 309 from PA 63 to Easton Road; and US 30 from Business Route 30 to PA 10.

A separate contract for the Philadelphia Expressway Service Patrol (MPMS #91490) is currently programmed on the DVRPC TIP and utilizes

federal f	funding.

LIMITS: Haycock Township, Bucks County. Upper Hanover an IMPROVEMENT Bridge Repair/Replacement	Upper Salford Townships No Let Date NHPP:
MUNICIPALITIES: Haycock Township; Upper Hanover Townsh PLAN CENTER:	p; Upper Salford Townshi FC: AQ Code:S1:
PROJECT MANAGER: HNTB/N. Velaga CMP:	

Stoney Garden Rod over Kimples Creek: The proposed scope of work includes removal of the existing bridge and construction of a precast concrete box culvert with structure-mounted guide rail on a similar alignment. The project also includes the installation of scour protection measures. The structure will be slightly widened from the existing 23 foot curb-to-curb width to 24 feet.

Salford Street over Br. Perkiomen Creek: The proposed project will rehabilitate the existing masonry arch culvert structure, remove the bituminous pavement and earth fill; rebuild deteriorated portions of the spandrel walls and wingwalls; place lightweight concrete fill; construct a full-width moment slab over the structure with integral Type 10M barriers; and repair, clean, and seal the arch intrados. The approach and bridge roadway pavement will be replaced at full depth and the attached guide rails will be replaced in accordance with current standards. The curb-to-curb width will be widened from 19' to 20'. The Type 10M rail and guide rail will be painted brown. A detour, for traffic control, will be implemented during construction for approximately four months.

Church Road over Br. Perkiomen Creek: The proposed scope of work includes construction of a precast concrete box culvert with structuremounted guide rail to replace the existing bridge. The approach roadway will be replaced at full depth and guide rails will be replaced in accordance with current standards. The project also includes the installation of scour protection measures. The structure will be widened from the existing 24 foot curb-to-curb width to 28 feet.

MPMS# 106648 Sink Holes Line Item		
LIMITS: District Wide		No Let Date
IMPROVEMENT Roadway Rehabilitation	Ν	HPP:
MUNICIPALITIES: Various	FC:	AQ Code:X13
PLAN CENTER:		IPD:

PROJECT MANAGER: J. Korus

CMP: Not SOV Capacity Adding

This is the Reserve Line Item for sink hole repairs. A sinkhole is generally a circular hole or a depression in the ground that is caused by erosion and water drainage. The size of a hole can range from a few feet to a size large enough to engulf an entire building. It can suddenly appear without warning and may continue to grow after the initial collapse. Sinkholes are naturally part of Pennsylvania's landscape called karst and are considered a serious geologic hazard in central and eastern Pennsylvania.

MUNICIPALITIES: Various	FC:	AQ Code:NRS
PLAN CENTER:		IPD:
PROJECT MANAGER: EE/E. Elbich	CMP: Not SOV Capacity Adding	

Perform outreach on TDM options specifically to employers and employees located and/or working along the I-95 corridor currently under construction, in order to help reduce traffic congestion and improve accessibility to a variety of safe and affordable modes of travel during construction that can delay and reroute travel.

This project supports contractor work to educate targeted employers about TDM options and encourage them to implement commute alternative programs and benefits, as well as encourage commuters to choose travel alternatives to the singleoccupancy vehicle (SOV). Similar to the PA TDM Base program, but specific to this defined geographic area, this work can include educational programming, promotional materials and placements, and relevant services and programming.

PennDOT is in the midst of a long-term initiative to rebuild and improve I-95, a critical corridor for the movement of commuters and goods between the City of Philadelphia and neighboring counties. Delays from traffic congestion, already commonplace on I-95 during peak commute times, are further exacerbated by crashes and construction. Proactive steps are needed to ensure that the public is educated on both the nature and timing of these upcoming construction projects and made aware of alternative means of commuting that will help to lessen the impact of these projects on traffic flow.

The goal of the TDM implementation strategy is to help mitigate congestion on I-95 during (and beyond) construction by reducing the number of drivers on the road, particularly during AM and PM peak hours. With a considerable number of the region's workers adopting teleworking during the COVID-19 pandemic, there is a unique opportunity to utilize marketing efforts to promote the continuation of teleworking following the pandemic's end as a means to minimize traffic within the construction area.

To achieve this goal, the participating TMAs/subrecipients will engage in direct outreach to employers, employees, and residents of the targeted areas, as appropriate. A particular focus will be placed on minimizing a shift to SOV commuting along the I-95 corridor in the recovery from COVID-19, by promoting telework, biking, and transit use.

Tasks:

1. Develop two-year Work Programs, updated annually.

2. Ensure this work involves outreach to both employers located along or near I-95, and the general commuting public using this corridor.

3. Utilize the DVRPC communications guide and coordinated materials whenever possible; some may need to be revised or new ones created for specific construction segments or issues.

4. Plan and coordinate TDM education and outreach efforts and placement of relevant materials; using cooperative efforts whenever possible is encouraged.

5. Submission of monthly or quarterly invoices and reports for each of nine subrecipients.

MPMS# 110494 Regional Traffic Management Co	enter (RTMC) General Contract		
LIMITS: PennDOT District 6-0			Actl Let Date: 9/12/2019
IMPROVEMENT Signal/ITS Improvements		NHPP:	MRPID:236
MUNICIPALITIES: Upper Merion Township	FC	:	AQ Code:NRS
PLAN CENTER:			IPD: 20
PROJECT MANAGER: EE/E. Elbich	CMP: Not SOV Capacity Adding		

Regional Traffic Management Center (RTMC) planning, designing and building/commissioning of a facility to optimize the performance of the surface transportation network by expanding the current function of the freeway management systems to include active traffic management of dynamic junction control, flex lanes, and, part time shoulder use, ramp metering, multimodal coordination, and proactive management of traffic signals along major regional arterial corridors. In addition the RTMC will collect and process/disseminate real time transportation data in order to measure performance. This facility will be the technical and institutional hub to bring together the various regional jurisdictions, modal interests, and service providers to focus on the common goal of optimizing the performance of the transportation network.

The total cost estimate for this project is \$59,952,000. However, FHWA has indicated that federal funds are eligible on the RTMC but not for the parking structure as it will not be open to the public. As a result of this decision, PennDOT will be using \$48,152,000 for the RTMC and \$11,800,000 of Department of General Services (DGS) state funding for the parking structure.

IMPROVEMENT Other		NHPP:
MUNICIPALITIES: Various	FC:	AQ Code:NRS
PLAN CENTER:		IPD:
PROJECT MANAGER: ROW/B. Dicianno	CMP: Not SOV Capacity Adding	

PennDOT District 6-0 is federally required (23 CFR 750.705b) since 2006 to conduct regular surveillance and ongoing illegal sign surveillance for outdoor advertising devices.

The current surveillance must be completed before December 2024. An average of 16 approved sign per week must be surveilled, over a two year cycle, to meet the deadline for regular surveillance.

A total of 1,450 approved signs must be surveilled on a regular basis:

Bucks County – 300 signs Chester County – 150 signs Delaware County – 150 signs Montgomery County – 150 signs City of Philadelphia – approximately 700 signs

The ongoing surveillance of illegal signs will: 1) identify illegal signs for the purpose of legalization, 2) assure that signs erected comply, at a minimum, with size, spacing, and lighting, and 3) remove illegal signs expeditiously.

In addition, the District will continue to perform the administrative responsibilities of application processing be reviewing available documentation and conducting routine field inspections to make recommendations for approval or denial of Outdoor Advertising Device Permits. The District will also continue to log all signs identified as illegal and follow through with written requests for permit applications or removal of the signs.

IMPROVEMENT Other	NHPP:	
MUNICIPALITIES:	FC: AQ	Code:X1
PLAN CENTER:		IPD:
PROJECT MANAGER: David Alas CMP:	Minor SOV Capacity	

This project will promote more efficient and cost-effective use of the existing transportation network.

Federal metropolitan planning regulations require MPO's to incorporate transportation operations into their transportation planning processes. DVRPC addresses that requirement through the conduct of two long-standing related initiatives. The Transportation Operations Program Area and the Transportation Systems Management and Operations Project (23-52-170) highlight key activities undertaken by these programs. The Transportation Operations Program incorporates Transportation Systems Management and Operations Systems Management and Operations Project (23-52-170) highlight key activities undertaken by these programs. The Transportation Operations Program incorporates Transportation Systems Management and Operations (TSMO) strategies to help proactively manage the transportation system by addressing recurring and non-recurring congestion which results in trip reliability, emissions reductions, improved safety, and efficiency. These principles are integrated into DVRPC's planning processes.

This year's work program is divided into four major components: Traffic Incident Management (TIM), Regional Traffic Signal Retiming, Transportation Operations Task Force (TOTF), TSMO planning efforts and technical assistance.

DVRPC implements Traffic Incident Management (TIM) by providing a series of focused, best-practice training and resource-sharing Traffic Incident Management sessions for incident emergency responders comprised of relevant transportation departments including Pennsylvania and New Jersey Department of Transportation, Pennsylvania Turnpike Commission, Pennsylvania and New Jersey State Police, City of Philadelphia, local law enforcement, local fire departments, emergency medical services, county 911 communications, public works departments, towing and recovery companies, hazardous materials clean-up contractors, and other appropriate regional agencies. These sessions termed Incident Management Task Forces (IMTF) are held quarterly for 8 different groups that were established based on high traffic corridors in the region. In addition to the eight Incident Management Task Forces, DVRPC supports other efforts in the region as needed, and serves as the regional clearinghouse for regional incident management activities. IMTFs implement the planned and coordinated multi-disciplinary process to detect, respond to, and clear traffic incidents so that emergency responder safety issues are addressed, traffic flow is restored as quickly and efficiently as possible thereby reducing the duration and impacts of traffic incidents and non-recurring congestion, incident management responses are improved, and interagency coordination is fostered. Typical activities include incident after action reviews , specialized training on the detection, response, and recovery of traffic incidents, and a feedback-loop for relevant construction projects and ITS deployment.

In Pennsylvania, the Philadelphia IMTF includes working with Philadelphia agencies and PennDOT to improve the operations of expressways in the city, with a major emphasis on operational planning for the reconstruction of I-95. DVRPC also continues to manage the IMTFs in Bucks County, Chester County, Delaware County and Montgomery County (with special outreach as needed for the I-76 Integrated Corridor Management and I-476 Travel Management Projects). In New Jersey, DVRPC continues to manage the NJ SAFR (Southern Area First Responders) IMTF, which covers Gloucester and Camden Counties, and the Burlington and Mercer County IMTFs. Additionally, DVRPC participates in other incident management programs including both statewide Pennsylvania and New Jersey efforts, and IMTFs initiated by other agencies.

DVRPC will hold a Regional IMTF Conference in FY 2023 with support from regional IMTF leaders, as well as hold topical specialized training session(s) to be determined.

Traffic signals play an important role in the transportation network, and county and local arterial roadways are increasingly being called upon to carry more users. FHWA estimates that many signals on these arterials could be improved by updating equipment or by simply adjusting and updating the timing plans. Outdated or poor traffic signal timing accounts for a significant portion of traffic delay on arterials. Traffic signal retiming is one of the most cost effective ways to improve traffic flow and is one of the most basic strategies to help mitigate congestion and reduce emissions. It improves the mobility and safety of the street system, and decreases congestion and delay while improving travel time and travel time reliability.

DVRPC will continue to support the Pennsylvania Regional Signal Retiming Initiative effort by working with PennDOT District 6 and the counties to choose corridors for retiming, provide cost/benefit emissions benefit data, and serve on the project team. DVRPC will be supporting the New Jersey Regional Signal Retiming Initiative Program by working with a consultant and stakeholder team to choose corridors for retiming and serve on the project team as coordinator.

Quarterly meetings of DVRPCs Transportation Operations Task Force (TOTF) are the focal point of coordinating transportation operations activities in the region, providing highway and transit operators and emergency responders an opportunity to interact with each other. The Task Force is a forum for agencies to share information on various TSMO and ITS deployments and incident management programs, develop a consensus on regional ITS issues and respond to federal initiatives. As a technical-level group, it may often guide DVRPC's Transportation Operations planning activities that in turn support the Task Force members.

## Pennsylvania - Highway Program (Status: TIP)

#### Various

As an ongoing TSMO planning effort to support our stakeholders, DVRPC continues to either maintain or update several regional operational efforts such as the Regional ITS Architecture, Transportation Systems Management and Operations Master Plan, and PennDOT District 6-0 Regional Operations Plan.

As part of project development, staff review and make recommendations for DOT infrastructure projects to incorporate ITS and TSMO operational improvements. In FY 2022, DVRPC will continue to produce periodic bulletins to highlight incident management and transportation operations data as available. DVRPC will continue to provide planning and technical assistance on transportation operations for partners as requested. In addition, DVRPC will continue to investigate innovative programs related to transportation systems management and operations.

This work program is subdivided by the four components described above. Some of these activities may require DVRPC to purchase equipment and/or services.

#### Tasks

Incident Management Task Forces Tasks

1. Continue to manage and implement resource sharing for the 5 Pennsylvania (Bucks, Chester, Delaware, Montgomery and Philadelphia County) and 3 New Jersey (Burlington, Mercer and NJ SAFR) Traffic Incident Management Task Forces as an on-going training program. 2. Prepare notices for each session, identify and line up speakers, develop agendas, and prepare summaries and training materials and distribute to all stakeholders.

3. At each session, conduct Post-Incident debriefings a.k.a. After Action Reviews (AARs) which examine events that occurred in the past in order to review and assess the process, procedures and actions performed, and to identify best practices, lessons learned, and potential new protocols which will reduce delay.

4. Work with the task forces to address operational and traffic management issues as needed that may include ITS equipment deficiencies, detour routes, traffic management plans, incident management plans, incident management policy and procedures, communications, severe weather preparedness and work zone traffic management.

5. Educate Responders regarding Active Traffic Management strategies, including working with PennDOT project managers to bring responders and design consultants together to engage responders in identifying issues to consider in the final design of relevant capital projects and ITS deployment.

6. Construction Project Coordination Discussions bring together responders and construction projects managers and implementers to review construction and work zone stages, address incident response zones and identify different ways to access a crash in a work zone if needed.
7. TIM Performance Measure Data Analysis. Work with partner agencies and collect TIM data regarding time of lane closures, and incident duration. These measures will be tracked and measured over time and will be presented and or produced in periodic data bulletins.
8. Promote and provide the PA and NJ Statewide Responder Training sessions, specialized training session(s) to be determined, and various online TIM Training efforts.

9. Social Media awareness campaigns for quick clearance

10. Hold Regional TIM Conference. Identify topics and speakers, prepare all materials, and arrange training demonstration.

11. Participate in New Jersey's Statewide Traffic Incident Management Program and Pennsylvania's PennTime Program and any other TIM programs initiated by state agencies and other agencies.

12. Provide technical support, including mapping services, GIS, and other assistance as requested.

Traffic Signal Optimization Tasks

1. Provide technical and policy assistance to PennDOT as it advances the concept of retiming and optimizing traffic signals on a regional basis for Pennsylvania's DVRPC Counties. Attend relevant meetings as requested.

2. In cooperation with PennDOT and DVRPCs Pennsylvania counties, select which traffic signals will be chosen for retiming.

3. Provide technical and policy assistance to the New Jersey Regional Signal Retiming Initiative Program.

4. In cooperation with NJDOT, and NJ's DVRPC Counties, select which traffic signals on 500 and 600 numbered routes will be chosen for retiming.

5. Participate in all kick-off, planning, and coordination meetings related to the regional program.

#### Transportation Operation Task Force

1. Host the quarterly Transportation Operations Task Force. Prepare notices, agendas, identify specialized topics, arrange speakers, prepare and distribute summary materials

2. Support multimodal planning efforts and coordination with various transportation agencies

3. Promote and educate regional agencies and public on TSMO strategies such as active traffic management principles and issues.

4. Continue the regional construction coordination efforts to minimize traffic impacts of overlapping construction projects.

5. Provide a feedback loop to DOTs and other transportation operators on design and operational issues for relevant construction projects and ITS deployment.

#### TSMO Planning Efforts

1. Maintain the Regional ITS Architecture for the Delaware Valley. Work with local stakeholders to ensure consistency between the regional architectures and their project architectures. Continue to coordinate with NJTPA, NJDOT, and PennDOT with their regional and statewide ITS Architecture updates.

2. Update and/or maintain the Transportation Systems Management and Operations Master Plan as needed in coordination with the Long Range Plan updates.

3. Perform as needed any data collection and analysis of various travel data to identify trends in system performance across the network.

## Pennsylvania - Highway Program (Status: TIP)

#### Various

4. As part of project development, staff review and make recommendations for DOT infrastructure projects to incorporate ITS and TSMO operational improvements.

5. Continue to incorporate TSMO, including ITS investments, into the transportation planning process. Evaluate capital projects for their consistency with the Transportation Systems Management and Operations Master Plan and assist agencies to advance projects identified in the Plan, PennDOTs Regional Operations Plan, or in the Regional ITS Architecture.

6. Monitor federal ITS programs, regulations, and initiatives to identify which ones may impact projects in the region.

#### Products

Transportation Operations Task Force Products

- 1. Transportation Operations Task Force meeting agendas, summaries, and meeting materials.
- 2. Regional Operating Agency Contact List
- 3. Provide topical specialized training session(s) to be determined.

#### Incident Management Task Force Products

- 1. Incident management task force training sessions agendas, summaries, and resource materials.
- 2. IMTF policy and procedures guidelines, training aids, maps depicting response areas, and other relevant materials identified by IMTF members.

AARs summaries for distribution to all task force members to inform them of best practices, lessons learned, and possible new protocols to reduce traffic delay.

- 4. Conduct expanded Formal After Action Reviews and prepare reports
- 5. Traffic congestion analysis
- 6. Incident Duration and lane closure tracking analysis
- 7. Produce periodic bulletins to highlight incident management and transportation operations data as available.
- 8. Roster and contact information of regional emergency agencies
- 9. Marketing Materials such as the Social Media Campaign Tool Kit for Quick Clearance and Move Over Laws

Traffic Signal Optimization Products

- 1. Products developed for both the Pennsylvania and New Jersey Signal Retiming Programs.
- 2. MOU and concept of operations for each corridor when necessary.
- 3. Proposed and final signal timing plans
- 4. Implementation of Optimized Signal Timing Plans
- 5. Technical Memorandum which can include Performance Measures such as Travel Time, Delay, stops and fuel consumption.
- 6. Corridor Summary fact sheets

#### TSMO Planning Efforts

- 1. Maintenance of the ITS Regional Architecture.
- 2. Maintenance of the TSMO Master Plan.
- 3. Implementations of programs to foster interagency cooperation.

MPMS# 115968 Travel Monitoring 2022-23				
LIMITS: Districtwide			No Let	i Date
IMPROVEMENT Other		Ν	HPP:	
MUNICIPALITIES:	F	FC:	AQ Co	de:X1
PLAN CENTER:				IPD:
PROJECT MANAGER: David Alas	CMP:			

This program will improve efficiency of the regions transportation system by collecting and analyzing traffic data to determine the utilization of the regions transportation network.

This ongoing regional program collects and processes travel data, the primary form being traffic counts, including hourly and 48-hour traffic volumes, for selected locations on the regional highway network. Data collected will provide input to Vehicle Miles Traveled (VMT) forecasting, the Traffic Monitoring System (TMS), the Congestion Management System (CMS), travel simulation models, individual project level analysis, traffic monitoring, and trend analysis. This information is vital to all project studies that address highway deficiencies and proposed solutions. Traffic count information from the database may be queried at https://www.dvrpc.org/webmaps/TrafficCounts/. The program is supported by funding from various sources. Because this is a regional program, the federal PL funds help support the operations and infrastructure required as base elements to run a travel monitoring program region wide. These base elements include the leases on a fleet of travel monitoring vehicles, operations and maintenance of those vehicles, an inventory of data collection and safety equipment, editing, processing and uploading of the count data into the database system which feeds the count viewers on the DVRPC website

To facilitate uninterrupted data collection, it will be necessary to procure new counting equipment, supplies, repairs, or services as needed.

Tasks

1. Coordinate with PennDOT, NJDOT, and member governments to review traffic count locations.

2. DVRPC will conduct traffic counts for PennDOT at assigned locations, with at least 40% of assigned locations being classification counts, if the total assignment cannot be reached then the percentage of classification counts will be increased until total assignment amount is reached even with 100% of assigned locations being classification counts.

3. Establish weekly schedules, staff assignments, and control procedures.

4. Collect traffic data at approximately 3,000 selected locations.

5. Process counts, edit for quality control, upload data into the DVRPC Traffic Count Database.

6. Maintain and further automate traffic data systems and procedures to enhance productivity, including data obtained by third parties via remote sensors, etc.

7. Submit counts collected during the year electronically by specific deadlines established by PennDOT and member governments.

8. Maintain an inventory of data collection and safety equipment, including purchasing new equipment with enhanced technology and capability, purchasing needed supplies such as road tube, and procuring necessary repairs if existing equipment gets damaged.

 Collect travel data from non-highway modes, including pedestrian, bicycle and public transportation travel system characteristics and user traits as requested.

10. DVRPC will also coordinate with PennDOT and NJDOT, the counties, and cities on the collection and validation of data on the local transportation asset inventory (as requested).

PROJECT MANAGER: David Alas CMP:		

The focus of this continuing project will be to integrate transportation data developed by federal, state, and local governments and DVRPC into a regional database that allows for the open exchange of data. This project benefits all member governments and agencies by providing support to DVRPC to develop and coordinate transportation data development and data sharing and includes the continued growth of DVRPC's transportation GIS system, including the update and maintenance of it's web mapping and data sharing capabilities. Efforts are being coordinated with NJDOT, PennDOT, member governments, and operating agencies to maximize the investments made in technology and data.

MPMS# 115970 Air Quality Action Supplementa	l Services									
LIMITS: Districtwide			No Let Date							
IMPROVEMENT Other		NHPP:								
MUNICIPALITIES: Various	F	C:	AQ Code:X1							
PLAN CENTER:			IPD:							
PROJECT MANAGER: David Alas	CMP:									

This project will improve the region's air quality by encouraging public action to reduce air pollution and protect public health through the Air Quality Action program, an episodic, voluntary program for ground-level ozone and fine particulate matter (PM 2.5).

This project will fund supplemental services performed by contractors in the implementation of the Air Quality Action program. Services may include design and production of education and outreach materials; advertising, printing, and placement of advertising through the media (television, online, radio, and in newspapers), social media (ads, sponsored posts, short videos, and text messages), and placebased advertisements.

Advertisements will educate the public about ozone and PM 2.5 pollution and encourage actions to reduce activities that contribute to air pollution, especially on days that are forecast as unhealthy for people susceptible to ozone and PM 2.5 pollution.

This project will support partner efforts to discourage idling, utilize alternative commuting strategies, take public transit, and to alert the public of poor air quality days based on the air quality index; focus of materials may change depending on the audience and messaging from EPA/DEP.

Tasks

1. Contract for the design and production of advertisements and promotional literature such as brochures, posters, flags, anti-idling signage, and educational materials including social media posts, texts messages and videos.

2. Contract for the placement of advertising on radio, television, web, place-based, or newspapers.

MPMS# 115971 Transportation Systems Management and	nd Operations (TSMO)	
LIMITS: Districtwide		No Let Date
IMPROVEMENT Other	NHPP:	
MUNICIPALITIES: Various	FC:	AQ Code:X1
PLAN CENTER:		IPD:
PROJECT MANAGER: David Alas CMP:		
This project will ease traffic congestion and improve the efficience coordination and integration of Intelligent Transportation System Federal metropolitan planning regulations require MPOs to inco processes. DVRPC addresses that requirement through the con Program Area (23-52-050) and the Transportation Systems Man programs. The Transportation Systems Management and Opera transportation system by addressing recurring and nonrecurring information services, safety service patrols, work zone managen safety, help reduce traveler delays and improve information acce make the region more cohesive, and enhance communications a	ns (ITS) with Transportation Systems Management and proporate transportation operations into their transportation nduct of two longstanding related initiatives. The Transport nagement and Operations Project highlight key activities ations (TSMO) Project incorporates strategies to help pro- congestion. Strategies such as traffic incident management, and freight management improve system efficience ess. Successful integration of these and other TSMO st	Operations. on planning ortation Operations s undertaken by these oactively manage the ment, traveler sy, enhance public
DVRPCs TSMO program encompasses a wide range of activitie centerpiece is the Regional Integrated Multi-modal Information S communications backbone among transportation operation cent center and field personnel to view traffic video feeds in the regio	Sharing (RIMIS) project, an information exchange netwo ters throughout the region. A virtual video wall compone	ork functioning as the
RIMIS became operational in 2010 and since it is managed by th and operational information from NJDOTs database. To receive Conditions Reporting System (RCRS) was constructed in FY 2010 Compared to the standard	PennDOT incident information, a data interface to Penn 11. A data interface to the City of Philadelphia Streets I	nDOTs Road Departments Road

Permit system provides street closure information related to events such as utility work, block parties, special events, and construction. This not only greatly increased the amount of usable data for RIMIS users, but was a critical project for the Philadelphia Traffic Management Center. DVRPC has continued to roll out RIMIS to regional transportation agencies, county 911/emergency management centers, local police and fire departments in major corridors, and counties' engineering/public works departments in New Jersey as requested. Assistance in using RIMIS in local municipalities for Integrated Corridor Management (ICM) purposes is offered, especially with respect to the I-76 ICM Project in Pennsylvania.

In FY 2023, the primary emphasis will be operating and maintaining RIMIS software, continuing to expand the number of agencies participating in RIMIS, continued exploration of the RIMIS SPATEL tool, and working with the agencies to ensure quality control of RIMIS data. As the number of RIMIS users has grown, it is becoming more essential to coordinate with our RIMIS users, monitor usage, and rapidly address any issues that they may be encountering.

Other focus areas of DVRPCs TSMO program include updating DVRPCs Interactive Detour Route Mapping (IDRuM) application, providing training programs for ITS operators and emergency response personnel, monitoring performance measures, security planning, and providing technical assistance to agencies.

IDRuM is being enhanced and updated into a new online web version. IDRuM is designed to give emergency responders access to the detour routes that allow them to be prepared when an incident occurs on a nearby highway. Typically traffic is diverted off the highway onto the arterial network and those arterials often become congested. By planning these routes and identifying key control points, local police can provide traffic control assistance to help ease the flow of traffic in their communities. The new online version was rolled out for Pennsylvania detours in FY2021 and work continues this year to incorporate the New Jersey detour routes.

There continues to be emphasis placed on integrating the use of performance measures into strategic and operations planning. One of the primary outcomes that operations programs strive for is reduced congestion, and typical performance measures include travel times and travel time reliability, which tell us that conditions are better or worse than in the past. DVRPC will continue to work with our stakeholders to develop a consistent approach where applicable to define the proper measures, collect and analyze the data, and report on our regions performance measures.

Activities listed below fall under two broad categories: RIMIS and Other TSMO Tasks. The former includes Operations and Maintenance (O&M) tasks performed by the software vendor (TRANSCOM) and DVRPC supervisory/technical activities associated with RIMIS. The latter category includes DVRPC staff activities that support programs for greater integration among the regions TSMO stakeholders, and more general activities. Some of these activities may require DVRPC to purchase equipment and/or services.

Tasks RIMIS Software Vendor Tasks

## Pennsylvania - Highway Program (Status: TIP)

#### Various

- 1. Software vendor will perform software operations and maintenance functions.
- 2. Software vendor will function as the system administrator, adding additional ITS devices to the RIMIS database and modifying the highway and transit network as required.
- 3. Software vendor will make enhancements to RIMIS software as directed.
- 4. Software vendor will assist RIMIS agencies in developing data interfaces with legacy software systems as required.
- 5. Software vendor will periodically meet with DVRPC and the users to review RIMISs status and discuss and resolve operational issues.

DVRPC RIMIS Tasks:

1. Coordinate software vendors activities with the RIMIS users and the Transportation Operations Task Force.

- 2. Supervise the RIMIS software vendors adherence to its contract.
- 3. Review and approve all invoices and progress reports with respect to the RIMIS software vendor.
- 4. Organize training programs for RIMIS users.
- 5. Work with software vendor to phase-in additional RIMIS users. This may include construction of additional data interfaces.
- 6. Perform system administration functions, such as modifying agency and user accounts, installing RIMIS software for users, developing video walls for users, and assisting the RIMIS software vendor in performing some of the other minor administration functions.
- 7. Perform quality control review of RIMIS information and its usage. Work with users to ensure that information entered into RIMIS is accurate and timely, and that agencies use RIMIS information to manage events.
- accurate and timely, and that agencies use RIMIS information to manage even
- Perform additional activities associated with RIMIS as the need arises.

#### Other TSMO Tasks

1. Continue and expand initiatives to enhance interagency information sharing and cooperation. Activities include providing technical assistance to operating agencies.

- 2. Continue to operate and maintain Interactive Detour Route Mapping (IDRuM). Work toward developing a new web version of IDRuM
- program, including using GIS to make necessary updates to the detours to reflect changes to any routes or construction activity. 3. Continue the regional construction coordination efforts to minimize traffic impacts of overlapping construction projects.
- 4. Continue to maintain the regions ITS Infrastructure Inventory.

5. Participate in appropriate security planning efforts by attending external meetings, webinars and other events such as the Delaware Valley Intelligent Center (DVIC) security roundtable quarterly meetings.

6. Continue to promote and provide training programs on TSMO and ITS strategies. These activities may include identifying training opportunities, hosting training courses, bringing in industry experts, sponsoring conferences on special topics, and arranging tours of ITS deployments within and outside of the region.

7. Continue coordination and participation with local and regional partners and their committees, such as The Eastern Transportation Coalition, Southeastern Pennsylvania Regional Task Force and the Philadelphia Local Emergency Planning Committee.

8. Continue to work with our stakeholders to develop a consistent approach where applicable to define the proper measures, collect and analyze the data, and report on our regions performance measures.

PROJECT MANAGER: David Alas	CMP:		

DVRPC continually strives to keep its travel simulation models up to date to ensure the accuracy of travel forecasts and to respond to the requirements associated with the FHWA conformity demonstrations, NEPA requirements, FTA New Starts program, and other environmental regulations. This project is for the updating and enhancing travel simulation models is especially important in the era of changing travel behaviors (post-COVID) and emerging travel technologies (e.g. autonomous vehicles). Major activities in the Enhance and Maintain Travel Forecasting Tools project include updating the highway and transit networks to reflect base conditions; enhancing the demand modeling methods to better present real-world travel behaviors and emerging travel technologies; calibrating and re-validating the models with current data; integrating emerging computer and software technology and new data sources to enhance the efficiency and credibility of the models; and supporting model applications to evaluate the impacts and benefits of various transportation investment and planning scenarios.

The goal of this project is to support the economic vitality of the region, improve accessibility and mobility for people, goods and services, protect the environment, enhance connectivity between modes, and promote the efficient management and operation of the existing transportation system by updating DVRPC's travel simulation models to state-of-theart standards and updating the data used in the model.

MPMS# 117904 PA Transportation and Comm	unity Development Initiative (TCDI) 2022-23	
LIMITS: District wide IMPROVEMENT Other		No Let Date
MUNICIPALITIES: Philadelphia City PLAN CENTER:	FC:	AQ Code:X2 IPD:
PROJECT MANAGER: David Alas	CMP:	

The Transportation and Community Development Initiative (TCDI) is a grant program that supports smart growth in the individual municipalities of the Delaware Valley through initiatives that implement the regions long-range plan, Connections 2050 Plan for Greater Philadelphia. Central to the effort is the objective to enhance quality of life choices by providing and maintaining essential infrastructure, supporting local and regional economic development, and linking land use and transportation planning.

TCDI provides a mechanism for our planning partners to undertake locally-directed actions to improve their communities, which in turn implements their local county comprehensive plans and supports the goals and vision of the regions long-range plan. This grant program seeks to support and leverage state and county programs, by providing funding to undertake planning, analysis or early-stage design projects which improve the efficiency of the regional transportation system.

Through a competitive selection process, DVRPC will award \$1.2 million to select projects in the 5-county Pennsylvania region which includes the counties of Bucks, Chester, Delaware, Montgomery and Philadelphia.

Tasks

1. Distribute \$1.2 million dollars to selected projects within Bucks, Chester, Delaware, Montgomery, and Philadelphia Counties.

This project will improve the efficiency of the region's transportation network by preparing special sub-regional studies to supplement core planning efforts.

Through the Supportive Regional Highway Planning Program (SRHPP) and Transit Support Program (TSP), DVRPC passes through federal funds to member governments to support their core planning functions and their participation in the regional transportation planning process. The funds assist these organizations to develop and maintain their own plans, programs and data which helps inform the development of regional plans and programs such as the TIP, Long-Range Plan, and Congestion Management Process. In addition to providing direct support, both programs offer a limited amount of funding for special planning studies to address current areas of need for the recipients. In some cases, the recipients pass back the Special Study funding and request that the studies be conducted by DVRPC staff because of some specific expertise or staff capacity. Detailed individual scopes of work for each Special Study are found in Chapters Three and Four of this document. This project represents the tasks and combined budgets of those Special Studies.

## Pennsylvania - Highway Program (Status: TIP)

Various		
MPMS# 117928 Travel Options Program(TOP)		
LIMITS: Districtwide		No Let Date
IMPROVEMENT Other		NHPP:
MUNICIPALITIES:	FC:	AQ Code:X1
PLAN CENTER:		IPD:
PROJECT MANAGER: David Alas	CMP:	

This work program supports the delivery of the regional transportation demand management (TDM) program for both PA and NJ counties within DVRPC's service area (with administration and coordination tasks funded separately under project 25-52-100). This program's purview includes an application and grant award program (Travel Options Program or TOP) to fund traditional TDM activities with demonstrated reduction of single-occupant vehicle (SOV) trips, develop pilots for new TDM projects and tools to manage SOV demand, as well as help to create and cultivate new mobility opportunities for residents and workers. This program will fund a two-year project round over FYs 2025-2026.

TDM focuses on the many options available to residents to travel to and from work, as well as to get around our region for other purposes, in a coordinated, cost-effective, and environmentally-positive way. It involves the strategies that more efficiently distribute travel demand across all modes, and especially reduce SOV travel. An important element of TDM is providing education and outreach to commuters, employers, residents, and visitors within our region about available travel options, and providing a mix of incentives to encourage behavior change toward more efficient use of the regional transportation system.

Recent major technological developments have changed the way the public considers and makes transportation choices. Mapping applications in wide use, like Waze and Google Maps, are themselves a form of TDM, enabling a more efficient use of transportation networks, but they don't necessarily reduce SOV demand. New mobility options like ride-hailing services (uber, lyft, etc.), bike share, and e-bike and e-scooter rentals are being developed and evolving rapidly, and are increasingly linked into shared scheduling and trip purchasing platforms mobility as a service (MaaS). These new technologies and modes, and the changes to travel patterns they have enabled, have also led to more exploration of larger TDM-related policy initiatives such as variable road pricing, trip-reduction plans, and transportation benefit ordinance requirements. All of these conditions warrant novel consideration of which TDM strategies can work most effectively in the greater Philadelphia region; therefore a Regional TDM Plan was developed and is used as a guide for these efforts.

Although DVRPC has long included TDM as an element in many individual projects and efforts, there was not a formal, coordinated TDM program for the full DVRPC service region until FY21. This new competitive and coordinated program of projects and activities helps DVRPC and its planning partners better address growing transportation-related needs and challenges, particularly the need to provide connections to various safe and affordable transportation modes, and to reduce congestion and improve air quality. In coordination with the development of the Commissions 2050 Long-Range Plan and new direction will allow for a broader, more strategic approach to TDM in the region, which differs from the service area-based approach.

A uniform, performance-based and outcome-driven approach to evaluating and undertaking projects will help staff and stakeholders strengthen existing TDM programs, and pilot new initiatives that can serve as a foundation for the future regional TDM portfolio. Completion of this work may require the purchase of equipment or services. This program will be funded largely with Surface Transportation Block Grant funds (also called STU in PA), instead of Congestion Mitigation Air Quality (CMAQ) funds; however, some projects in DVRPC's NJ counties (especially outside of the Philadelphia Urbanized Area) will continue to be partially funded with CMAQ dollars. Staff are familiar with the eligibility requirements for CMAQ funds from the previous TOP funding cycle, so can properly evaluate any projects submitted in the geographic areas that will require CMAQ instead of STBG funds; FHWA-NJ will also be consulted.

#### Tasks

1. With planning and administrative tasks funded under project 25-52-100, DVRPC will work with partners as appropriate to solicit and deliver projects showing demonstrable results related to the five principles in the Regional TDM Plan, in both PA and NJ. This may include managing vendor/provider contracts.

2. Obtain and record relevant data to support analysis of each activity's impact; strategy effectiveness will inform subsequent program rounds.

Note that any work done in New Jersey is funded via the New Jersey TIP.

MPMS# 117929 PA Transportation Demand Management (TDM) Base	Program	
LIMITS: Districtwide		No Let Date
IMPROVEMENT Other	NHPP:	
MUNICIPALITIES:	FC:	AQ Code:X1
PLAN CENTER:		IPD:
PROJECT MANAGER: David Alas CMP:		

This project will fund and guide the TMAs and contractors that will work with employers and residents to encourage them to choose travel alternatives to the single-occupancy vehicle (SOV). This will happen through educational programming and relevant products and services within specific service areas, through the tasks listed below. These tasks will result in improved accessibility to a variety of safe and affordable travel modes and a reduction in SOV travel that will lead to reduced traffic congestion and improved air quality in the region.

This program was renamed TripSmart PA, as it replaces the former Mobility Alternatives Program (MAP). TripSmart allows for a broader education and outreach effort beyond just commuters. The Transportation Management Associations (TMAs) and other related partners in Southeastern Pennsylvania have helped promote Transportation Demand Management (TDM) options and programs for nearly three decades, in the form of two grants funded by PennDOT; for FY2023, DVRPC and PennDOT created a TDM grant program that combines these two "legacy" grants into one new "base" TDM grant for each organization previously funded through one or both of the legacy grants. Each TMA/Contractor will contract and collaborate with DVRPC on work program development and implementation, along with their respective county planning department(s), PennDOT (Central Office and District- 6), and FHWA, to ensure relevant TDM issues and needs are addressed. Completion of this work may require the purchase of equipment or services.

Tasks

- 1. TDM education and outreach to the general public.
- 2. TDM education and outreach to employers and municipalities.
- 3. TDM education and outreach to other commute-related groups, professional organizations, community groups, etc.
- 4. Promotion of and assistance with the Share-A-Ride (SAR) ride match program and the Emergency Ride Home (ERH) program.
- 5. Locally-based projects that enhance commuters ability to choose a mode other than driving alone to work.

MPMS# 117931 Regional TOP Competitive	Administration 2022-23	3	
LIMITS: Districtwide			No Let Date
IMPROVEMENT Other		NHPP:	
MUNICIPALITIES:		FC:	AQ Code:X1
PLAN CENTER:			IPD:
PROJECT MANAGER: David Alas	CMP:		
This project supports ongoing administration, stra			tive Travel Options
Program (TOP), which funds implementation of T	DM projects in Southeast	ern PA.	

In FY2021, DVRPC convened a new Regional TDM Advisory Committee with relevant partner agencies, which developed and help staff reach consensus on goals, objectives, and an initial Vision Statement for this new regional approach to prioritizing TDM strategies in the DVRPC region, and incorporating new efforts. This Committee also helped develop and prioritize strategies to guide the selected pilot projects for testing, and helped determine ways to measure performance and impact. This planning and administration work also includes ongoing peer/best practice assessment for successful historic and current TDM plans and programs, here and in other regions, and evaluation of current plans and data that can be used to inform new priorities.

This project can include development and oversight of competitive expression of interest (EOI) and project application process(es), and establishing tracking procedures for measuring the impact of the program's projects and tasks. It may include outreach on release of the EOI and subsequent updates on selected projects. DVRPC also manages the contracts and invoicing activities with each of the selected grantees under this program.

A performance-based and outcome-driven approach to developing, evaluating, selecting, and undertaking projects will help staff and stakeholders strengthen existing TDM programs, and determine new longer-term initiatives that can serve as a foundation for the regional TDM portfolio in future years. Completion of this work may require the purchase of equipment or services.

Tasks

1. Convene regular meetings and/or workshops of the Regional TDM Advisory Committee, comprised of DVRPC member governments, State DOTs, transit agencies, partner MPOs and others, as appropriate, to continue providing input to and support for the Regional TDM Program.

2. Manage administrative functions associated with grants and reporting, as well as contract management and accounting activities.
3. Based on the outcomes of funded projects, including pilot programs, and relevant TDM practice nationally, further develop and prioritize strategies and pilot programs for testing in the DVRPC region, as well as ways to measure performance. Document historic and ongoing TDM activities, in our region and nationally, as applicable, and consider relevant, available plans and data that can be used to inform new regional priorities for action.

4. In collaboration with multiple departments across DVRPC, continue to monitor and report on COVID-related travel and behavior changes and their implications for TDM strategies, as relevant.

5. Review and revise, if necessary, the Regional TDM Plan (vision, goals, outcomes, and strategies) for our approach to TDM in the DVRPC region. Maintain a living strategic plan of priority TDM projects that builds on current activities and success, and also cultivates new strategies for trial, evaluation, and growth.

6. Based on the outcome of initial pilot projects, continue to develop proposed 'early action' projects for advisory committee consideration, with programs added to PA and NJ TIPs as appropriate.

MUNICIPALITIES: Various		FC:	AQ Code:X1
PLAN CENTER:			IPD:
PROJECT MANAGER: J. Moscda	CMP:		
			· · · · · · · · · · · · · · · · · · ·
The IIJA allows 5% of statewide Transportat	ion Alternatives Set-Aside (TAS	SA) funding to be dedicated to providing	technical assistance (TA)

for TASA projects. DVRPC recognizes the importance, value and need for more TA to build a strong, viable pipeline of TASA eligible projects, particularly in Justice 40 communities; to accelerate completion of the Circuit; and to effectively manage projects post-award. DVRPC coordinated with southeastern Pennsylvania partners including PennDOT District 6 and Bucks, Chester, Delaware, Montgomery and Philadelphia counties to identify an appropriate strategy for technical assistance for TASA for our region. This strategy requests funding from PennDOTs statewide allocation of TASA funds to support an on-retainer consultant for TASA engineering and planning services and to hire a new Project Implementation Engineer, for these tasks:

1. Consultant on Retainer for TASA engineering and planning services for pre-design activities (ROW, environmental clearances, developing credible cost estimates) to get good projects across the region ready for applications. Activities could include, but are not limited to: pevelopment of detail cost estimates

OW deed or title investigations to support project sponsor ROW negotiations.

etailed environmental input pertaining to Historic Properties, Permitting, Archeology, or any NEPA support.

larketing of the TASA program to Justice40 communities, and all potential TASA project sponsors in our region.

2. New DVRPC Project Implementation Engineer to join the Project Implementation team. Hiring an additional Project Implementation Engineer team member will allow the team to expand their work with project sponsors to develop stronger projects up front, provide attention and assistance to Justice40 communities, and to manage post grant awards. Specifically, the funding will support these TASA tasks:

coordinate with partners across the region to identify good projects to advance, with a particular focus on Justice40 communities ssist with the marketing of the TASA program to Justice40 communities, and all potential TASA project sponsors in our region. Vork with DVRPC staff and County Planners to identify specific TASA projects in our region to support TASA applications. Neet with potential project sponsors in our region to ensure compliance with Justice40.

lelp project sponsors understand and strategize for funding the pre-construction phases of the design development process. dentify and revise project scope as needed in order to advance through the requirements for PennDOT's Policies and Procedures. Support the advancement of projects and project concepts by local project sponsors to submit applications to the TASA funding cycle lelp sponsors follow federal rules and delivery requirements post award

raft an RFP, conduct a competitive solicitation process, procure the consultant, and administer the contract

versee the consultants milestones and deliverables

lelp interface between the consultant and project sponsors, prioritize needed tasks, and convene regular progress meetings

Products:

1. Marketing and outreach materials for the TASA program

2. Lists of municipalities, including Justice40 communities, with candidate projects

3. Support for project applications to the TASA program

4. Materials needed for the procurement process to bring a consultant on retainer

for TASA program assistance.

5. Meeting minutes from coordination with member governments and project
