

Introduction

This chapter provides a summary of New Jersey Transportation Improvement Program (TIP) funded projects that are conducted to benefit New Jersey Counties. These projects typically span over multiple fiscal years due to project scope of work, consultant selection process, and extent of review and approval required from various NJ member governments and municipalities. DVRPC staff continues to work with various stakeholders to provide administrative and technical support including competitive consultant selection process, project management, and communication to ensure the project deliverables are met timely and within budget. These multi-year projects consist of Local Concept Development (LCD) studies, NJ Regional Signal Retiming projects, Transportation and Community Development Initiatives (TCDI), and other planning studies.

NJDOT Initial No Cost Time Extension List

Due to unforeseen delays, projects may require additional time beyond the original established expiration timeline to ensure adequate completion of the approved scope of work. The progress of these projects is driven by consultant planning studies in collaboration with member governments from New Jersey counties. These continuing planning studies were fully obligated and they will be carried over into FY 2025 UPWP. Table 11A provides a summary of these projects including project number, project title, task order number, agreement number, funding amount, carryover estimate, current project end date and requested project end date.
